

Contents

List of Figures.....	xiii
Foreword, <i>Charles W. Howe</i>	xvii
Acknowledgments.....	xix
1 FOUNDATIONS OF THE ATOMIC THEORY.....	1
Introduction.....	1
Early Atomism.....	1
Modern Atomism.....	4
2 AN INTRODUCTION TO NATURAL RADIOACTIVITY.....	13
Introduction.....	13
Electricity in Matter.....	13
The Discovery of Radioactivity.....	16
The Characterization of Radioactive Emanations.....	19
The Theory of Radioactive Transformations.....	28
A New Model of the Atom Emerges.....	38
Passage of Alpha, Beta, and Gamma Rays Through Matter.....	50
Measurement of Radioactivity.....	72
Detector Construction.....	81

3	MECHANISMS OF EXPOSURE TO IONIZING RADIATION...	101
	Introduction.....	101
	Measures of Exposure.....	102
	The Natural Ionizing Radiation Background.....	118
	Contributions to Ambient Exposure by Human Activities.....	127
	Environmental Transport of Radionuclides.....	139
4	BIOLOGICAL EFFECTS OF IONIZING RADIATION.....	153
	Introduction.....	153
	Some Features of Human Genetics.....	153
	Existing Frequency of Genetic and Chromosomal Disorders.....	
	Genetic Effects of Ionizing Radiation on Experimental Mammals.....	167
	Miscellaneous Human Data	
	Genetic Effects on Man..	
	Nonheritable Effects: Cancer Induction..	
	Summary of Biological Effects	
5	THE ROLE OF VALUES IN RADIATION PROTECTION POLICY.....	
	Introduction.....	
	An Important Criterion.....	200
	Naturalism.....	201
	Nonnaturalism.....	210
	Emotivism.....	217
	Prescriptivism.....	228
	Multifunctionalism.....	229

	How Do We Determine What Is Desirable in Health Policy?.....	244
	Health Policy and Obligation.....	260
	Justice in the Distribution of Health Risks....	282
	Summary.....	288
6	THE LEGAL MILIEU.....	291
	Introduction.....	291
	Early Federal Water Pollution Law.....	291
	The Clean Water Act.	
	The Safe Drinking Water Act.....	315
	Federal Surface Mining Control and Reclamation Act.....	318
	Summary.....	319
7	ONE CITY'S EXPERIENCE.....	325
	Introduction.....	325
	Concern About Liability Under Federal Water Law.....	327
	Difficulties in Anticipating Uranium Standards.....	327
	Concerns About the "Zero-Discharge" Promise.....	
	Concerns About the Mine-Dewatering Proposals.....	
	Concerns About Mill Impact.	
	Concerns About Drinking Water Decontamination.....	
	Postscript.	

8	SUMMARY: THE DETERMINANTS OF EVOLVING REGULATION.....	343
---	--	-----

APPENDIXES.

A.	Radioactive Decay Properties of the ^{238}U Series.....	
B.	Radioactive Decay Properties of the ^{40}K and ^{232}Th Series	
C.	Weighting Factors Recommended by the ICRP for Calculation of Effective Dose Equivalent....	
D.	Intake in Normal Areas of ^{238}U , ^{232}Th , and Their Decay Products.....	
E.	Average Activity Concentrations in Tissues and Annual Absorbed Doses Resulting from Internal Irradiation by Radionuclides from the Uranium-238 Subseries.....	354
F.	Average Activity Concentrations in Tissues Resulting from Internal Irradiation by Thorium-230.....	355
G.	Average Activity Concentrations in Tissues Resulting from Internal Irradiation by Thorium-232.....	356
H.	Average Activity Concentrations in Tissues and Annual Absorbed Doses Resulting from Internal Irradiation by Radium 226 and Its Short-lived Decay Products....	357
I.	Approximate Frequency of Lethal or Profoundly Debilitating Genetic Damage in a Population Exposed to Low Dose, Low-Dose- Rate, Low-LET Irradiation at a Rate of 1 Gy per Generation.....	358

INDEX.....	359
