

CONTENTS

	Page
Introduction	1
Performance of Portable Automatic Wastewater Composite Sample Collectors	2
Compositor Inventory	3
Incidence of Compositor Malfunction	3
Installation of Sampling Equipment	6
Discussion	13
Conclusion	16
An Assessment of Automatic Sewer Flow Samplers	19
General Flow Characteristics	20
Purposes and Requirements for a Sampling Program	23
Desirable Equipment Characteristics	26
Commercially Available Automatic Sampling Equipment	28
Field Experience with Samplers in Storm and Combined Sewers	31
State-of-the Art Assessment	32
An Automated Remote Marshland Water Sampling Station	37
Design Considerations	37
Prototype sampling Station	39
Test Program	41
Operational Procedures	46
Discussion	46
Concluding Remarks	47
Industrial Experience with On-Line Instrumentation for Water Pollution Monitoring	52
Discussion	53
Cooling Water	53
Process Water Sewers	61
Terminal Waste Treatment Plants	66
Influent to Primary Treatment	66
Primary Treatment	66
Secondary Treatment	69
Conclusions	71
Monitoring of Wastewater Discharges Aboard Navy Ships	73
Background	73
Wastewater Survey	75
Flow Monitoring	78
Sample Collection	82
Laboratory Analysis	85
Data Management	87
Conclusions	88
Continuous Liquid-Liquid Extraction of Organic Pesticides from Aqueous Solutions	90
Liquid-liquid Extraction Process	93
Continuous Liquid-Liquid Extraction	93
Organic Pesticides Analyses by LLE	98
Method of Approach	98
Experimental	100
Results	103
Discussion	106

A Monitor for the Continuous Measurement of Suspended Solids in Liquids	108
Developmental Monitor	109
Design of Developmental Instrument	110
Experimental Results	115
Discussion	115
Conclusions	117
Present Status of Development	118
