INVITED PAPERS

TiO₂ Photocatalysis: Fundamentals

Conditions for an efficient photocatalytic activity of TiO ₂ particles		
H. GERISCHER		
Fundamental photoelectrochemistry of TiO ₂ and SrTiO ₃ applied to environmental problems	19	
J.M. KESSELMAN, A. KUMAR and N.S. LEWIS		
Size quantization effects in photocatalysis ..	39	
A.J. NOZIK		
Radical mediated degradation mechanisms of halogenated organic compounds as studied by photocatalysis at TiO ₂ and by radiation chemistry	49	
Y. MAO, C. SCHÖNEICH and K.-D. ASMUS		
Initial rates of TiO ₂ -photocatalysed degradations of water pollutants: Influences of adsorption, pH and photon-flux	67	
J. CUNNINGHAM and P. SEDLAK		
TiO ₂ mediated photocatalysis using visible light: Photosensitization approach	83	
P.V. KAMAT and K. VINODGOPAL		
The photocatalytic oxidation of propanol by TiO ₂	95	
G.P. LEPORE, A. VLČEK, Jr. and C.H. LANGFORD		
A method for the determination of quantum yields in heterogeneous systems: The TiO ₂ photocatalyzed bleaching of methylene blue	111	
J.E. VALLADARES and J.R. BOLTON		

Photocatalyzed Water Treatment

Photocatalysis in water purification: Possibilities, problems and prospects R.W. MATTHEWS	
Photoassisted oxidation of oil and organic spills on water A. HELLER, M. NAIR, L. DAVIDSON, Z. LUO, J. SCHWITZGEBEL, J. NORRELL, J.R. BROCK, S.-E. LINDQUIST and J.G. EKERDT	139
Photocatalytic oxidation of organic compounds and reduction of dioxygen with quantum-sized semiconductors A.J. HOFFMAN and M.R. HOFFMANN	155
The role of hydroxyl radicals in the photocatalyzed detoxification of organic pollutants: Pulse radiolysis and time-resolved diffuse reflectance measurements M.A. FOX	163
Effect of crystal form of TiO ₂ on the photocatalytic degradation of pollutants K. TANAKA, T. HISANAGA and A.P. RIVERA	169
The TiO ₂ -mediated photocatalytic degradation of chloroalkenes in water J.F. KENNEKE, J.L. FERRY and W.H. GLAZE	179
Biochemical application of TiO ₂ photocatalysts A. FUJISHIMA, R. CAI, K. HASHIMOTO, H. SAKAI and Y. KUBOTA	193
TiO ₂ photocatalytic destruction of water aromatic pollutants: Intermediates; properties- degradability correlation; effects of inorganic ions and TiO ₂ surface area; comparisons with H ₂ O ₂ processes P. PICHAT, C. GUILLARD, C. MAILLARD, L. AMALRIC and J.-C. D'OLIVEIRA	207
Identifying primary events and the nature of intermediates formed during the photocatalyzed oxidation of organics mediated by irradiated semiconductors . N. SERPONE, E. PELIZZETTI and H. HIDAKA	225
Photocatalyzed mineralization of non-ionic, cationic, and anionic surfactants at TiO ₂ /H ₂ O interfaces H.HIDAKA, J. ZHAO, K. NOHARA, K. KITAMURA, Y. SATOH, E. PELIZZETTI and N. SERPONE	251
Photocatalytic processes for surfactant degradation E. PELIZZETTI, C. MINERO, H. HIDAKA and N. SERPONE	261
Biological treatment of Kraft wastewater following pretreatment of the extraction waste stream by illuminating titanium dioxide and membranes R.A. SIERKA and C.W. BRYANT	275

Formation and disappearance of biphenyl derivatives in the photocatalytic transformation of 1,2,4-trichlorobenzene on titanium dioxide	291
E. PELIZZETTI, C. MINERO, M. SEGA and M. VINCENTI	
Photocatalytic detoxification: Novel catalysts, mechanisms and solar applications	301
D.W. BAHNEMANN, D. BOCKELMANN, R. GOSLICH, M. HILGENDORFF and D. WEICHHREBE	
TiO ₂ advanced photo-oxidation technology: Effect of electron acceptors	321
H. AL-EKABI, B. BUTTERS, D. DELANY, J. IRELAND, N. LEWIS, T. POWELL and J. STORY	
Photocatalysis for aqueous phase decontamination: Is TiO ₂ the better choice?	337
X. DOMÈNECH	
TiO ₂ photocatalysis for the destruction of organics and the reduction of heavy metals	353
M.R. PRAIRIE, B.M. STANGE and L.R. EVANS	
Use of TiO ₂ photocatalysis in the treatment of spent electroless copper plating baths	365
N.S. FOSTER, G.N. BROWN, R.D. NOBLE and C.A. KOVAL	

Photocatalyzed Air Treatment

Removal of low concentration air pollutants through photoassisted heterogeneous catalysis	375
T. IBUSUKI, S. KUTSUNA, K. TAKEUCHI, K. SHIN-KAI, T. SASAMOTO and M. MIYAMOTO	
Detection of intermediates from the gas-phase photocatalytic oxidation of trichloroethylene 387
M.R. NIMLOS, W.A. JACOBY, D.M. BLAKE and T.A. MILNE	
Titanium dioxide mediated photochemical destruction of trichloroethylene vapours in air	393
W. HOLDEN, A. MARCELLINO, D. VALIC and A.C. WEEDON	
Photodegradation of trichloroethylene in the gas phase using TiO ₂ porous ceramic membrane	405
M.A. ANDERSON, S. YAMAZAKI-NISHIDA and S. CERVERA-MARCH	
Photocatalytic air purification on TiO ₂ coated honeycomb support	421
K-I. SUZUKI	
Flow reactor studies of TiO ₂ photocatalytic treatment of airborne nitroglycerin	435
A. T-RAISSI and N.Z. MURADOV	

Mechanistic studies in TiO ₂ systems: Photocatalytic degradation of chloro- and nitrophenols	455
K.A. GRAY, U. STAFFORD, M.S. DIECKMANN and P. KAMAT	
Characterization of TiO ₂ used in liquid-phase and gas-phase photooxidation of trichloroethylene	473
S.A. LARSON and J.L. FALCONER	

Photoreactor Design

Photoreactors for purification and decontamination of air D.F. OLLIS	
Modelling, scale-up and design of multiphasic photoreactors .. P.L. YUE	
TiO ₂ photocatalytic treatment of water. Reactor design and optimization experiments L. JAKOB, E. OLIVEROS, O. LEGRINI and A.M. BRAUN	
Mass transfer limitations in a packed bed photoreactor used for phenol removal A. SCLAFANI, A. BRUCATO and L. RIZZUTI	
Operation of a solar photocatalytic water treatment system at a superfund site	547
J.E. PACHECO, M. MEHOS, C. TURCHI and H. LINK	

TiO₂ Photo-oxidation Processes: Economics and Roles

Microbiological issues related to drinking water disinfection chemistry: Opportunities for further TiO ₂ research	557
J.C. IRELAND	
Treatment of organic contaminants in air by photocatalytic oxidation: A commercialization perspective	
R. MILLER and R. FOX	

CONTRIBUTED PAPERS

Liquid Phase

Treatment of landfill leachates by photocatalytic oxidation using TiO ₂ : A comparison with alternative photochemical technologies	579
D. WEICHHREBE, A. VOGELPOHL, D. BOCKELMANN and D. BAHNEMANN	

Treatment of industrial wastewaters by photocatalytic oxidation on TiO ₂	585
L. TINUCCI, E. BORGARELLO, C. MINERO and E. PELIZZETTI	
The photomineralisation of reactive black 5 sensitised by titanium dioxide: A study of the initial kinetics of dye photobleaching 595
A. MILLS and R. DAVIES	
TiO ₂ -photosensitized degradation of the insecticide tetrachlorvinphos [(Z)-2-chloro-1 (2,4,5-trichlorophenyl) ethenyl dimethyl phosphate]	601
M. KERZHENTSEV, C. GUILLARD, J.-M. HERRMANN and P. PICHAT	
Photocatalytic degradation of atrazine P.L. YUE and D. ALLEN	
Photocatalytic oxidation of multi-component organochlorine mixtures in water	613
T.P.M. KOSTER, J.W. ASSINK, J.M. SLAAGER and C. VAN DER VEEN	
Photocatalytic decomposition of PCBs in aqueous systems with solar light ..	619
P. ZHANG, R.J. SCRUDATO, J.J. PAGANO and R.N. ROBERTS	
Feasibility of photocatalytic degradation of TNT as a single or integrated treatment process	625
D.C. SCHMELLING and K.A. GRAY	
Kinetic and radiation studies for the photoreactor design in photocatalytic detoxification processes using TiO ₂	633
S. CERVERA-MARCH, J. GIMÉNEZ-FARRERAS, M.A. AGUADO, L. BORRELL, D. CURCÓ and M.A. QUERAL	
Influence of solar irradiation over pentachlorophenol solar photocatalytic decomposition	
J. BLANCO GÁLVEZ and S. MALATO RODRÍGUEZ	
Improved photoefficiencies for TiO ₂ photocatalytic reactors through the use of controlled periodic illumination	645
J.G. SCZECZOWSKI, C.A. KOVAL and R.D. NOBLE	
Detection of intermediates formed at the surface of photo-excited TiO ₂ film electrode using microelectrode	651
H. SAKAI, R-X. CAI, R. BABA, K. HASHIMOTO, Y. KUBOTA and A. FUJISHIMA	
Photocatalytic activity of TiO ₂ and the formation of radical intermediates	
V. BREZOVÁ, A. STAŠKO, M. ČEPPAN, M. MIKULA, J. BLECHA, M. VESELÝ, A. BLAŽKOVÁ, J. PANÁK and E. LAPČÍK	
Dependence of photocatalytic reaction rate on photocatalyst concentration in aqueous suspensions	
H. KAWAGUCHI	

Destruction of 2,4-dichlorophenoxyethanoic acid (2,4-D) in water by TiO ₂ -UV, H ₂ O ₂ -UV or direct photolysis	683
P. PICHAT, J.-C. D'OLIVEIRA, J.-F. MAFFRE and D. MAS	
Photodegradation of pentachlorophenol	689
G. LI PUMA and P.L. YUE	
Photocatalytic degradation of some chlorohydrocarbons in aqueous suspensions of MO ₃ /TiO ₂ (M = Mo or W)	695
N.N. RAO, S. DUBE and P. NATARAJAN	
A comparative study on the direct photolysis and TiO ₂ -mediated photodegradation of 2-chlorophenol in aqueous solutions	701
C.D. DONG and C.P. HUANG	
The reactions of isomeric 2,4-hexadienes on photoexcited TiO ₂ . Evidence for hole mediated oxidative pathways	
K. O'SHEA and A. CONDE	
The photocatalysis of anatase type TiO ₂	713
Y-P. WENG, F-Y. WANG, L-M. LIN and R. XIE	

Gas Phase

The photocatalytic destruction of gaseous trichloroethylene and tetrachloroethylene over immobilized titanium dioxide	719
H. AL-EKABI, B. BUTTERS, D. DELANY, W. HOLDEN, T. POWELL and J. STORY	
Photocatalytic abatement of nitrogen oxides	727
P.H. JORDAN and P.L. YUE	
Control of VOC emissions from air-stripping towers: Development of gas-phase photocatalytic process	
K-M. WANG and B.J. MARINAS	
Photocatalyst deactivation: Oxidation of decamethyl-tetrasiloxane, pyrrole, indole and dimethyl sulfide	741
J. PERAL and D.F. OLLIS	
Photocatalytic activity of TiO ₂ thin film under room light	747
T. WATANABE, A. KITAMURA, E. KOJIMA, C. NAKAYAMA, K. HASHIMOTO and A. FUJISHIMA	
Direct observation of crystal surface structure of powdery TiO ₂ photocatalyst by SAD in TEM	
F-Y WANG, Y-P. WENG and L-M. LIN	

Catalysts and Reactors

Simple supported photocatalysts	759
J.F. PORTER and P.L. YUE	
Fundamental photocatalytic studies on immobilised films of TiO ₂	765
P.A. CHRISTENSEN, A. HAMNETT, R. HE, C.R. HOWARTH and K.E. SHAW	
Solar detoxification of polluted water: Comparing the efficiencies of a parabolic trough reactor and a novel thin-film-fixed-bed reactor	771
D. BOCKELMANN, R. GOSLICH, D. WEICHHREBE and D. BAHNEMANN	
Photocatalyzed treatment of 4-chlorophenol with immobilized titaniumdioxide	777
K. HOFSTADLER, G. RUPPERT, R. BAUER, G. HEISLER and S. NOVALIC	
Photocatalytic degradation of chloroform with TiO ₂ coated glass fiber cloth	783
M. MURABAYASHI, K. ITOH, K. KAWASHIMA, R. MASUDA and S. SUZUKI	
Design issues for solar-driven photocatalytic systems	789
C. TURCHI, M. MEHOS and J. PACHECO	
Photocatalysis of organic effluents in a falling film reactor .	795
H.C. YATMAZ, C.R. HOWARTH and C. WALLIS	
Physical-chemical characteristics of P-25 making it extremely suited as the catalyst in photodegradation of organic compounds	
M. NARGIELLO and T. HERZ	
Synthesis of TiO ₂ photocatalysts with high activity by the alkoxide method ...	
K. KATO	
Photoacoustic study of light-induced charge separation in TiO ₂ particles	
Y. TAKAOKA, I. AKETA and S. MURASAWA
