PREFACE . . . . .	v
1. IMPURITIES IN NATURAL WATERS AND THEIR EFFECTS . . . . .	1
1.1. Types of impurity . . . . .	1
1.2. Properties . . . . .	2
1.2.1. Colour . . . . .	2
1.2.2. Hardness . . . . .	2
1.2.3. Alkalinity . . . . .	3
1.2.4. Dissolved solids content . . . . .	5
1.3. Expression of analytical results . . . . .	5
1.4. Types of natural water . . . . .	7
1.5. Effects of impurities . . . . .	10
1.5.1. Effects due to materials in suspension and to colour . . . . .	10
1.5.2. Effects due to living organisms . . . . .	10
1.5.3. Excessive soap consumption . . . . .	11
1.5.4. Formation of mineral deposits . . . . .	11
1.5.5. Corrosion . . . . .	14
1.5.6. Foaming and carry-over . . . . .	20
2. PRECIPITATION PROCESSES IN WATER TREATMENT—PRINCIPLES . . . . .	22
2.1. Lime-soda process . . . . .	22
2.2. Hot lime-soda/sodium phosphate process . . . . .	36
2.3. Silica removal . . . . .	37
2.4. Removal of iron and manganese . . . . .	39
2.5. Use of barium salts . . . . .	40
2.6. Analytical control . . . . .	40
3. PRECIPITATION PROCESSES IN WATER TREATMENT—PLANT . . . . .	42
3.1. Batch softening plant . . . . .	42
3.2. Continuous softening plant . . . . .	44
3.2.1. Cold softening plant . . . . .	45
3.2.2. Hot softening plant . . . . .	51
3.3. Ancillary equipment . . . . .	55
3.3.1. Heaters . . . . .	55
3.3.2. Chemical preparation tank . . . . .	58
3.3.3. Measuring and apportioning gear . . . . .	59
3.3.4. Equipment for collecting softened water . . . . .	67
3.3.5. Equipment for sludge removal . . . . .	71
3.3.6. Filters . . . . .	72
3.4. Sludge disposal . . . . .	73
3.5. Operating experience with precipitation softening plant . . . . .	79

	PAGE
4. ION-EXCHANGE PROCESSES IN WATER TREATMENT . . . . .	80
4.1. Theoretical background . . . . .	80
4.1.1. Exchange reactions . . . . .	81
4.1.2. Equilibria . . . . .	83
4.1.3. Kinetics . . . . .	83
4.1.4. Operating characteristics . . . . .	84
4.2. Materials . . . . .	87
4.2.1. Cation-exchange materials . . . . .	88
4.2.2. Anion-exchange materials . . . . .	91
4.2.3. Special materials . . . . .	93
4.2.4. Physical properties . . . . .	94
4.2.5. Commercial materials . . . . .	96
4.3. Processes . . . . .	106
4.3.1. Base exchange . . . . .	106
4.3.2. Precipitation softening followed by base exchange . . . . .	107
4.3.3. Demineralization and silica removal . . . . .	109
4.3.4. Control of alkalinity . . . . .	115
4.3.5. Other processes . . . . .	119
4.4. Plant operation . . . . .	117
4.5. Plant . . . . .	121
4.6. Operating difficulties . . . . .	132
4.7. Laboratory testing of ion-exchange materials . . . . .	134
4.8. Continuous ion exchange . . . . .	134
4.9. Electrodialysis desalting . . . . .	139
5. EVAPORATION . . . . .	141
5.1. Types of evaporator . . . . .	142
5.1.1. Tubular evaporators . . . . .	142
5.1.2. Evaporators with special heating elements . . . . .	145
5.1.3. Flash evaporators . . . . .	147
5.2. Steam economy . . . . .	149
5.2.1. Multiple-effect evaporation . . . . .	149
5.2.2. Vapour recompression . . . . .	150
5.3. Scaling . . . . .	152
5.4. Scale prevention . . . . .	153
5.5. Scale removal . . . . .	155
5.6. Vapour contamination . . . . .	156
6. CHOICE OF WATER-SOFTENING PROCESS . . . . .	158
7. BOILER SYSTEMS—OPERATING PROBLEMS ON THE WATER SIDE . . . . .	164
7.1. Types of boiler . . . . .	164
7.2. Types of steam-plant cycle . . . . .	167
7.3. Aims of water treatment . . . . .	168
7.4. Methods of treatment . . . . .	169
7.4.1. External softening followed by conditioning . . . . .	169
7.4.2. Internal treatment . . . . .	171
7.5. Operating pressures . . . . .	171

	PAGE
8. SCALES AND DEPOSITS IN BOILER SYSTEMS . . . . .	172
8.1. Scales and deposits in pre-boiler equipment and boilers . . . . .	172
8.1.1. Chemical nature of deposits . . . . .	173
8.1.2. Physical form of deposits . . . . .	174
8.1.3. Mechanism of formation . . . . .	175
8.1.4. Causes of deposit formation . . . . .	178
8.1.5. Effects of deposits . . . . .	178
8.2. Prevention of scaling and deposition in boilers . . . . .	179
8.2.1. Conditioning . . . . .	180
8.2.2. Oil removal . . . . .	185
8.3. Removal of scales and deposits . . . . .	188
8.3.1. Mechanical methods . . . . .	188
8.3.2. Acid cleaning . . . . .	188
8.3.3. Use of other chemicals . . . . .	190
8.3.4. Cleaning new boilers . . . . .	191
8.4. Deposits in superheaters and turbines . . . . .	192
8.5. Steam contamination . . . . .	193
8.5.1. Carry-over . . . . .	193
8.5.2. Direct solution in steam . . . . .	198
8.5.3. Steam sampling and purity measurement . . . . .	200
8.5.4. Removal of deposits . . . . .	211
9. CORROSION IN BOILER SYSTEMS . . . . .	212
9.1. Corrosion in pre-boiler equipment . . . . .	212
9.2. Corrosion in boilers . . . . .	214
9.2.1. Effect of boiler water pH value . . . . .	214
9.2.2. Effect of dissolved oxygen . . . . .	214
9.2.3. Effect of local concentrations of boiler salts . . . . .	215
9.2.4. Effect of copper compounds . . . . .	216
9.3. Prevention of corrosion of boilers in service . . . . .	217
9.3.1. Control of pH value of boiler water . . . . .	217
9.3.2. Use of high-purity water . . . . .	218
9.3.3. Deoxygenation . . . . .	219
9.3.4. Recirculation of boiler water . . . . .	224
9.4. Prevention of corrosion of idle boilers . . . . .	226
9.4.1. Boilers under construction . . . . .	226
9.4.2. Standing periods . . . . .	226
9.5. Caustic cracking . . . . .	228
9.5.1. Mechanical methods of prevention . . . . .	230
9.5.2. Chemical methods of prevention . . . . .	231
9.5.3. Choice of chemical treatment . . . . .	235
9.6. Corrosion by condensate . . . . .	236
9.6.1. Gaseous impurities in steam . . . . .	236
9.6.2. Effect of dissolved carbon dioxide . . . . .	236
9.6.3. Effect of dissolved oxygen . . . . .	238
9.7. Prevention of corrosion in condensate systems . . . . .	238
9.7.1. Plant design . . . . .	239

	PAGE
9.7.2. Reduction of content of gaseous impurities . . . . .	239
9.7.3. Use of volatile amines . . . . .	239
10. RECOMMENDED WATER CHARACTERISTICS FOR BOILERS, AND TREATMENT CALCULATIONS . . . . .	244
10.1. Recommended characteristics of feed-water and boiler water . . . . .	245
10.2. Choice of complete boiler-water treatment process . . . . .	246
11. PRACTICAL ASPECTS OF BOILER FEED-WATER TREATMENT . . . . .	261
11.1. Equipment . . . . .	261
11.1.1. Chemical preparation tanks . . . . .	261
11.1.2. Equipment for feeding chemicals . . . . .	262
11.1.3. Equipment for controlling blowdown . . . . .	263
11.2. Choice between continuous and slug feeding of treatment chemicals . . . . .	266
11.3. Analytical control . . . . .	266
11.4. Boiler inspections . . . . .	275
12. INTERNAL TREATMENT FOR STATIONARY BOILERS . . . . .	277
12.1. Principles of internal treatment . . . . .	277
12.2. Choice between internal and external treatment . . . . .	278
12.3. Use of sodium carbonate or hydroxide . . . . .	278
12.4. Use of phosphate . . . . .	281
12.5. Feed system . . . . .	282
12.6. Method of feeding chemicals . . . . .	282
12.7. Equipment for feeding chemicals . . . . .	283
12.8. Control of treatment . . . . .	286
12.8.1. Testing schedule . . . . .	288
12.8.2. Adjustment of treatment . . . . .	289
13. TREATMENT FOR LOCOMOTIVE BOILERS . . . . .	291
13.1. Corrosion . . . . .	291
13.2. Deposition . . . . .	292
13.3. Priming . . . . .	293
13.4. Boiler-water composition . . . . .	293
13.5. Methods of applying treatment . . . . .	293
13.6. Proprietary treatment processes . . . . .	296
13.7. Blowdown . . . . .	300
13.8. Washing-out . . . . .	303
13.9. Analytical control . . . . .	305
13.10. Treatment for auxiliary equipment . . . . .	305
14. TREATMENT FOR MARINE BOILERS . . . . .	307
14.1. Prevention of scaling and corrosion . . . . .	307
14.2. Boiler-water composition . . . . .	308
14.3. Choice of method of treatment . . . . .	309
14.4. Application of treatment . . . . .	311
14.5. Control of treatment . . . . .	311

	PAGE
15. COOLING-WATER TREATMENT . . . . .	313
15.1. Cooling-water systems . . . . .	313
15.1.1. Once-through systems . . . . .	314
15.1.2. Open recirculating systems . . . . .	314
15.1.3. Closed recirculating systems . . . . .	321
15.2. Corrosion prevention . . . . .	321
15.2.1. Control of pH value . . . . .	322
15.2.2. Calcium carbonate protection . . . . .	323
15.2.3. Inhibitors . . . . .	325
15.2.4. De-aeration . . . . .	329
15.2.5. Deterioration of wood . . . . .	329
15.2.6. Choice of treatment for corrosion prevention . . . . .	330
15.3. Scaling and deposition . . . . .	331
15.3.1. Calcium carbonate scale . . . . .	331
15.3.2. Calcium sulphate scale . . . . .	333
15.3.3. Basic calcium phosphate scale . . . . .	333
15.4. Methods of cleaning coolers . . . . .	334
15.5. Analytical control . . . . .	335
15.6. Equipment . . . . .	336
16. CONTROL OF ORGANIC GROWTHS . . . . .	337
16.1. Living organisms in water . . . . .	338
16.2. Chemistry of chlorination . . . . .	339
16.3. Biological action of chlorine . . . . .	342
16.4. Use of chlorination . . . . .	345
16.5. Choice of chlorinating agent . . . . .	349
16.6. Equipment for liquid chlorine . . . . .	350
16.7. Equipment for hypochlorite . . . . .	351
16.8. Agents other than chlorine . . . . .	353
16.9. Ultra-violet light . . . . .	354
17. CLARIFICATION AND COLOUR REMOVAL . . . . .	355
17.1. Principles of settlement . . . . .	356
17.1.1. Settling velocity . . . . .	356
17.1.2. Effect of prolonged storage . . . . .	358
17.1.3. Duration of storage . . . . .	359
17.2. Principles of coagulation . . . . .	359
17.3. Coagulants . . . . .	361
17.3.1. Aluminium compounds . . . . .	362
17.3.2. Iron compounds . . . . .	364
17.3.3. Activated silica sol . . . . .	365
17.3.4. Bentonite . . . . .	367
17.3.5. Polyelectrolytes . . . . .	371
17.3.6. Choice of coagulant . . . . .	371
17.4. Clarification in precipitation softening . . . . .	371
17.5. Equipment for clarification . . . . .	371
17.5.1. Mixers . . . . .	372

	PAGE
17.5.2. Flocculators . . . . .	372
17.5.3. Settling and sedimentation tanks . . . . .	373
17.6. Filtration . . . . .	377
17.6.1. Gravity filters . . . . .	378
17.6.2. Pressure filters . . . . .	380
17.6.3. Backwashing . . . . .	382
17.6.4. Choice of type of filter . . . . .	384
17.6.5. Other filter media . . . . .	384
17.7. Other methods of colour removal . . . . .	384
17.8. Choice of method . . . . .	385
17.9. The choice of a coagulation process: laboratory tests . . . . .	386
17.10. Operating difficulties . . . . .	389
APPENDIX : PHYSICO-CHEMICAL DATA . . . . .	391
List of symbols . . . . .	393
A.1. Introduction . . . . .	395
A.2. The physical properties of pure water and steam . . . . .	395
A.3. The use of a Mollier diagram . . . . .	398
A.4. General properties of aqueous solutions . . . . .	401
A.5. Ionization product and ionization exponent for water . . . . .	407
A.6. The solubilities of air, oxygen and nitrogen in water . . . . .	408
A.7. The system $\text{Cl}_2\text{-H}_2\text{O}$ . . . . .	410
A.8. The system $\text{CO}_2\text{-H}_2\text{O}$ . . . . .	414
A.9. Solubility of sparingly-soluble salts and hydroxides in water . . . . .	418
A.10. The systems $\text{Ca(OH)}_2\text{-H}_2\text{O}$ and $\text{CaCO}_3\text{-CO}_2\text{-H}_2\text{O}$ . . . . .	421
A.11. The system $\text{MgO-CO}_2\text{-H}_2\text{O}$ . . . . .	427
A.12. The solubility in water of the carbonates and bicarbonates of lead . . . . .	429
A.13. The solubility in water of calcium and magnesium phosphates . . . . .	430
A.14. The solubility of calcium sulphate in water and in solutions of salts . . . . .	431
A.15. The solubility of silica and of salts in high-pressure steam . . . . .	435
A.16. The system $\text{Na}_2\text{O-CO}_2\text{-H}_2\text{O}$ . . . . .	444
A.17. The sodium phosphates . . . . .	448
A.18. The solubility in water of soluble substances of interest in water treatment . . . . .	449
A.19. Hydrazine . . . . .	449
A.20. Octadecylamine (stearylamine) . . . . .	453
A.21. Ammonia, cyclohexylamine and morpholine . . . . .	453
A.22. Application of Debye-Hückel equation to equilibria in dilute solutions to correct for departure from ideal behaviour . . . . .	457
