

**CONTENTS**

1. Regulatory Mandates for Controls on Ground-Water Monitoring	1
2. Ground-Water Monitoring System Design	17
3. The Overall Philosophy and Purpose of Site Investigations	69
4. Monitoring and Sampling the Vadose Zone	97
5. Remote Sensing and Geophysical Methods for Evaluation of Subsurface Conditions	143
6. Monitoring Well Drilling, Soil Sampling, Rock Coring and Brothel Logging	195
7. Design and Installation of Ground-Water Monitoring Wells	239
8. Monitoring Well Post-Installation Considerations	333
9. Acquisition and Interpretation of Water-Level Data	367
10. Methods and Procedures for Defining Aquifer Parameters	397
11. Ground-Water Sampling, Beverly	449
12. Ground-Water Sample Analysis	501
13. Organization and Analysis of Water Quality Data	541
14. Health and Consideration in Ground-Water Monitoring Investigations	580
15. Decontamination Program Design for Ground-Water quality Investigations	625
Glossary	637
Contributors	695
Index	697
