

## CONTENTS

	Page	
Section I	Overview of Bioremediation and Innovative Field Applications	
Chapter 1	Bioremediation Research in EPA : An Overview of Needs, Directions and Potentials	3
Chapter 2	In Situ Anaerobic PCB Dechlorination and Aerobic PCB Biodegradation in Hudson River Sediments	27
Chapter 3	Remediation Properties of the Upjohn Pond	45
Chapter 4	The Development of Composting for the Remediation of Explosives – Contaminated Soils	69
Chapter 5	In Situ Bioremediation via Horizontal Wells	79
Chapter 6	Bioventing Reclamation Pilot Project Aviation Gasoline Spill	87
Chapter 7	Biological Treatment for the Control of Toxic Contaminants in Bleached Kraft Mill Effluents	93
Section II	Industrial Waste Treatment	
Chapter 8	Biodegradation of Methylene Chloride in Industrial Process Wastewater : Evaluation of Reactor Configurations and Comparison of a Pure Hyphomicrobial Culture with Wastewater Treatment Sludge	111
Chapter 9	A Pilot-Scale Fluid Bed Reactor for Treatment of a Methylene Chloride Process Stream	143
Chapter 10	Biotreatment of Ammonium Perchlorate in Rocket Motor Wastewater	155
Chapter 11	The Membrane Biological Reactor for Industrial Wastewater Treatment and Bioremediation	175
Section III	Bioremediation	
Chapter 12	Bioremediation of Contaminated Soils and Groundwater at a Former Solvent Storage Site	195
Chapter 13	A Case Study : The correlation of the Hydrogeology and the Microbial Component For Enhanced In Situ Treatment of BTEX-Contaminated Groundwater Part I : Laboratory Assessment of the Sessile and Planktonic Microbial Populations in Aquifer Soil and Groundwater and their Metabolic Activity on BTEX Part II : Field Approach to Enhancing Bioremediation by Increasing the Microbial Population In Situ Using Oxygen and Nutrients	213
Chapter 14	In Situ Bioremediation : An Integrated System Approach	227
Chapter 15	Biofilter Treatment of Process Streams in the Chemical Process to Eliminate Odoriferous Compounds and Higher Molecular Weight Hydrocarbons	243
Chapter 16	Methanotrophic Treatment Technology	269
Chapter 17	The Combination of High Intensity Soil Washing and Bioremediation in the Decontamination of Petroleum Polluted Soils	279
Chapter 18	Experimental In Situ Bioremediation of Hydrocarbons with the Help of Hydrogen Peroxide	295
Chapter 19	Implementation of GAC Fluidized-Bed for Treatment of Petroleum Hydrocarbons in Groudwater at Two BP Oil Distribution terminals, Pilot and Full-Scale	305
Chapter 20	Experiences with GAC-Fluid Bed for Bioremediation of BTEX-Contaminated Groundwaters	317
Chapter 21	Design and Remediation Results of a Full-Scale Bioremediation Systems Utilizing An On-Site Oxygen Generator	333
Chapter 22	Utilization of Closed-In-Place Underground Storage Tanks in the Remediation of Contaminated Soils and Groundwater	345
