

## CONTENTS

|   | Page |
|---|------|
| 1. Criteria Development for Nations Drinking Water Standards  | 1    |
| 2. Nutrient Inputs to a Lake and Their Effects upon Water Quality   | 11   |
| 3. Application of Gas Chromatography of Volatile Metal Chelates to Water Analysis                         | 39   |
| 4. New Analytical Techniques for the Study of Water Disinfection  | 63   |
| 5. Removal of Cadmium from Waters and Wastes by Sorption on Hydrous Metal Oxides for Water Treatment      | 89   |
| 6. Chemistry of Sulfur Species and Their Removal from Water Supply  | 109  |
| 7. Chemical Forms of Arsenic in Water Supplies and Their Removal  | 137  |
| 8. Effect of Aluminum (III) Hydrolysis on Alum Coagulation  | 159  |
| 9. Model Sand Filters for the Removal of Colloidal Manganese Oxides Using Selected Cations as Filter Aids | 181  |
| 10. Influence of Surface Oxides on Adsorption and Catalysis with Activated Carbon                         | 201  |
| 11. Active Carbon : Dechlorination and the Adsorption of Organic Compounds                                | 233  |
| 12. Interactions of Aqueous Chlorine with Activated Carbon  | 253  |
| 13. Dynamics of Breakpoint Chlorination   | 297  |
| 14. Equilibria in Aqueous Solutions of Chlorinated Isocyanurate   | 333  |
| 15. Effectiveness of Hypochlorous Acid and Hypochlorite Ion in Destruction of Viruses and Bacteria        | 359  |
| 16. Kinetics of Viral Inactivation by Bromine   | 369  |
| 17. Inactivation of Viruses and Bacteria by Ozone   | 409  |
| 18. The Effect of Water Treatment and Distribution of Trace Element Concentrations                        | 423  |
