

Contents

Preface	vii
1 Concepts of Wastewater Disinfection	1
Historical Background	
Importance of Disinfection	3
Wastewater Reuse	12
Viruses	14
The Regrowth Phenomenon	24
Toxicity of Chlorine Residuals	25
Available Methods of Disinfection	28
Comparative Costs of Different Methods of Disinfection	33
References	36
2 Chemistry and Kinetics of the Chlorination-Dechlorination Method	40
Fundamentals of Chlorine Chemistry	40
The Breakpoint Reaction	52
Nitrogen Removal	56
The Dechlorination Process	61
Formation of Organochlorine Compounds	63
References	69
3 Chlorination-Dechlorination Facility Design	72
Factors Affecting Process Efficiency	72
Mixing	121
Contact Chambers (Reactors)	130
Dechlorination	146
Process Monitoring and Control	160
References	165
4 Operation and Maintenance of a Chlorination-Dechlorination System	169
Laboratory Procedures	169
Records and Reports	171
Storage and Supply System (Chlorine and Sulfur Dioxide)	173

CONTENTS

- Operation—Chlorination Equipment
- Operation—Dechlorination Equipment
- Maintenance—Chlorination Equipment
- Maintenance—Dechlorination Equipment
- Safety in Handling Chlorine and Sulfur Dioxide
- References

- 5 Hypochlorination**
 - Introduction
 - Current Practices
 - Choice of Chemical
 - Chemistry of Hypochlorites
 - Hypochlorite Facility Design
 - On-Site Generation of Hypochlorite
 - On-Site Manufacture of Hypochlorite
 - References

- 6 Chlorine Dioxide**
 - Introduction
 - Physical and Chemical Properties
 - Methods of Generating Chlorine Dioxide
 - Chemistry of Chlorine Dioxide
 - Germicidal Efficiency
 - Current Practices
 - Residual Measurements
 - Chlorine Dioxide Facility Design
 - Chemical Handling and Storage
 - Reliability
 - Costs
 - References

- Bromine, Bromine Chloride, Iodine, and UV Radiation**
 - Bromine (Br_2)
 - Bromides: On-Site Generation of Br_2
 - Bromine Chloride, BrCl
 - Germicidal Efficiency (Br_2 and BrCl)
 - Toxicity of Bromine Residuals
 - Bromo-Organic Compounds
 - Measurement of Bromine Residuals
 - Iodine
 - Ultraviolet Radiation
 - References

8 Ozone	316
Introduction	316
Chemistry of Ozonation	321
Efficiency of Ozone in Wastewater	325
Commercial Ozone Generators	333
Ozone Facility Design	341
Comparative Costs	346
Measurement of Ozone Residuals	351
References	359
Book Summary	365
Appendix	371
Index	381
