PART I FRAMEWORK FOR PROTECTING GROUND-WATER RESOURCES

1. GROUND-WATER CONTAMINATION	2
1.1 Definitions	2
1.2 The Extent of Ground-Water Contamination	2
1.3 General Mechanisms of Ground-Water Contamination	3
1.3.1 Infiltration	3
1.3.2 Direct Migration	4
1.3.3 Interaquifer Exchange	4
1.3.4 Recharge from Surface Water	5
1.4 Source of Ground-Water Contamination	5
1.5 Movement of Contaminants in Ground Water	8
1.5.1 Contaminant Migration	8
1.5.1.1 Advection	8
1.5.1.2 Dispersion	9
1.5.1.3 Retardation	11
1.5.2 Contaminant Plume Behavior	16
1.6 Summary	18
1.7 References	18
2. GROUND-WATER QUALITY INVESTIGATIONS	22
2.1 Types of Ground-Water Quality Investigations	22
2.1.1 Regional Investigations	22
2.1.2 Local Investigations	22
2.1.3 Site Investigations	22
2.2 Conducting the Investigation	23
2.2.1 Establish the Objectives of the Study	23
2.2.2 Data Collection	23
2.2.3 Field Investigation	24
2.3 Regional Investigations	25
2.4 Local Investigations	27
2.5 Site Investigations	28
2.6 Summary	34
2.7 References	34

3. GROUND-WATER RESTORATION	35
3.1 Subsurface Effects on Contaminant Mobility	35
3.2 Physical Containment Techniques.	36
3.2.1 Removal	36
3.2.2 Barriers to Ground-Water Flow	36
3.2.3 Surface Water Controls.	37
3.2.4 Limitations of Physical Containment.	38
3.3 Hydrodynamic Controls	38
3.3.1 Well Systems	38
3.3.2 Limitations of Hydrodynamic Control.	39
3.4 Withdrawal and Treatment	39
3.4.1 Physical.	39
3.4.2 Chemical	40
3.4.3 Biological.	41
3.4.4 Limitations of Withdrawal and Treatment Techniques	42
3.5 In-Situ Treatment Techniques	43
3.5.1 Chemical/Physical	43
3.5.2 Biodegradation	44
3.5.2.1 Natural Biological Activity in the Subsurface	44
3.5.2.2 Enhanced Bioremediation—Basic Principles	46
3.5.2.3 Enhanced Bioremediation—Current Practice.	46
3.6 Treatment Trains.	47
3.7 Institutional Limitations on Controlling Ground-Water Pollution	48
3.8 References.	49

**PART II
SCIENTIFIC AND TECHNICAL BACKGROUND FOR ASSESSING AND
PROTECTING THE QUALITY OF GROUND-WATER RESOURCES**

4. BASIC HYDROGEOLOGY.	52
4.1 Precipitation.	52
4.1.1 Seasonal Variations in Precipitation	52
4.1.2 Types of Precipitation	52
4.1.3 Recording Precipitation	53
4.2 Infiltration.	53
4.3 Surface Water	54
4.3.1 Stream Types	55
4.3.2 Stream Discharge Measurements and Records	57
4.4 The Relation Between Surface Water and Ground Water	57
4.4.1 The Regional System	59
4.4.2 Bank Storage	59
4.4.3 Master Depletion Curve	60
4.4.4 Separating a Hydrograph by Graphical Methods	60
4.4.5 Separating a Hydrograph by Chemical Methods.	60
4.4.6 Ground-Water Rating Curves	62
4.4.7 Determining Regional Ground-Water Recharge Rates	63
4.4.8 Seepage Measurements	63
4.4.9 Maps of Potential Ground-Water Yield.	65
4.4.10 Quality as an Indicator	65
4.4.11 Temperature as an Indicator	70
4.4.12 Flow Duration Curves	70
4.5 Ground Water.	74
4.5.1 The Water Table	74
4.5.2 Aquifers and Aquitards.	74

4.5.3	Porosity and Hydraulic Conductivity	75
4.5.4	Hydraulic Gradient	75
4.5.5	Potentiometric Surface Map	75
4.5.6	Calculating Ground-Water Flow	77
4.5.7	Interstitial Velocity	79
4.5.8	Transmissivity and Storativity	80
4.5.9	Water-Level Fluctuations	81
4.5.10	Cone of Depression	81
4.5.11	Specific Capacity	81
4.6	References	83
5.	MONITORING WELL DESIGN AND CONSTRUCTION	86
5.1	Ground-Water Monitoring Program Goals	86
5.2	Monitoring Well Design Components	87
5.2.1	Location and Number	87
5.2.2	Diameter	87
5.2.3	Casing and Screen Material	88
5.2.4	Screen Length and Depth of Placement	90
5.2.5	Sealing Materials and Procedures	91
5.2.6	Development	93
5.2.7	Security	94
5.3	Monitoring Well Drilling Methods	96
5.3.1	Geologic Samples	99
5.3.2	Case History	99
5.4	Summary	104
5.5	References	104
6.	GROUND-WATER SAMPLING	108
6.1	Introduction	108
6.1.1	Background	108
6.1.2	Information Sources	108
6.1.3	The Subsurface Environment	109
6.1.4	The Sampling Problem and Parameter Selection	109
6.2	Establishing a Sampling Point	111
6.2.1	Well Design and Construction	111
6.2.2	Well Drilling	111
6.2.3	Well Development, Hydraulic Performance and Purging Strategy	112
6.2.3.1	Well Development	112
6.2.3.2	Hydraulic Performance of Monitoring Wells	113
6.2.3.3	Well Purging Strategies	114
6.2.3.4	Sampling Materials and Mechanisms	114
6.3	Elements of the Sampling Protocol	116
6.3.1	Water-Level Measurement	116
6.3.2	Purging	119
6.3.3	Sample Collection and Handling	119
6.3.4	Quality Assurance/Quality Control	121
6.3.5	Sample Storage and Transport	123
6.4	Summary	124
6.5	References	124
7.	GROUND-WATER TRACERS	128
7.1	General Characteristics of Tracers	128
7.2	Public Health Considerations	128
7.3	Direction of Water Movement	128

7.4	Travel Time	128
7.5	Sorption of Tracers and Related Phenomena	129
7.6	Hydrodynamic Dispersion and Molecular Diffusion	129
7.7	Practical Aspects	130
7.7.1	Planning a Test	130
7.7.2	Types of Tracer Tests	131
7.7.2.1	Single-Well Techniques	131
7.7.2.2	Two-Well Techniques	134
7.7.3	Design and Construction of Test Wells	135
7.7.4	Injection and Sample Collection	135
7.7.5	Interpretation of Results	136
7.8	Types of Tracers	137
7.8.1	Water Temperature	137
7.8.2	Solid Particles	138
7.8.3	Ions	140
7.8.4	Dyes	140
7.8.5	Some Common Nonionized and Poorly Ionized Compounds	143
7.8.6	Gases	143
7.9	References	146
8.	THE USE OF MODELS IN MANAGING GROUND-WATER PROTECTION PROGRAMS	150
8.1	The Utility of Models	150
8.1.1	Introduction	150
8.1.2	Management Applications	150
8.1.3	Modeling Contamination Transport	151
8.1.4	Categories of Models	152
8.2	Assumptions, Limitations, and Quality Control	152
8.2.1	Physical Processes	153
8.2.1.1	Advection and Dispersion	153
8.2.1.2	Complicating Factors	154
8.2.1.3	Considerations for Predictive Modeling	155
8.2.2	Chemical Processes	155
8.2.2.1	Chemical/Electronic Alterations	155
8.2.2.2	Nuclear Alterations	155
8.2.2.3	Chemical Associations	156
8.2.2.4	Surface Interactions	156
8.2.3	Biological Processes	157
8.2.3.1	Surface Water Model Analogy	157
8.2.3.2	Ground-Water Biotransformations	157
8.2.3.3	A Ground Water Model	158
8.2.4	Analytical and Numerical Models	158
8.2.5	Quality Control	159
8.3	Applications in Practical Settings	160
8.3.1	Stereotypical Applications	160
8.3.2	Real-World Applications	161
8.3.2.1	Field Example No. 1	161
8.3.2.2	Field Example No. 2	162
8.3.3	Practical Concerns	164
8.4	Liabilities, Costs, and Recommendations for Managers	168
8.4.1	Potential Liabilities	168
8.4.2	Economic Considerations	171
8.4.3	Managerial Considerations	181
8.5	References	183

9. BASIC GEOLOGY	186
9.1 Geologic Maps and Cross-Sections.	186
9.2 Ground Water in Igneous and Metamorphic Rocks.	190
9.3 Ground Water in Sedimentary Rocks.	190
9.4 Ground Water in Unconsolidated Sediments.	192
9.5 Relationship Between Geology, Climate, and Ground-Water Quality	192
9.6 Minerals.	196
9.6.1 Carbonates, Sulfates, and Oxides	196
9.6.2 Rock-Forming Silicates.	196
9.6.3 Ores	197
9.7 Rocks	197
9.7.1 Igneous Rocks	197
9.7.2 Metamorphic Rocks	197
9.7.3 Sedimentary Rocks	198
9.8 Weathering.	198
9.8.1 Mechanical Weathering	198
9.8.2 Chemical Weathering	198
9.9 Erosion and Deposition	199
9.9.1 Waterborne Deposits	199
9.9.2 Windborne Deposits.	199
9.9.3 Glacial Deposits	199
9.10 Geologic Structure.	201
9.10.1 Folding	201
9.10.2 Fractures	201
9.11 Geologic Time	202
9.11.1 Rock Units.	202
9.11.2 Time and Time-Rock Units	202
9.12 References.	203
