

Contents

Series Preface	vii
Preface	ix
1 The Framework of Water Analysis	1
1.1 Introduction	1
1.2 Purpose of Analysis	2
1.3 Types Of Waters Currently Analyzed	7
1.4 Chemical Parameters	8
1.5 Microbiological Parameters	15
References	19
2 General Concepts of QA/QC – Definitions	21
2.1 Introduction	21
2.2 Definitions	27
References	45
3 Sampling and Sample Handling	47
3.1 Introduction	47
3.2 Sampling Strategy	49
3.3 Sample Pre-Treatment	61
3.4 Sample Handling, Preservation and Storage	62
References	71
4 Current Methods of Analysis	73
4.1 Selection of Analytical Methods	73
4.2 Measurements and Production of Analytical Data	83
4.3 Types of Analytical Methods	88
References	96
5 Analytical Quality Control	99
5.1 Principles	99
5.2 Different Types of Validation	101

5.3	Critical Steps of Water Analyses	107
5.4	Stepwise Evaluation of Methods	110
5.5	Verification of Trueness	114
5.6	Verification of Reproducibility	117
	References	123
6	Reference Materials	125
6.1	Introduction	126
6.2	Pure Solutions	140
6.3	Freshwater	151
6.4	Rain-water	156
6.5	Groundwater	159
6.6	Estuarine Water	164
6.7	Sea-water	165
6.8	Waste-water	170
	References	173
7	Reporting of Measurement Data	177
7.1	Introduction	177
7.2	Management Documentation	177
7.3	Treatment of Analysis Results	179
7.4	Reporting Analytical Results	189
	References	191
8	Participation in Interlaboratory Studies	193
8.1	Introduction	193
8.2	The Different Types of Interlaboratory Studies	194
8.3	Organization	195
8.4	Evaluation of the Results	198
8.5	Examples of Water-related Interlaboratory Studies	205
	References	209
9	Quality Systems	211
9.1	Introduction	211
9.2	Standardization	215
9.3	Accreditation	217
	References	227
	Appendices	229
	Glossary	243
	Index	247
