

## CONTENTS

	Page
1. Adsorption Thermodynamics at the Solid-Liquid Interface : the Influence of Surface Hetrogeneity on the Removal of Some Surfactants and organic Micropollutants from Aqueous Solutions	1
2. Influence of the Concentration Change of Raw Water upon the Carbon Adsorption Isotherms of Total Organics and Micropollutants	19
3. Using Powdered Activated Carbon : A Critical review	35
4. Development of a Method to Predict the Adsorption of Organic Chemicals on Activated Carbon	67
5. Competitive Adsorption of Several Organics and Heavy Metals on Activated Carbon in Water	79
6. Coagulation-flocculation of Minerals Using Al, Fe(III) Salts. What Kind of Floes for What Separation Process?	97
7. Drinking Water Treatment by Hydrosoluble Polymer : Mechanisms of Coagulation and Efficiency	115
8. The Role of Colloids and Dissolved Organics in membrane and Depth Filtration	125
9. Preliminary Analysis of the Organic Contents in Treated and Raw Water in Guangzhou City	137
10. Treatability Evaluation by Simple and Rapid Method	143
11. Automatic control of the Coagulant Dose in Drinking Water Treatment	157
12. Influence of Preozonation on the clarification Efficiency	173
13. Application of Ozone with Activated Carbon for Drinking Water Treatment in China	187
14. Basic Concepts for the Choice and Design of Ozone Contactors	195
15. Organic Removal by Ozonation and GAC Adsorption	207
16. A Pilot-Plant Study on Advanced Treatment of Potable Water	219
17. Ozonation of Organic Compounds Causing Taste and Odor Problems	233
18. The Aqueous reactions of Specific Organic Compounds with Ozone	251
19. New Advances in Oxidation Processes : The Use of the Ozone/Hydrogen Peroxide Combination for Micropollutant Removal in Drinking Water	265
20. A Fluidized Biofilter Bed Process as a Preliminary Treatment of a Contaminated Raw Water Source	279
21. Removal of Synthetic and Natural Organic Compounds by Biological Filtration	289
22. Membrane Filtration in Drinking Water Treatment : A Case Study	299
23. Ultrafiltration of Lake Water : Optimization of TOC Removal and Flux	311
24. Megatrends in Drinking Water Treatment Technologies : The Years Ahead 1990	325
Index	333
