

CONTENTS

	Page
Chapter 1 Sources of Water Pollution	1
Part I Microbial Changes Induced by Inorganic Pollutants	
Chapter 2 The Role of Phosphorus in Eutrophication	11
Chapter 3 The Role of Nitrogen in Eutrophic Processes	43
Chapter 4 The Microbiology of Mine Drainage Pollution	69
Part II Microbial Changes Induced by Organic Pollutants	
Chapter 5 Energetics of Organic Matter Degradation	91
Chapter 6 Stream Purification	119
Chapter 7 Biodegradation of Hydrocarbons in the Sea	153
Chapter 8 Approaches to the Synthesis of Soft Pesticides	173
Part III Intestinal Pathogens as Pollutants	
Chapter 9 Water-Borne Pathogens	207
Part IV Pollution and Community Ecology	
Chapter 10 Pollution Controlled changes in Algal and Protozoan Communities	245
Chapter 11 Ecological Control of Microbial Imbalances	273
Part V Microbial Parameters of Pollution	
Chapter 12 New Approaches to Assessment of Microbial Activity in Polluted Waters	291
Chapter 13 Biochemical Oxygen Demand	305
Chapter 14 The Coliform count as a Measure of water Quality	333
Chapter 15 The Detection of Enteric Viruses in the Water Environment	347
Part VI Microbiological Approaches to Pollution Control	
Chapter 16 A Critical View of waste Treatment	365
Chapter 17 New Approaches to Water Quality control in Impoundments	389
Index	413
