

## CONTENTS

1. Introduction	1.1
2. Regulatory Requirements	2.1
3. Hazardous Waste	3.1
4. Basic Thermodynamics	4.1
5. Heat-Transfer Systems	5.1
6. Combustion Calculations	6.1
7. Air Emissions Calculations	7.1
8. Waste Characteristics	8.1
9. Incinerator Analysis	9.1
10. On-site Solid Waste Disposal	10.1
11. Pyrolysis and Controlled Air Incineration	11.1
12. Rotary Kiln Technology	12.1
13. Central Disposal Systems	13.1
14. Biomedical Waste Incineration	14.1
15. Sludge Incineration	15.1
16. Liquid Waste Destruction	16.1
17. Incineration of Gaseous Waste	17.1
18. Incineration of Radioactive Waste	18.1
19. Soils Incineration	19.1
20. Miscellaneous Waste Destruction Processes	20.1
21. Energy Recovery	21.1
22. Air Pollution Control	22.1
23. Acid Gas Control	23.1
24. Comprehensive Design Example	24.1
25. Metric Analysis	25.1
Glossary	G.1
Index	I.1
