

# Contents and Subject Index

1. INTRODUCTION . . . . .	4
How to Use This Guide. . . . .	4
Limitations of the Guide. . . . .	5
Pilot Testing. . . . .	5
Volatilization of Organic Compounds from Water: A Review	5
2. SITE CHARACTERIZATION . . . . .	10
Instructions and Explanations . . . . .	10
Extent of Treatment Needed. . . . .	10
Effluent Requirements. . . . .	10
Properties of Spilled Material. . . . .	10
Climate. . . . .	12
Site-Specific Considerations. . . . .	12
Integration with Other Treatment Systems.	12
3. MATERIAL PROPERTIES AND ESTIMATION METHODS . . . . .	13
Estimation Methods. . . . .	13
Estimation of Henry's Law Constants from Vapor Pressure and Solubility Data. . . . .	13
Case I: Vapor Pressure and Solubility at the Same Temperature. . . . .	13
Case II: Vapor Pressure and Solubility Data at Different Temperatures. . . . .	14
Estimation of Henry's Law Constants for Various Temperatures. . . . .	15
Estimation of Henry's Law Constants for Various Pressures. . . . .	15
Estimation for Compounds with High Solubilities in Water . . . . .	15
4. TECHNOLOGY EVALUATION . . . . .	17
Organic Removals . . . . .	17
Time Requirements for Removal	26
System Emissions . . . . .	40
Cost Data. . . . .	40
5. DESIGN BASES . . . . .	50
Volatilization from Surface Impoundments . . . . .	50
Principle of Volatilization from an Impoundment . . . . .	50
Description of Model Impoundment and Volatilization Enhancement Systems	51
Impoundment Without Mechanical Agitation . . . . .	53
Impoundment with a Surface Spraying System . . . . .	53

Impoundment with a High-Speed Surface Aeration System . . . . .	55
Applicability of Surface Impoundment Volatilization Technologies . . . . .	58
<b>Air-Stripping Columns</b> . . . . .	60
Principle of Air Stripping . . . . .	60
Description of Model Air-Stripping Systems . . . . .	63
Cocurrent Bubble Column. . . . .	63
Cocurrent Bubble Column Design Basis . . . . .	64
Spray Column. . . . .	69
Spray Column Design Basis . . . . .	70
Packed Column Air Stripper . . . . .	73
Packed Column Air Stripper Design Basis. . . . .	77
Cooling Tower . . . . .	82
Cooling Tower Design Basis. . . . .	82
Applicability of Air Stripping . . . . .	83
Applicability of Bubble Columns . . . . .	87
Applicability of Spray Columns . . . . .	88
Applicability of Packed Air-Stripping Columns . . . . .	89
Applicability of Cooling Towers. . . . .	89
<b>Considerations for Air-Stripping Equipment Evaluation</b> . . . . .	90
<b>Distillation Systems</b> . . . . .	91
Principle of Distillation. . . . .	91
Treatment of Aqueous Organic Solutions by Distillation. . . . .	92
Relative Volatility. . . . .	93
Azeotropes. . . . .	93
Steam-to-Feed Ratio . . . . .	93
Mass Transfer Equations and Estimation Procedures. . . . .	94
<b>Description of Model System</b> . . . . .	94
Applicability of Distillation Systems. . . . .	101
<b>Considerations for Steam-Stripping Equipment Evaluation</b> . . . . .	102
<b>6. FACTORS AFFECTING EVALUATION</b> . . . . .	103
<b>Material-Specific Factors</b> . . . . .	103
Multicomponent Mixtures. . . . .	103
Safety Considerations. . . . .	103
Absorption and Adsorption. . . . .	104
Decomposition in Water. . . . .	104
<b>Site-Specific Factors</b> . . . . .	105
Season. . . . .	105
Water Quality. . . . .	105
<b>REFERENCES</b> . . . . .	107
<b>APPENDIX A—EXAMPLE</b> . . . . .	109
Statement of Problem . . . . .	109
Evaluation . . . . .	109
Conclusion. . . . .	110
<b>APPENDIX B—MATERIAL PROPERTIES</b> . . . . .	111
<b>APPENDIX C—LOWER FLAMMABILITY LIMITS</b> . . . . .	117
<b>APPENDIX D—LIST OF SYMBOLS</b> . . . . .	119
<b>APPENDIX E—CONVERSION FACTORS</b> . . . . .	120
