
CONTENTS

	Preface	xiii
Chapter 1	Source and Characteristics of Industrial Wastewaters	1
1.1	Undesirable waste characteristics	1
1.2	Sources and characteristics of wastewaters	4
1.3	Industrial waste survey	4
1.4	Waste characteristics—estimating the organic content	13
1.5	Water reuse and in-plant waste control	21
1.6	Stormwater control	27
Chapter 2	Wastewater-Treatment Processes	33
Chapter 3	Pre- and Primary Treatment	40
3.1	Equalization	40
3.2	Neutralization	48
3.3	Sedimentation	53
3.4	Oil separation	69
3.5	Flotation	71
Chapter 4	Coagulation and Precipitation	84
4.1	Coagulation	84
4.2	Heavy metals removal	98
Chapter 5	Aeration and Mass Transfer	111
5.1	Mechanism of oxygen transfer	111
5.2	Aeration equipment	122
5.3	Air stripping of volatile organics	136

Chapter 6	Principles of Biological Oxidation	145
6.1	Organics removal mechanisms	145
6.2	The mechanisms of organic removal by biooxidation	147
6.3	Sludge-quality considerations	167
6.4	Nitrification and denitrification	173
6.5	Development of process design parameters	181
Chapter 7	Biological Wastewater-Treatment Processes	189
7.1	Lagoons and stabilization basins	189
7.2	Aerated lagoons	194
7.3	Activated sludge processes	210
7.4	Trickling filtration	232
7.5	Rotating biological contactors	239
7.6	Anaerobic decomposition	245
Chapter 8	Adsorption	263
8.1	Theory of adsorption	263
8.2	Properties of activated carbon	266
8.3	The PACT process	284
Chapter 9	Ion Exchange	291
9.1	Theory of ion exchange	291
9.2	Plating waste treatment	296
Chapter 10	Chemical Oxidation	300
10.1	Ozone	300
10.2	Hydrogen peroxide	302
10.3	Chlorine	306
10.4	Wet air oxidation	310
Chapter 11	Sludge Handling and Disposal	312
11.1	Characteristics of sludges for disposal	313
11.2	Aerobic digestion	313
11.3	Gravity thickening	317
11.4	Flotation thickening	322
11.5	Centrifugation	323
11.6	Specific resistance	330
11.7	Vacuum filtration	336
11.8	Pressure filtration	339
11.9	Sand bed drying	344
11.10	Land disposal of sludges	345
11.11	Incineration	351

Chapter 12	Miscellaneous Treatment Processes	354
12.1	Land treatment	354
12.2	Deep-well disposal	364
12.3	Membrane processes	366
12.4	Phosphorus removal	376
12.5	Filtration	381
	Bibliography	391
	Index	393
