	Page
Preface	ix
1. Introduction	1
1.1 The Engineer's Role	2
2. Characteristics of Waters and Wastewaters	6
2.1 Physical Characteristics	6
2.2 Chemical Characteristics	8
2.3 Biological Characteristics	13
2.4 Typical Characteristics	13
3. Basic Analysis	17
3.1 Gravimetric Analysis	17
3.2 Volumetric Analysis	18
3.3 Colorimetric analysis	21
3.4 Electrodes	23
3.5 Significance of Results	24
3.6 Sampling	25
3.7 Remote Monitoring	25
4. Basic Microbiology and Ecology	27
4.1 Types of Metabolism	27
4.2 Types of Micro-organism	28
4.3 Plants	28
4.4 Animals	32
4.5 Taxonomy	33
4.6 Microbiological Examination	34
4.7 Ecological Principles	36
5. Biological oxidation of Organic Matter	40
5.1 Nature of organic Matter	40
5.2 Enzyme Reactions	42
5.3 Nature of Biological growth	42
5.4 Oxygen Demand in Aerobic Oxidation	44
5.5 Anaerobic Oxidation	50
6. River Pollution	53
6.1 Self-purification	55
6.2 Toxic materials	61
6.3 Overall Effects of Pollution	64
6.4 Groundwater pollution	67
6.5 Control of River Pollution	68
7. Quantities of Water and Wastewater	73
7.1 Water Demand	73
7.2 Population growth	75
7.3 Wastewater Flow	76
7.4 Variations in Flow	78
8. Introduction to Treatment Processes	81
8.1 Methods of Treatment	83
8.2 Preliminary Treatment	83

9.	Sedimentation	86
	9.1 Theory of Sedimentation	86
	9.2 The Ideal Sedimentation Basin	89
	9.3 Measurement of Settling Characteristics	91
	9.4 Efficiency of Sedimentation Tanks	94
	9.5 Types of Sedimentation Tank	97
	9.6 Flotation	98
10.	Coagulation	100
	10.1 Colloidal Suspension	100
	10.2 Flocculation	101
	10.3 Coagulation	104
	10.4 Mechanism of Coagulation	107
11.	Flow Through Porous Media	109
	11.1 Hydraulics of Filtration	109
	11.2 Filter Clogging	112
	11.3 Filter Washing	113
	11.4 Types of Filter	115
12.	Aerobic Biological Oxidation	119
	12.1 Principles of Biological Oxidation	119
	12.2 Types of Aerobic Oxidation Plant	122
	12.3 Percolating Filter	122
	12.4 Activated Sludge	126
	12.5 Oxidation pond	131
13.	Anaerobic Biological Oxidation	135
	13.1 Principles of Anaerobic Oxidation	135
	13.2 Applications of Digestion	136
	13.3 Operation of Digesters	138
14.	Disinfection	141
	14.1 Theory of Disinfection	141
	14.2 Chlorine	142
	14.3 Ozone	145
	14.4 Other Disinfectants	145
15.	Chemical Treatment	147
	15.1 Chemical Precipitation	147
	15.2 Ion Exchange	152
	15.3 Adsorption	154
16.	Sludge Dewatering and Disposal	158
	16.1 Principles of Dewatering	158
	16.2 Methods of Dewatering	160
	16.3 Disposal	163
17.	Tertiary Treatment and Water Reclamation	166
	17.1 Tertiary Treatment	166
	17.2 Water Reclamation	170
	17.3 Removal of Impurities not Amenable to Conventional Treatment	175
	17.4 Practical Applications of Water Reclamation	181
	17.5 Physico-Chemical Treatment of Wastewater	183
18.	Treatment Plant Design	186
	18.1 Water Treatment	186
	18.2 Sewage Treatment	189
	18.3 Optimized Design	193
	Index	197
