

CONTENTS

Part One The properties of water	1
1. The Hydrologic Cycle F. Franks	3
2. Natural Waters George slot	25
3. Water Physics and Chemistry Leonard Saunders	42
4. Water Quality Walter Larch	59
Part Two Purification Processes	73
5. Removal of Insoluble Particles Derek B. Purchas	75
6. Distillation Leonard Saunders	150
7. Ion Exchange Richard Hill and Walter Larch	191
8. Reverse Osmosis H. Pohland	285
9. Electrodialysis George Slot	336
10. Ultraviolet Sterilization Gunther O. Schenck	363
11. Instrumentation and Control Doug Meredith	427
Part Three Purified Water practice	505
12. Conveyance and Storage of purified Water Louis C.Ross	507
13. Sterile and Apyrogenic Water T. Douglas Whittet	548
Part Four Applications and case histories Walter Lorch	585
14. Pharmacy and Medicine	587
15. Electronics Industry	615
16. Boiler Feed and Condensate	645
17. Food and Drink	674
18. Electroplating	682
Appendices	693
Index	711
