Introduction	1
Keynote Address- Reflections on Pickle-Jar Ecology	3
Biotic Monitoring	20
An Industrial View of Biological Monitoring	24
Evaluation of an Automated Biological Monitoring System at an Industrial Site	30
An Electronic System to Monitor the Effects of Changes in Water Quality on Fish Opercular Rhythms	38
A Biological Monitoring System Employing Rheotaxis of Fish	56
Rotatory-Flow Technique for Testing fitness of Fish	75
An Automatic System for Rapid Detection of Acute High Concentrations of Toxic Substances in Surface Water Using Trout	85
Rapid Assessment of Water Quality using the Fingernail Clm, Musculium transversum	96
Some Monitoring and Analytical Techniques for the Study of Locomotor Responses of Fish to Environmental Variables	110
A Laser-Based Optical Filtering System to Analyze Samples of Diatom Communities	121
Automated Measurement of River Productivity for Eutrophication Prediction	133
Biological Monitoring in Activated Sludge Treatment Process	147
The Importance of Monitoring Change	157
Research Related to Biological Evaluation of complex Wastes	191
Some Methods for Hypothesis Testing and Analysis with Biological Monitoring Data	200
Time as a Factor in Biomonitoring Estuarine Systems with Reference to benthic Macrophytes and Epibenthic Fishes and Invertebrates	212
Summary	235
Index	243
