|--|----------|
| Preface | vi |
| Symposium opening | vii |
| Editorial Notes and Acknowledgements | ix |
| Paper 1. The Sludge Treatment and Disposal Problem | 1.1 |
| Presentation | 1.11 |
| Paper 2. The Refuse Treatment and Disposal Problem | 2.1 |
| Presentation | 2.23 |
| Paper 3. Combined Incineration of Refuse and Sludge | 3.1 |
| Presentation | 3.5 |
| Discussion of Papers 1, 2 and 3, and of the Symposium Opening | 3.8 |
| Paper 4. Location of Incinerators | 4.1 |
| Discussion | 4.11 |
| Paper 5. Types of Incinerators and their uses | 5.1 |
| Discussion | 5.23 |
| Paper 6. Incinerator Design Procedure | 6.1 |
| Discussion | 6.30 |
| Paper 7. Comparison of Electrostatic Filtration with Wet Washing of the Gases from Refuse Sludge Incineration | 7.1 |
| Discussion | 7.13 |
| Paper 8. Operating Experience with the Sheffield Sludge Incineration Plant | 8.1 |
| Discussion | 8.13 |
| Paper 9. Continuous Grate Incineration at Sutton coldfield | 9.1 |
| Discussion | 9.13 |
| Symposium Closure | 10.1 |
| Bibliographical Material | 11.1 |
| List of Participants | 12.1 |
| Appendix A note on units | 13.1 |
