

C O N T E N T S

	Page
I. <u>INTRODUCTION</u>	1
<u>TOXIC WASTE</u>	5
II.1. General	11
II.2. Organic waste	12
II.2.1. Pesticides	13
II.2.2. Organochlorines	16
II.2.3. Hydrocarbons	19
II.2.4. Fatty matters	21
II.3. Non-organic waste	27
II.3.1. Heavy metals	28
II.3.2. Salts and minerals	35
II.4. Sources of toxic waste	36
<u>PHYSICO-CHEMICAL PROCESSES TO TREAT TOXIC WASTE</u>	42
III.1. Various physico-chemical processes	43
III.1.1. Incineration	44
III.1.2. Pyrolysis	49
III.1.3. Adsorption	49
III.1.4. Vitrification	51
III.1.5. Reverse osmosis	51
III.1.6. Others	54
III.2. Treatment of organic waste	58
III.2.1. Typical processing of organic waste	60
III.3. Treating non-organic waste	65
III.3.1. Instances of non-organic waste treatment	65

IV. <u>TREATMENT OF TOXIC WASTE WITH BIOTECHNOLOGICAL PROCESSES</u>	68
IV.1. General	69
IV.1.1. Microbiological engineering	70
IV.1.2. Enzymatic engineering	71
IV.1.3. Genetic engineering	73
IV.2. Different biotechnological processes	75
IV.2.1. Aerobic degradation	75
IV.2.2. Anaerobic digestion	77
IV.2.3. Composting	77
IV.2.4. Adsorption	80
IV.2.5. Bio-lixiviation	80
IV.3. Biotechnological tools	82
IV.3.1. Micro-organisms	83
IV.3.2. Algae	90
IV.3.3. Plants	93
IV.3.4. Enzymes	95
IV.4. Treatment of organic waste	99
IV.4.1. Hydrocarbons	100
IV.4.2. Organochlorines	104
IV.4.3. Pesticides	107
IV.4.4. Fats	108
IV.5. Treatment of non-organic waste	110
IV.5.1. Heavy metals	110
IV.5.2. Salts and minerals	111
