

**CONTENTS**

	Page
Preface	v
1. Source and characteristics of Industrial Wastes	1
2. Sedimentation	28
3. Flotation	52
4. Aeration and Mass Transfer	62
5. Coagulation	87
6. Adsorption	100
7. Ion Exchange	110
8. Reduction and Precipitation	118
9. Cyanide Waste Treatment	130
10. Principles of Biological oxidation	134
11. Activated Sludge	153
12. Laboratory and Pilot-plant Procedures	178
13. Trickling Filtration	188
14. Lagoons and Stabilization Basins	199
15. Aerated Lagoons	206
16. Anaerobic Decomposition	217
17. Thickening	228
18. Solids Dewatering and Disposal	236
19. Spray Irrigation	257
20. Miscellaneous Treatment Methods	262
Index	271
