1	Introduction . . .	1
	H.-G. Heitmann	
	Types of Water	
1.2	Process Engineering in Order to Reduce the Concentration of Salts	3
1.2.1	Reverse Osmosis	3
1.2.2	Electrodialysis	4
1.2.3	Transmembrane Distillation	5
1.2.4	Evaporation	6
1.2.5	Ion Exchangers	7
1.3	Requirements and Possibilities of Water Treatment in Sea Water Desalination Plants	8
2	Designations and Terms to Denote the Specific Heat Consumption in Thermal Sea Water Desalination Plants	13
	H.-E. Hömig	
3	Sampling and Analysis in Sea Water Desalination	7
	H. Effelsberg and D. Hirschfeld	
3.1	Introduction and Objectives	17
3.2	Difficulties Encountered in the Lay-out of Desalination Plant . .	17
3.3	Required Data and Analytical Intervals	18
3.4	Analysis	20
3.4.1	Sampling	20
3.4.2	Conservation of Samples	21
3.4.3	Analytical Methods	21
3.4.3.1	Standard Methods	21
3.4.3.2	Methods of Rapid Analysis	21
3.4.3.3	Use of Automatic Recording Instruments	22
3.5	Laboratory Equipment	23
3.6	Summary	23

4	Continuous Measuring of Colloidal Substances in the Treatment of Fresh Water and Waste Water	25
	K. Marquardt	
4.1	Introduction	25
4.1.1	Contitest	25
4.1.2	Principles of Operation	26
4.2	Various Processes for Carrying out Measurements	27
4.2.1	Specific Conductivity	27
4.2.2	KMnO ₄ Consumption	27
4.2.3	TOC Value	27
4.2.4	UV Extinction	28
4.2.5	Silting Index	28
4.2.6	Colloidal Index	29
4.2.6.1	Manual Measuring of the Colloidal Index	29
4.2.6.2	Measuring the Colloidal Index in the Treatment of Fresh Water ..	30
4.2.6.3	Measuring the Colloidal Index in Waste Water Treatment	31
4.2.6.4	Automatic Measurement of the Colloidal Index	32
4.3	Summary	35
5	Colloidal Index – Determining the Colloidal Index of Various Types of Water	37
	K. Marquardt and G. Greiner	
5.1	Introduction	37
5.2	Definitions	37
5.2.1	Test Condition	38
5.2.2	Unit of Measurement	38
5.2.3	Limit Values	39
5.3	Determination	40
5.3.1	Manual Measurement (Standard Colloidal Index)	40
5.3.1.1	Apparatus	40
5.3.1.2	Mode of Testing	40
5.3.2	Automatic Measurement	41
5.3.2.1	Description of Operation	42
5.4	Range of Application	42
5.5	Remarks	43
6	Scale Prediction in Saline Water	45
	O. C. Nedelmann	
6.1	Introduction	45
6.1.1	Why Scales Form	45
6.1.2	Methods for Predicting Scale Formation	45

6.1.3	Suggested Methods of Scale Prediction	46
6.2	Saline Water Scales Below 80°C	46
6.2.1	Scale Forming Constituents	47
6.2.1.1	Calcium Carbonate	47
6.2.1.2	Calcium Sulfate	47
6.2.1.3	Barium Sulfate	48
6.2.1.4	Strontium Sulfate	48
6.2.1.5	Magnesium Carbonate, Magnesium Hydroxide	49
6.2.1.6	Silica, Magnesium Silicate	49
	Appendix I	49
	Appendix II	50
	Appendix III	52

7 Chemical Problems and Chemical Water Conditioning in Sea Water Desalination 55

H.-G. Heitmann

7.1	Introduction	55
7.2	Flow Sheet of a Thermal Sea Water Desalination Plant	58
7.3	Scaling and its Causes	60
7.3.1	Biological Fouling	61
7.3.2	Alkaline Scales	61
7.3.3	Sulfate Scales	62
7.3.4	Corrosion	63
7.3.5	Other Scales	64
7.4	The Mechanism of Scale Formation	64
7.5	Methods of Suppressing Scale Formation	64
7.5.1	Addition of Acid	64
7.5.2	Threshold Inhibitors	65
7.6	The Theory of Threshold Inhibitor Action	65
7.6.1	Nucleation	65
7.6.2	Growth	66
7.7	Conclusions	66

8 Corrosion Problems and Selection of Materials in the Desalination of Sea Water 67

D. Hirschfeld

8.1	Introduction	67
8.2	Various Types of Corrosion ..	69
8.2.1	General Corrosion	69
8.2.2	Pitting and Crevice Corrosion	72
8.2.3	Stress Corrosion Cracking ...	74

8.2.4	Selective Corrosion	75
8.2.5	Contact Corrosion	76
8.2.6	Erosion and Impact Corrosion	77
8.2.7	Corrosion during Shut-down Periods	77
8.3	Outline of Materials	78
8.3.1	Non-Alloyed Steel	78
8.3.2	Stainless Steels	78
8.3.3	Copper Alloys	80
8.3.4	Nickel Alloys	81
8.3.5	Aluminum Alloys	81
8.3.6	Titanium and Titanium Alloys	82
8.3.7	Plastic Coatings	84
8.3.8	Other Materials	84
8.4	Selection of Materials for the Various Plant Units ..	84
8.4.1	Sea Water Inlet Pipe	84
8.4.2	Sea Water Cleaning	84
8.4.3	Chemical Pre-treatment	85
8.4.4	Deaerator	85
8.4.5	Condenser Tubes	85
8.4.6	Tube Sheets	86
8.4.7	Evaporator Shell	86
8.4.8	Demister	87
8.4.9	Sea Water and Brine Pumps	87
8.4.10	Piping	87
8.4.11	Valves	88
8.4.12	Distillate Collectors	88
8.4.13	Distillate Collecting Basin and Distillate Treatment ..	88
8.4.14	Miscellaneous	88
8.5	Summary	89
9	Mechanical Cleaning and Processing Methods .	91
	H.-G. Heitmann	
9.1	Coarse Cleaning	91
9.1.1	Clamshell Grab Screen; Screen with Grab-Arm Trolley	91
9.1.2	Rake Screen; Screen with Cleaning Trolley	92
9.1.3	Circulating Screens	93
9.1.4	Travelling Band Screens	94
9.1.5	Drum Screens	95
9.2	Tube Cleaning Systems	96
9.3	Sludge Treatment	101

10	Separation of Particulate Matter from the Feed Water for Reverse Osmosis Plants	103
	K.-H. Reinhardt and H.-J. Müller	
10.1	Introduction	103
10.2	Technology for the Removal of Suspended Solids ...	104
10.3	Mechanism of Floc Filtration	107
10.4	Optimization of Floc Filtration	111
10.5	Analytical Characterization of Suspended Matter ...	112
11	Flocculation, Precipitation, Sedimentation and Flootation for Use as Pretreatment Stages for Brackish Water and Sea Water in Desalination Plants	121
	K. Marquardt	
11.1	Introduction	121
11.2	Process Combination – Flocculation, Precipitation and Sedimentation	121
11.2.1	Precipitation	123
11.2.2	Flocculation	124
11.3	Compact Unit for Precipitation and Flocculation Using Pre-Aeration, if Required	124
11.3.1	Compact Flocculation Units	127
11.3.2	Sedimentation	128
11.3.3	Flootation	130
11.3.4	Sludge Dehydration	131
11.4	Conclusion	133
12	Desalination of Brackish Water and Sea Water by Reverse Osmosis	135
	K. Marquardt	
12.1	Introduction	135
12.2	Raw Water Pretreatment and Sea Water Intake	137
12.2.1	Pretreatment Processes	137
12.2.2	Scaling Prevention	138
12.3	Reverse Osmosis Systems	140
12.4	Energy Recovery	142
12.5	Sea Water Desalination by Reverse Osmosis in Combined Systems	143
12.5.1	Multipurpose Systems	144
12.5.2	Connection of RO Plant with Energy Generator and Evaporation Plant	145
12.6	Economic Aspects	146

12.6.1	Optimization Calculation	146
12.6.2	Results of the Studies	146
12.6.2.1	Plant Costs	146
12.6.2.2	Residual Salt Content	150
12.6.2.3	Energy-independent Operating Costs .	152
12.7	Performance Data	152
12.7.1	Pretreatment and In-Line Coagulation	152
12.7.2	Cartridge Filters – 5 µm	153
12.7.3	Reverse Osmosis Stage – RO I.....	156
12.7.4	Reverse Osmosis Stage – RO II.....	158
12.7.5	Post-treatment.....	159
12.7.6	Attained Results and Performance ...	159
12.7.7	Amount of Drinking Water Produced	159
12.8	Summary	161
13	Reverse Osmosis for Treating Fresh Water and Waste Water	163
	K. Marquardt	
13.1	Introduction	163
13.2	Osmosis – Reverse Osmosis	164
13.2.1	Definition	164
13.2.1.1	Osmosis	164
13.2.1.2	Reverse Osmosis	165
13.2.2	Membranes	165
13.2.2.1	Membrane Types	166
13.2.2.2	Membrane Structure	166
13.2.2.3	Membrane Materials	167
13.2.3	Modules	167
13.2.3.1	Hollow Fiber Module	167
13.2.3.2	Tubular Module	168
13.2.3.3	Modules with Flat Membranes	169
13.2.4	Composition of a Reverse Osmosis Plant	170
13.3	Operation.....	172
13.3.1	Pressure	172
13.3.2	Temperature.....	173
13.3.3	Separating Efficiency of the Membranes	
13.3.4	Factors Influencing Separating Efficiency	173
13.3.5	Recovery	174
13.4	Pretreatment of Raw Water	174
13.4.1	Aim of Pretreatment	174
13.4.2	Instructions for the Pretreatment of Raw Water	175
13.5	Applications	176
13.5.1	Drinking Water Including Post-Treatment	176
13.5.2	Industrial Water	176
13.5.3	Effluent Desalination	176

13.5.4	Recovery of Valuable Substances	177
13.5.5	Technology for Medical Purposes	177
13.5.6	Desalination of Brackish Water and Sea Water	177
13.6	Measurement of Silt Density Index and Turbidity	177
13.6.1	SDI Calculation	177
13.6.2	Turbidity Measurement	179
13.6.3	Annotation	170
14	Ultrafiltration for Treatment of Aqueous Solutions	181
	K. Marquardt	
14.1	Introduction	181
14.2	General	182
14.2.1	Definition	182
14.2.2	Membranes	183
14.2.2.1	Membrane Types	183
14.2.2.2	Membrane Structure	183
14.2.2.3	Membrane Materials	185
14.2.3	Modules	185
14.2.3.1	Modules with Flat Membranes	185
14.2.3.2	Capillary Modules	187
14.2.3.3	Tubular Module	187
14.2.4	Arrangement of an Ultrafiltration System	187
14.3	Mode of Operation	189
14.3.1	Process Description	189
14.3.2	Process Parameters	191
14.3.2.1	Rejection Capacity	191
14.3.2.2	Filtrate Flux Rate	191
14.3.2.3	Recovery	191
14.3.2.4	Flow Rate	192
14.3.2.5	Pressure	192
14.3.2.6	Temperature	193
14.3.2.7	Membrane Cleaning	193
14.4	Requirements Made on the Solutions to be Treated	194
14.5	Applications	194
14.5.1	Drinking and Service Water Production	194
14.5.2	Waste Water Treatment	194
14.5.3	Separation of Hydroxide Floccs	195
14.5.4	Post-treatment Downstream of Biological Sewage Treatment Plants	195

15	Electrodialysis	197
	R.-E. Brunner	
15.1	Introduction	197
15.1.1	Electrodialysis (ED) Technology	197
15.1.2	Membrane Properties	200
15.2	Design Parameters	200
15.2.1	Limiting Current Density (Polarization)	201
15.2.2	Current Leakage	201
15.2.3	Back Diffusion	202
15.2.4	Langelier Index	202
15.2.5	Calcium Sulfate Saturation	202
15.3	Construction of ED Plants	203
15.3.1	Membrane Stack	203
15.3.1.1	Hydraulic Staging	204
15.3.1.2	Electrical Staging	206
15.3.2	Further Design Aspects	206
15.3.3	Electrodialysis (ED) Systems	207
15.3.3.1	Batch ED	207
15.3.3.2	Continuous ED	208
15.3.3.3	Continuous ED Systems with Polarity Reversal (EDR)	209
15.3.4	Summary of the Parameters for Technical Plants	211
15.4	Application of EDR	212
15.5	Special ED Process: "Electrodiaresis"	214
15.6	Summary	216
16	Ion Exchange Treatment of Sea Water	219
	G. Donath	
16.1	Introduction	219
16.2	Basic Principles of the Development of an Ion Exchange Process for High Concentration Evaporators	219
16.3	Sulfate Removal	221
16.4	Summary of Results of Sulfate Removal Using the IFP Process .	224
16.5	Behavior of Bicarbonate	225
16.6	The Removal of Hardness Ions	225
16.6.1	Magnesium	225
16.6.2	Calcium	226
16.7	Conclusions and Plans for Further Work	228

17	Conceptual Design and Economical Evaluation of a Combined MSF-RO Sea Water Desalination Plant	231
	K. Künstle, M. Moricet, K. Marquardt, and R. Nagel	
17.1	Introduction	231
17.2	Plant Description	232
17.2.1	Flow Diagram	232
17.2.2	Power Station	233
17.2.3	Reverse Osmosis Plant	235
17.2.4	Evaporator Plant	235
17.2.5	Feed Water Pretreatment Plants	236
17.2.6	Product Water Treatment Plant, Heat Rejection System and Auxiliaries	236
17.3	Economical Evaluation	237
17.3.1	Capital Recovery Costs	237
17.3.2	Fuel Costs	238
17.3.3	Operation and Maintenance Costs	238
17.3.4	Total Annual Costs	239
17.3.5	Proceeds from the Electric Power Sold	239
17.3.6	Specific Water Production Costs	240
17.4	Discussion of the Results	240
17.5	Conclusions	242
18	Disposal of Saline Waste Water Resulting from Drinking Water Production Systems	243
