

CONTENTS

	Page
1. Introduction	1
2. Nature of Sewage and Chemical Analysis	9
3. Sewerage Systems, Storm Sewage Overflows and Storm Sewage Treatment	38
4. Preliminary Treatment	48
5. Primary Sedimentation	60
6. Aerobic Biological Treatment	79
7. Methods of Improving Final Effluents	109
8. Sludge Treatment and Disposal	120
9. Flow Measurement	145
10. Effects of Trade Wastes	153
11. Small Sewage Treatment Plants	186
12. Trends in the Field of Water Pollution Control	193
13. Chemical Calculations	220
Appendix 1 Suggestions for Further Reading	229
Appendix 2 British : Metric Units – Conversion Tables	232
Index	247
