

Contents

1. DEVELOPMENT OF IDEAS ON THE NATURE AND AGENTS OF BIOMETHANOGENESIS	1
<i>Robert E. Hungate</i>	
References	12
2. ACETATE METABOLISM BY <i>METHANOSARCINA</i>	15
<i>J.A. Krzycki and J.G. Zeikus</i>	
Introduction.	16
Physiology and Biochemistry of Acetate Assimilation.	16
The Catabolism of Acetate	19
Significance of Methanogenesis from Acetate	19
Physiological Characteristics of Acetotrophs.	22
Origin of Methane During Acetotrophic Growth	24
Mixotrophic Growth on Acetate and Other Substrates	25
Biochemistry of Acetate Catabolism	26
References	30
3. ACETOCLASTIC METHANOGENS IN ANAEROBIC DIGESTERS	35
<i>J.P. Touzel and G. Albagnac</i>	
Introduction.	35
Materials and Methods	35
Results	36
Morphology	36
Ultrastructure.	36
Kinetic Parameters.	36
Conclusion.	39
References	39

4. METABOLISM OF H₂ AND CO₂ BY METHANOBACTERIUM	41
<i>Peter Schönheit and Rudolf K. Thauer</i>	
Introduction	41
Catabolism	42
Mechanism of CO ₂ Reduction to CH ₄	42
Coupling of CO ₂ Reduction to Methane with the Synthesis of ATP	43
Anabolism	46
Acknowledgments	48
References	48
5. EFFECT OF HYDROGEN CONCENTRATION ON POPULATION DISTRIBUTION AND KINETICS IN METHANOGENESIS OF PROPIONATE	53
<i>Perry L. McCarty and Daniel Smith</i>	
Introduction	53
Significance of Propionate	54
Energy from Substrate Utilization	54
Bacterial Yields	57
Substrate Affinity	60
Summary	64
Acknowledgment	64
References	65
6. ENERGETICS OF H₂-PRODUCING SYNTROPHIC BACTERIA	67
<i>P.S. Beaty, M.J. McInerney, and N.Q. Wofford</i>	
Introduction	68
Methods of Calculation	69
Calculation of ΔG'	69
Calculation of the kJ per mg (Dry Weight)	70
Energetics of Syntrophic Growth	70
Conclusions	80
Acknowledgments	80
References	81
7. THERMODYNAMICS OF CATABOLIC REACTIONS IN THE ANAEROBIC DIGESTOR	85
<i>David R. Boone</i>	
8. A LINK BETWEEN HYDROGEN AND SULFUR METABOLISMS IN METHANOSARCINA BARKERI (DSM 800)	97
<i>G. Fauque, M. Teixeira, I. Moura, A.R. Lino, P.A. Lespinat, A.V. Xavier, D.V. Dervartanian, H.D. Peck, Jr., J. Legall, and J.J.G. Moura</i>	
Introduction	98
Materials and Methods	98
Growth of the Microorganism and Preparation of the Crude Extract	98

Assays	99
Spectroscopic Instrumentation	100
Results	100
Properties of the Hydrogenase from <i>M. barkeri</i>	100
Sulfur Metabolism in <i>M. barkeri</i>	103
Discussion	103
Conclusions	107
Acknowledgments	109
Literature Cited	109
9. THE ASSIMILATORY REDUCTION OF N₂ AND NO₃⁻ BY METHANOCOCCUS THERMOLITHOTROPHICUS	113
<i>Negash Belay, Richard Sparling and Lacy Daniels</i>	
Introduction	113
Materials and Methods	114
Results and Discussion	116
Acknowledgments	122
References	122
10. A DEFINED STARTER CULTURE FOR BIOMETHANATION OF PROTEINACEOUS WASTES	125
<i>M.K. Jain and J.G. Zeikus</i>	
Introduction	126
Materials and Methods	126
Results	127
Discussion	134
Conclusions	137
Acknowledgments	137
Literature Cited	137
11. STRATEGIES FOR THE ISOLATION OF MICROORGANISMS RESPONSIBLE FOR POLYPHOSPHATE ACCUMULATION	141
<i>N. Suresh, R. Warburg, M. Timmerman, J. Wells, M. Coccia, M.F. Roberts, and H.O. Halvorson</i>	
Introduction	142
Materials and Methods	144
Maintenance of Cultures	144
Transformation	144
³¹ P NMR Analysis	145
Enzyme Assays	145
Polyphosphatase	145
Polyphosphate kinase	145
Results and Discussion	146
Isolation and Screening for Phosphate Accumulating Bacteria	146
Use of Percoll Density Gradients	148
³¹ P NMR Analysis	153
Polyphosphate Kinase and Polyphosphatase	153

Conclusions	157
Acknowledgments	159
References	159
12. HYBRIDIZATION OF DNA FROM METHANOGENS WITH EUBACTERIAL PROBES.	163
<i>Lionel Sibold, Dominique Pariot, Lakshmi Bhatnager, Marc Henriquet, and Jean-Paul Aubert</i>	
Introduction.	163
Materials and Methods	164
Bacterial Strains and Plasmids	164
Culture Conditions	164
Isolation of Chromosomal DNA	164
Plasmid Isolation.	166
Restriction Enzyme Cleavage.	166
Hybridization Techniques	166
Construction of Plasmid pPC1201	166
Results	166
Hybridization with <i>B. subtilis</i> rRNA Genes.	167
Hybridization with nif Genes.	167
Discussion	171
Acknowledgments	171
References	172
13. EXPRESSION OF A METHANOGEN GENE IN <i>ESCHERICHIA COLI</i> AND IN <i>BACILLUS SUBTILIS</i>.	175
<i>Christina J. Morris and John N. Reeve</i>	
Introduction.	175
Materials and Methods	176
Transposon Mutagenesis of pET381	176
Results	177
Complementation of <i>E. coli</i> argG and <i>B. subtilis</i> argA Mutations.	177
Expression of <i>M. barkeri</i> DNA in Minicells.	177
Mutagenesis of the <i>M. barkeri</i> DNA Sequence.	180
Discussion	183
Acknowledgments	185
References	185
14. ANTIBIOTIC G418 FOR SELECTION AND MAINTENANCE OF PRO- AND EUKARYOTIC TRANSFORMANTS AND ITS POSSIBLE APPLICATION FOR METHANOGEN TRANSFORMATION	187
<i>Daniel Feldman and Nancy W. Y. Ho</i>	
Introduction.	188
Materials and Methods	189
Chemicals and Gases	189
Organisms and Cultivation.	189
Results and Discussion	189

Acknowledgment	. 192
References 192
15. NUTRIENT REQUIREMENTS FOR ANAEROBIC DIGESTION.	195
<i>Richard E. Speece and Gene F. Parkin</i>	
Introduction.	196
Half Saturation Concentration— K_S	199
Microbial Generation Time	199
Economics of Nutrient Supplementation .	205
A. Nitrogen	208
B. Phosphorus.	210
C. Sulfur	210
D. Trace Metals.	211
Summary.	216
Acknowledgment	216
References	217
16. PROPIONATE CONVERSION TO BUTYRATE IN AN ANAEROBIC DIGESTER.	223
<i>E. Samain, R. Moletta, H.C. Dubourguier, and G. Albagnac</i>	
Introduction.	223
Materials and Methods	224
Results	224
Enumeration	224
Batch Degradation of Propionate by Anaerobic Sludge . .	224
Batch Degradation of Propionate by the Purified Culture	226
Conclusion.	226
References	232
17. EFFECTS OF THE ADDITION OF PROPIONATE AND BUTYRATE TO THERMOPHILIC METHANE-PRODUCING DIGESTERS	235
<i>J. Michael Henson, F.M. Bordeaux, and Paul H. Smith</i>	
Introduction.	236
Materials and Methods	237
Digesters	237
Infusion of Volatile Fatty Acids.	237
Gas Chromatography	238
Results	238
Characterization of Control Digesters	238
Infusion of n-Butyrate into a Thermophilic Digester.	238
Infusion of Propionate into a Thermophilic Digester	241
Discussion	243
Conclusions	245
Acknowledgments	245
References	245

18. COMBINED METABOLISM OF BUTYRIC ACID AND WASTE ACTIVATED SLUDGE AT THERMOPHILIC TEMPERATURES . . .	247
<i>Ross E. McKinney and Reza Shamskorzani</i>	
Introduction	248
Materials and Methods	249
Results	251
Discussion	256
Conclusions	259
References	260
19. ANAEROBIC DIGESTION OF HEMICELLULOSIC FEEDSTOCKS. . .	261
<i>C. Rivard, M. Himmel, and K. Grohmann</i>	
Introduction	262
Materials and Methods	263
Straw Comminution.	263
Dewatering of Straw	263
Acid Hydrolysis	263
Analysis of Straw Hydrolysate and Digester Feed	263
Feed Preparation.	264
Enrichment Medium	266
Fermenters and Packed Bed Reactors	266
Start-Up of the Stirred and Packed Bed Fermenters	267
Gas Analysis.	267
Microscopy	268
Inhibition Experiments.	268
Results	269
Discussion	277
Acknowledgments	281
References	281
20. HIGH SOLIDS DIGESTION OF MSW TO METHANE BY ANAEROBIC DIGESTION	283
<i>E.C. Clausen and J.L. Gaddy</i>	
Introduction.	284
Maximum Solids Concentration	285
Factors Affecting Reactor Volume	286
Purpose.	288
A Comparison of MSW and Corn Stover as Feedstocks for Anaerobic Digestion.	288
The Anaerobic Digestion of Corn Stover in Continuous Culture	290
Experimental Procedure	290
Reaction Kinetics	291
Results	291
Process Design and Economic Considerations	293
High Solids Digestion with Biomass.	297
Experimental Procedure	297
Experimental Results.	299

The Effect of Increased Solids Concentrations on Process Economics	299
Summary	301
References	302
21. GASIFICATION OF CONCENTRATED PARTICULATE AND SOLID SUBSTRATES BY BIPHASIC ANAEROBIC DIGESTION.	303
<i>S. Ghosh</i>	
Introduction	304
Biphasic Digestion	306
Upflow Two-Phase Digestion of Concentrated Particulate Feeds	307
Materials and Methods	307
Results and Discussion	309
Engineering Significance	309
Leach-Bed Two-Phase Digestion of High-Solids/Dry Feeds	312
Materials and Methods	314
Results and Discussion	315
Conclusions	319
Acknowledgments	320
Literature Cited	320
22. ENGINEERING STUDIES ON MSW AS SUBSTRATE FOR METHANOGENESIS.	321
<i>L.F. Diaz, G.M. Savage, and C.G. Golueke</i>	
Introduction	321
Materials and Methods	322
Digester Start-Up	322
Digester Operation	322
Parameters	322
Results	323
First Study	323
Second Study	324
Third Study	327
Discussion and Conclusions	328
References	328
23. EVOLUTION OF THE RefCOM SYSTEM	331
<i>John T. Pfeffer</i>	
Introduction	331
Background	332
Operation of RefCOM	337
Summary and Conclusion	339
Literature Cited	340

24. PRELIMINARY EVALUATION OF THE EFFECTS OF A d-RDF BINDING AGENT, RDF PARTICLE SIZE AND HEAT PRE-TREATMENT ON EFFICIENCY OF ANAEROBIC DIGESTION OF RDF	343
<i>V. Kenneth Wright, Barney J. Venables and Kenneth E. Daugherty</i>	
Introduction.	344
Materials and Methods	345
Results	346
Discussion	350
Conclusions	352
References	352
25. NEW CONCEPT FOR THE PRODUCTION OF HIGH-BTU GAS FROM ANAEROBIC DIGESTION.	355
<i>Thomas D. Hayes and H. Ronald Isaacson</i>	
Introduction.	356
Background	356
Approach.	359
Results	363
Engineering Considerations	372
Conclusion.	372
Literature Cited	372
26. ETHANOL AND CHEMICALS FROM CELLULOSICS IN SOLID WASTES	375
<i>George T. Tsao</i>	
Acid Hydrolysis	375
Some Details of a Low Temperature Acid Hydrolysis Process.	376
Hemicellulose Hydrolysis	376
Acid Preconditioning	376
Roasting	377
Leaching	377
Cellulose Hydrolysis.	378
Pretreatment	378
Cellulose Hydrolysis After the Pretreatment	379
Utilization of Hemicellulose Hydrolysate.	380
Production of Furfural	380
Production of Single Cell Protein as a Feed By-Product.	383
Production of 2,3-Butanediol and Methyl Ethyl Ketone	384
Ethanol from Xylose After Isomerization.	384
References	386
27. THE PRODUCTION OF CHEMICALS AND FUELS BY ACID HYDROLYSIS AND FERMENTATION OF MSW.	387
<i>E.C. Clausen and J.L. Gaddy</i>	
Introduction.	387
Acid Hydrolysis	390
Prehydrolysis	390

Hydrolysis	390
Sugar Decomposition	393
Ethanol Fermentation	394
Economic Projections	394
Process Improvements	397
Solids Concentration	397
Acid Recycle	398
Continuous Fermentation	400
Economic Impact of Process Improvements	401
Conclusions	404
References	405
28. THE BIOCONVERSION OF MUNICIPAL SOLID WASTE AND SEWAGE SLUDGE TO ETHANOL	407
<i>Daniel R. Coleman, Thomas J. Laughlin, Melvin V. Kilgore, Jr.</i> <i>Chris L. Lishawa, William E. Meyers, and Michael H. Eley</i>	
Introduction	408
Basic Components	408
MSW/Sewage-Sludge Processing	411
Hydrolysis	411
Economic Analysis	413
Conclusion	413
References	417
29. THE USE OF IN VITRO ANAEROBIC LANDFILL SAMPLES FOR ESTIMATING LANDFILL GAS GENERATION RATES	
<i>Richard L. Jenkins and John A. Pettus</i>	
Introduction	420
Experimental	423
Results and Discussion	425
Conclusions	434
References	434
30. METHANE-OXIDIZING BACTERIA IN SANITARY LANDFILLS	437
<i>Rocco L. Mancinelli and Christopher P. McKay</i>	
Introduction	438
Materials and Methods	440
Results	443
Discussion	445
References	447
31. DESIGN OPERATION AND RESULTS OF THE CONTROLLED LANDFILL PROJECT MOUNTAIN VIEW, CALIFORNIA	
<i>Robert E. Van Heuit</i>	
Introduction	451
Design Concepts and Cell Construction	453
Cell Management and Monitoring	457
Preliminary Analysis of Results	460

32. CHEMICAL AND MICROBIOLOGICAL ANALYSIS OF AVELEY LANDFILL, ENGLAND.	465
<i>J.F. Rees</i>	
Introduction.	465
Methods	467
Results	467
Leachate Composition	467
Landfill Characterization—Borehole H5	468
Discussion	470
References	473
