Preface	v
List of contributors	xi
Introduction	1
Part A : Ozone in Overview	3
1. Toxicology	5
1.1 Background	5
1.2 Ozone in Gas	6
1.3 Ozone in Liquid	7
1.4 Byproducts	7
2. Reaction Mechanism	11
2.1 Ozonation	11
2.2 Advanced Oxidation Processes (AOP)	15
3. Full-Scale Application	21
3.1 Introduction	21
3.2 Ozonation in Drinking Water Treatment	22
3.3 Ozonation in Waste Water treatment	28
3.4 Economical Aspects of Ozonation	33
Part B : Ozone Applied	37
1. Experimental Design	39
1.1 Parameters that Influence Ozonation	39
1.2 Experimental Design Process	43
1.3 Ozone Data Sheet	48
2. Experimental Equipment and Analytical Methods	51
2.1 Materials in Contact with Ozone	52
2.2 Ozone Generation	53
2.3 Reactors Used for Ozonation	60
2.4 Ozone Measurement	68
2.5 Safety Aspects	73
2.6 Common Questions, Problems and Pitfalls	74
3. Mass Transfer	81
3.1 Theory of Mass Transfer	81
3.2 Parameters that Influence Mass Transfer	88
3.3 Determination of Mass Transfer Coefficients	95
4. Reaction Kinetics	109
4.1 Background	109
4.2 Reaction Order	111
4.3 Reaction Rate Constants	115
4.4 Parameters that Influence the Reaction Rate	118
5. Modeling of Ozonation Processes	127
5.1 Chemical Model of Oxidation	128
5.2 Modeling of Drinking water Oxidation	129
5.3 Modeling of Waste Water Oxidation	137

5.4	Final comments on Modeling	141
6.	Application of Ozone in Combined Processes	143
6.1	Applications in the Semiconductor Industry	143
6.2	Advanced Oxidation Processes	148
6.3	Three-Phase Systems	152
6.4	Ozonation and Biodegradation	162
	Glossary	177
	Index	181
