

## CONTENTS

	Page
The reclamation of sewage effluents for domestic use	1
The inactivation of enteroviruses in sewage by chlorination	37
The role of aeration in the activated sludge process	53
Determination of sludge activity – a possibility of controlling activated sludge plants	83
Nonionic detergents and related substances in British waters	103
Pollution dynamics in biological treatment plants	117
Aerobic sludge stabilization in sewage treatment plants	143
Effects of sludge conditioning with lime on dewatering	165
Modelling of oxygen transfer processes in aeration tanks	195
Aspects concerning the treatment of wastewaters from oil refineries in Romania	229
Release of soluble ortho-phosphate in the activated sludge process	261
Investigations on phenolic wastes treatment in an oxidation ditch	285
Transient loading effects in the activated sludge process	309
The role of enzymes in the contact stabilization process	353
Hydraulic and removal efficiencies in sedimentation basins	381
Chairmen's summary	415
