

## CONTENTS

	Page
Preface	ix
1. Sewage Treatment and Sewage Treatment Systems	1
1.1 Introduction	1
1.2 Sewage flow rate	3
1.3 Characteristics of sewage	6
1.4 Hydraulic and organic loads	15
1.5 Chemical energy of organic material	20
1.6 Bacterial metabolism	22
1.7 COD mass balance	31
2. Application of Anaerobic Digestion to Sewage Treatment	33
2.1 Anaerobic Degradation of organic matter	33
2.2 Conversion processes in anaerobic systems	34
2.3 Kinetics of anaerobic digestion	36
2.4 Environmental factors	43
2.5 Anaerobic treatment processes	47
3. Design Criteria of UASB Reactors for Sewage Treatment	63
3.1 Introduction	63
3.2 Reactor shape and size	63
3.3 The phase separator	67
3.4 Influent distribution device	73
3.5 Effluent collection device	78
3.6 Special devices	80
3.7 Construction materials	83
3.8 Peripheral structures	83
3.9 Evaluation of the mechanical stability of the UASB reactor	85
3.10 Tracer studies	86
3.11 Construction costs	89
4. Performance of UASB Reactors Treating Sewage	90
4.1 Introduction	90
4.2 Start-up of a UASB reactor treating sewage	90
4.3 Steady-state behaviour	100
4.4 Sludge production and sludge characteristics	110
4.5 Biogas production	118
5. pH Value and Stability in an Anaerobic Digester	121
5.1 Introduction	121
5.2 Weak acid – base systems	121
5.3 Buffer index	122
5.4 The carbonate system	125
5.5 The ionic equilibrium of carbonate species	128
5.6 Equilibrium between the liquid and gas phases	130
5.7 Influence of temperature on the value of pH	139
5.8 Equilibrium of the liquid and solid phases : calcium carbonate dissolution and precipitation	140
5.9 Three phase equilibrium : liquid-solid-gas	144
6. Sludge Treatment	147
6.1 Introduction	147
6.2 Sludge production and composition	147

6.3	Design of sludge drying beds	160
7.	Post – Treatment of UASB effluent	162
7.1	Introduction	162
7.2	Concentration of pathogens and nutrients in waste water	162
7.3	Post-treatment in stabilisation ponds	164
7.4	Biological post-treatment using the activated sludge process	180
Appendix 1	Assessment of Anaerobic Biodegradability	200
Appendix 2	Grit Channel and Parshall Flume	202
Appendix 3	Activity Coefficients : Correction for Non-Ideality of Solutions	212
Appendix 4	Experimental Determination of Total and Hydrogencarbonate Alkalinities	215
