

CONTENTS

	Page
1. Introduction	1
2. Developmental and preliminary work	10
3. Quantity of sewage	25
4. Hydraulics of sewers	55
5. Design of sewer systems	98
6. Appurtenances	122
7. Materials	164
8. Loads on buried pipes	188
9. Construction of sewers	204
10. Sewer trenches	211
11. Laying and constructing sewer pipes and backfilling trenches	236
12. Pumping	262
13. Maintenance of sewers	304
14. Sewage treatment	323
15. Characteristics of sewage	338
16. The disposal of sewage	364
17. Screening	397
18. Sedimentation	411
19. Chemical treatment	443
20. Septic tanks and Imhoff tanks	467
21. Sewage filtration	481
22. Intermittent sand filters and other filters	517
23. Activated sludge	525
24. Sludge handling and disposal	566
25. Sludge digestion	581
26. Sludge drying and incineration	609
27. Industrial wastes	629
28. Summary of sewage-treatment processes	672
29. Plant operation and maintenance	683
Appendix Problems	713
Index	747
