1 DEVELOPMENTS AND TRENDS IN WASTEWATER ENGINEERING 1

Collection 1 Treatment 4 Disposal 9 References 10

DETERMINATION OF SEWAGE FLOWRATES 13

**Comprehensive Sewerage Plans 13 Population Studies 16
Water Consumption 25 Sewage Flowrates 33 Storm Water
Runoff 39 Ground Water Infiltration 40 Problems 44
References 45**

3 HYDRAULICS OF SEWERS 47

**Fundamentals of Fluid Mechanics 47 Flow Equations 55
Pipe and Open Channel Flow 63 Nonuniform Flow 70 Head
Losses Other than Those Caused by Friction 82 Methods of
Measuring Flowing Water 84 Problems 100 References 101**

4 DESIGN OF SEWERS 103

**Sanitary Sewers 103 Combined Sewers or Storm Sewers 119
Problems 128 References 129**

5 SEWER APPURTENANCES AND SPECIAL STRUCTURES 131

**Manholes 132 Street Inlets 140 Catch Basins 151 Flushing
Devices 152 Building Connections 152 Special Structures 155
Sewer Junctions 155 Inverted Siphons 157 Regulating Devices 162
Overflows 164 Outlets 176 Tide Gates 178 Ventilation and Air
Relief 178 Problems 180 References 180**

6 PUMPS AND PUMPING STATIONS 183

Pumps **184** Pump Drive Units **194** Sewage Pump Selection **196**
Pumping Stations **202** Problems **223** References **224**

7 WASTEWATER CHARACTERISTICS 227

Wastewater Analyses **227** Physical Characteristics: Definition and Application **233** Chemical Characteristics: Definition and Application **237** Biological Characteristics: Definition and Application **262**
Problems **269** References **270**

8 PHYSICAL UNIT OPERATIONS 273

Screening **274** Mixing **277** Flocculation **281** Sedimentation **283**
Flotation **296** Elutriation **302** Vacuum Filtration **304** Heat Transfer **309**
Drying **316** Problems **321** References **322**

9 CHEMICAL UNIT PROCESSES 325

Reaction Kinetics **325** Chemical Precipitation **329** Gas Transfer **340**
Adsorption **346** Disinfection **353** Combustion **363**
Problems **369** References **370**

10 BIOLOGICAL UNIT PROCESSES 373

Some Fundamentals of Microbiology **374**
Bacterial Growth **386** Biological Treatment Processes **408**
Problems **419** References **420**

11 DESIGN OF FACILITIES FOR PHYSICAL AND CHEMICAL TREATMENT OF WASTEWATER 423

Racks, Fine Screens, and Comminutors **425** Grit Chambers **433**
Pretreatment **444** Primary Sedimentation Tanks **446** Other Solids Removal Operations and Units **455**
Chemical Treatment **458** Sludge and Scum Pumping **465** Chlorination **470** Odor Control **478**
Problems **478** References **479**

12 DESIGN OF FACILITIES FOR BIOLOGICAL TREATMENT OF WASTEWATER 481

Activated-Sludge Process **482** Trickling Filters **533** Aerated Lagoons **542** Stabilization Ponds **551** Problems **569**
References **571**

13 DESIGN OF FACILITIES FOR TREATMENT AND DISPOSAL OF SLUDGE 575

Sludge Treatment Process Flowsheets **576** Sludge Sources, Quantities, and Characteristics **576** Sludge Concentration **586** Anaerobic Sludge Digestion **591** Aerobic Digestion **608** Sludge Conditioning **613** Sludge Dewatering and Drying **617** Incineration and Wet Oxidation **624** Final Sludge and Ash Disposal **627** Problems **629** References **630**

14 ADVANCED WASTEWATER TREATMENT 633

Effects of Chemical Constituents in Wastewater **634** Unit Operations and Processes **635** Physical Unit Operations **638** Chemical Unit Processes **653** Biological Unit Processes **660** Ultimate Disposal of Contaminants **669** Problems **670** References **670**

15 WATER-POLLUTION CONTROL AND EFFLUENT DISPOSAL 673

Water-Pollution Control **674** Effluent Disposal by Dilution **676** Effluent Disposal on Land **700** Direct and Indirect Reuse of Wastewater **701** Problems **704** References **704**

16 WASTEWATER TREATMENT STUDIES 707

Preliminary Steps **708** Waste Survey **709** Analysis of Treatment Alternatives **714** Laboratory Evaluation **717** Selection and Design of Treatment Units **732** Problems **732** References **733**

APPENDIXES 735

- A** Weights, Measures, and Conversion Factors **737**
- B** Physical Properties of Water **739**

- C** Dissolved-Oxygen Solubility Data **740**
- D** Most Probable Number of Coliforms per 100 ml of Sample **741**
- E** Water Quality Criteria of the Ohio River Valley Water Sanitation Commission **744**
- F** Suggested Graduate Course Outline **747**
- G** Suggested Undergraduate Course Outline **748**
- H** Some Terms and Abbreviations **749**
