

CONTENTS

	Page
Viruses in Faeces	1
Concentration of Viruses in Faecal Samples from Patients with Gastroenteritis	15
Viruses in Sewage	19
Viruses Isolated from Sewage 1974-77	27
Virus Recovery from Wastewater Using Microfiberglass Filters	31
The Appearance of Polioviruses in Wastewater During a Poliomyelitis Outbreak	35
Virus Survival in Wastewater Treatment	39
Recovery of Viruses found in Wastewater before and after Activated Sludge Treatment using a Technique of Adsorption-elution on Glass Powder	49
Virology of Wastewater Recharge of the Chalk Aquifer Part I – Hydrogeology and Sampling	53
Virology of Wastewater Recharge of the Chalk Aquifer Part II – Microbiology and Water Quality	59
Virus Survival During Sludge Treatment	65
The Effect of Selected Sludge treatment Processes on the Isolation of Enteroviruses from Wastewater Sludge	79
The Use of a Soluble Polyelectrolyte for the Isolation of Virus from Sludge	85
Virus Survival in Receiving Waters	91
Incidence of Human Enteroviruses in Water and Wastewater Systems Associated with the River Wear	109
Survival of Enteroviruses and Bacterial Indicator Organisms in the Sea	113
Virus Survival in Wastewater Treated Soils	117
Fate of Viruses Following Land Application of Sewage sludge : I. Survival and Transport Patterns in Core Studies under Natural Conditions	133
Fate of Viruses Following Land Application of Sewage Sludge : II. Field Experiments (Monitoring of Lagooned Sludge, Soil and Ground Water)	137
Viruses in Aerosols at a Wastewater Spray Irrigation Site	141
Virus Removal by Disinfection of Effluents	145
Inactivation of Viruses in Municipal Effluent by Chlorine Dioxide	165
Alternatives to Chlorine for Wastewater Disinfection	171
Disinfection of Effluents Using Ozone	175
The Effect of Free Chlorine on Parvovirus H-1	179
The Limitations of Redox Potential as an Estimate of the Virucidal Properties of Disinfectants	183
Methods for Virus Recovery from Solids	189
Surface Interactions Between Viruses and Clay Minerals and Microbes : Mechanisms and Implications	199
Recovery of Seeded Viruses from Activated Sludge	205
The Recovery of Viruses from Water : Methods and Applications	211
Methods for Virus Concentration from Water	235
Improved Electropositive Filters for Concentrating Viruses from Large Volume of Water	239
Rapid Detection of Enteroviruses in Water by a Quantitative Fluorescent Antibody Technique	247
Comparison of Primary Kidney Cells with the BGM Cell Line for the Enumeration of Enteric Viruses in Water by Means of a Tube Dilution Technique	253
Indicators, Viruses and Water Quality	257
Temperature Sensitive Coliphage in the Aquatic Environment	277
Quantitative Studies of Viruses and Conceivable Indicators in a Biological Treatment Plant	281
Outbreaks of Viral Gastroenteritis Associated with the Consumption of Shellfish	287
Epidemiology of Enteric Viral Infections	291
Index	305
