| Introduction | vii |
| Use of Water in the British Chemical Industry | |
| The Chemical industry's growing need for water | 1 |
| Sources of supply of water | 7 |
| Purposes for which water is required | 18 |
| Significance of water quality in relation to use | 26 |
| Cost of water supplies | 28 |
| Treatment of Natural Water for Removal of Undesirable Impurities | |
| Effects of water-borne impurities on chemical plant | 33 |
| Effects of impurities in water on processes and products | 40 |
| Methods of treatment of water | 41 |
| Treatment and Disposal of Waste Water | |
| Legislation affecting disposal of effluents | 86 |
| Nature of chemical works effluents | 88 |
| Methods of disposal of effluents | 93 |
| Treatment of effluents before disposal | 101 |
| Biological oxidation of organic impurities | 108 |
| Cost of effluent disposal | 113 |
| Recirculation and re-use of Water | 117 |
| Recirculation of cooling water | 118 |
| Re-use of steam condensate | 126 |
| Internal recycling of process water | 128 |
| Re-use of total factory effluent | 131 |
| Use of town sewage for industrial water supply | 133 |
| Economics of water conservation | 137 |
| Treatment of Water in Recirculation Processes | |
| Treatment of recycled cooling water | 139 |
| Treatment of recycled process water | 146 |
| Negative Trends in the Use of Water | |
| Air as a cooling medium | 152 |
| Flash evaporation cooling | 155 |
| Modification of processes | 155 |
| Counter-current washing | 156 |
| Water saving by 'good housekeeping' | 156 |
| Water economy by planning | 157 |
| Water in the Chemical Industry of Other Countries | |
| West German Federal Republic | 160 |
| The Netherlands | 164 |
| United States of America | 167 |
| Water Reclamation – some Present Investigations | |
| Research in the U.S.A. | 170 |
| Work in the United Kingdom | 174 |
