

CONTENTS

PAPER NO.	TITLE
1-2Research - Key to Quality Water Service in the 80's
1-4Remarks by Senator Hubert H. Humphrey American Water Works Conference
2-1Research Needs in Distribution Systems
2-2Providing Uninterrupted Service to Customers
2-3aWestmoreland Co., Reconditions Backbone of System
2-3cLoss in Capacity of a Large Diameter Water Pipeline
3-1Wastewater Reuse as a Water Resource - The Denver Experience
3-2aDrinking Reclaimed Wastewater, Denver - A Case Study
3-2bDrinking Reclaimed Wastewater - As viewed by a Health Agency
3-2dPublic Attitudes on Drinking Reclaimed Waste Water
4-1Budget Blues from Uncontrolled Inflation
4-3Purchasing Problems from Shrinking Dollars and Material Shortages
4-4Applications of the Management Audit and Status of the Institute for Water and Wastewater Utility Management
5-1Report of the Priority Assessment Committee
5-2Waterborne Disease Outbreaks in the United States 1971-1974
5-3Recent Experiences in Waterborne Disease at the Center for Disease Control
5-5Lead and Other Trace Metals in Drinking Water in the Boston Metropolitan Area
7-1Land Use Planning as a Tool for Controlling Water Demands in a Distribution System
7-2Distribution System Design as Viewed by a regulatory Agency
7-3Parameters for Determining Adequacy of Storage Capacity for Large and Small Systems on the Basis of Peak Demands and Fire Flow Requirements
7-4Practical Applications for Design of Thrust Blocks and Tied Joints
8-2An Innovative Approach to Rate-Making to Achieve Equity and Promote Conservation
8-3aPublic Education Campaigns to Cut Water Use (Waste Reduction)
8-3bPublic Education Campaigns to Cut Water Use
8-4Drip Irrigation
9-1Management Division's Priority Research Needs
9-2Seattle's Regional Water Resource Management and Computer Application
9-3Environmental Assessment Studies as Related to Community Water Supply Services
9-4Management Concepts in Wholesale Water
10-1Health Aspects of Asbestos in Drinking Water
10-2aDirect Filtration of Lake Superior Water for Asbestiform-Solids Removal
10-2cDiatomite Filters for Asbestiform Fiber Removal From Water
11-2The Working Wife and Curb Meter Reading Problems Solved by AMR Systems Standards
11-3aA New Standard for Flanged Iron and Ductile Iron Pipe
11-3bSomething New for Pipe - Paint for Aboveground Steel
11-3cAsbestos-Cement Transmission Pipe

- 12Force Account vs. Contracted Construction - Which is Better?
- 13-1 . . .The Water and Wastewater Technical School of Neosho
- 13-4 . . .Better Salaries for Better Utility Men
- 14-2a . . .Direct Digital Control of the Iowa City Water Treatment Plant
- 14-2c . . .Direct Digital Control of the Iowa City Water Treatment Plant
- 14-2d . . .Direct Digital Control of the Iowa City Water Treatment Plant
- 14-3 . . .A New Alkalinity Monitor
- 14-4 . . .Colloid-Chemical Parameters for Coagulant Dose Control
- 14-5 . . .Water Clarification by Flotation
- 15-1 . . .Water Filtration - A Key Element in Waste Water Treatment in the Petroleum Industry
- 15-2 . . .Utility/Industry Joint Effort to Use Reclaimed Water For Cooling Water
- 15-3 . . .Industrial Reclamation Reduced Demand for Utility Water
- 15-4 . . .Research on Process Modification for Water Conservation in Industry
- 17-2 . . .Hydraulic & Clarification Performance of a Sedimentation Basin at the Chicago Central District Filtration Plant
- * 17-3 . . .Pretreatment for Direct Filtration
- 17-4 . . .An Economic Analysis of the Capping of Rapid Sand Filters With Anthracite
- 17-5 . . .Some Problems with Aluminum Recovery and Reuse Water Treatment Plant Alum Sludge
- 17-6 . . .Algal Nutrients: Sources and Patterns of Flow in the Occoquan Watershed
- 17-7 . . .Recreational Impacts on the Water Quality of Mountain Streams
- 17-8 . . .Models for the Optimal Timing and Scale of Water Systems
- 17-9 . . .An Index for Determining the Quality of a Water Supply
- 18-1 . . .Low cost Methods of Treating Water in Developing Countries
- 18-2 . . .The Effectiveness of Rapidly Operated Slow Filters and a New Cleaning Process
- 19-4 . . .The Incredible Obstacles to Water Utility Employment
- 20-2 . . .Cold Weather Operation of Elevated Tanks
- 20-3 . . .Surface Water Treatment in Cold Weather
- 20-4a . . .Leak Detection Problems Under Cold Weather Conditions
- 20-4b . . .Winter Water Main Break Operations in Milwaukee
- 20-4c . . .Frozen Water Services
- 20-4d . . .Emergency Distribution System Operations in Cold Weather
- 22-2 . . .Wastewater Effluent and Potable Water Chlorination: Relationship to the Trace Organics Problem
- 22-3 . . .Determination of Carbon Chloroform Extract (CCE-m) in Wisconsin Water Supplies
- 22-4 . . .Organic Carbon Contents of Water Supplies
- 22-5 . . .Removing Organic Color From Groundwaters
- 22-6 . . .Biologically Mediated Deterioration of Water Quality in Distribution Systems
- 22-7 . . .An Investigation of the Applicability of Ferrate Ion for Disinfection
- 23a . . .New Insights on the Strength of Polyethylene Piping
- 23b . . .Uses of Plastics in the Distribution System
- 23c . . .The Use of Plastics in Water Works Valves and Hydrants
- 24a . . .Practical Considerations in the Avoidance and Defense of Class Action Suits
- 24b . . .Class Actions Against Water Utilities: Alive and Well
- 25d-1 . . .Effects of Effluent Guidelines on Public Water Supply Industry
- * 25d-11 . . .Alum Sludge Disposal -- Problems but Success

- 25e. . . . Consultant Viewpoints, Effluent Guidelines for Water Treatment Plant Waste Disposal
- 26a. . . . Environmental Impact Statements - Effect on Water Resources Projects
- 26b. . . . Responding to the Full Intent of the National Environmental Policy Act
- 26d. . . . Applying Environmental Impact Statements to Metropolitan Area Water Resource Projects
- 27a. . . . Turbidity Standards
- 27b-1. . . . The Costs of Meeting the New Water Quality Standards for Total Organics and Pesticides
- 27b-ii . . . The Costs of Meeting the New Water Quality Standards - Organics and Pesticides
- 27c. . . . In-Plant Quality Control Costs
- 28b. . . . Turbidity - A Relationship Between the Types of Particulate Matter and Measured Turbidity
- 28c. . . . Current Capability and Needs in Particle Counting and Identification--The Variances in Analysis by Several Laboratories
- 28d. . . . Analysis of Particulate Contaminants in Water
- 30-1 . . . Innovations in Pressure Reducing Stations on Large Diameter Pipelines
- 30-2 . . . Making the Central City's Distribution System a Regional Facility
- 30-3 . . . Criteria for Sizing Service Lines and Meters
- 30-4a. . . Experiences with New Grading Schedule - Panel Discussion
- 30-4b. . . Experiences with New Grading Schedule
- 30-4d. . . Remarks Prepared as a Commentary for Panel Discussion on Experiences with New Grading Schedule
- 31-1 . . . Organization of your Utility by Labor
- 31-2 . . . Labor Contracts and the Law
- 31-3 . . . Living with Organized Labor - Is It Different Today?
- 31-4 . . . Arbitration of Disputes in the Water Utility Industry
- 32-1 . . . Disinfection: A Committee Report
- 32-2 . . . Chlorine Residual Measuring Cell: The HOCl Membrane Electrode
- 32-4 . . . Formation of and Occurrence of Haloforms in Drinking Water
- 33-1 . . . The Foss Reservoir 3MGD Demineralization Plant Three Months After Startup
- 33-2 . . . Salinity in the Colorado River Basin
- 33-3 . . . U. S.-Mexico Salinity Problems Current Status of 100 MGD Desalting Plant
- 33-4 . . . Desalting Applications in California - An Overview
- 33-5 . . . Current Trends in Desalting R & D Programs and Desalting Applications
- 34 . . . Safe Drinking Water Act Program
