	<b>PREFACE</b>	<b>vii</b>
<b>1</b>	<b>FLOW IN PIPES</b>	<b>1</b>
1.1	Conservation Laws 2	
	<i>Conservation of mass</i> 2	
	<i>Conservation of energy</i> 4	
	<i>Conservation of momentum</i> 6	
1.2	Head Losses Due to Friction 11	
1.3	Minor Losses 23	
	<i>Pipes in series</i> 27	
	<i>Pipes in parallel</i> 28	
1.4	Sludge Flow 31	
1.5	Dividing-Flow Manifolds 33	
<b>2</b>	<b>MULTIPOINT DIFFUSER OUTFALLS</b>	<b>55</b>
2.1	Hydraulics of Multiport Diffusers 56	
2.2	Design of Multiport Diffusers 62	
<b>3</b>	<b>FLOW IN OPEN CHANNELS</b>	<b>79</b>
3.1	Uniform Flow 79	
	<i>Circular conduits flowing partly full</i> 81	

- 3.2 Varied Flow 85
- Specific energy* 85
  - Critical depth* 86
  - Channel transitions* 87
  - Gradually varied flow* 93
  - Computation of backwater curves* 93
  - Lateral spillway channels* 96
  - Side-discharge weirs* 104
  - Distribution channels* 108
- 3.3 Minor Losses 118

## 4 FLOW MEASUREMENT AND HYDRAULIC CONTROL POINTS 123

- 4.1 Weirs 123
- Rectangular weirs* 123
  - Triangular weirs* 127
- 4.2 Parshall Flumes 129
- 4.3 Venturi Meters 136
- 4.4 Magnetic Flow Meters 138
- 4.5 Hydraulic Control Points 139
- 4.6 Plant Hydraulics 141

## 5 PUMPS 144

- 5.1 Basic Concepts 144
- System-head curve* 145
  - Pump-head curve* 145
  - Pump characteristics curves* 146
  - Pump similarity* 150
- 5.2 Types of Centrifugal Pumps 155
- 5.3 Cavitation 159
- 5.4 Multiple-Pump Operation 161

## 6 DESIGN EXAMPLE FOR A WASTEWATER TREATMENT PLANT 171

- 6.1 Hydraulic Analysis for Grit Chamber and Upstream Components 175
- Computations* 176

Contents

v

6.2 Hydraulic Analysis for Primary Clarifier System 182

*Computations 183*

6.3 Hydraulic Analysis for Aeration Basin System 187

*Computations 188*

*Aeration basin lateral spillway channel 193*

6.4 Hydraulic Analysis for Final Clarifier System 194

*Computations 194*

6.5 Hydraulic Analysis for Chlorine Contact Basin 201

*Computations 201*
