

Contents and Subject Index

1. INTRODUCTION	1
2. BACKGROUND	..3
2.1 Schedule for Land Disposal Prohibition	..3
2.2 Treatment Standards for Certain Solvents	..5
2.2.1 Solvents of Concern	..5
2.2.2 Proposed Treatment Standards	..7
3. CURRENT INDUSTRIAL SOURCES, GENERATION, AND MANAGEMENT ACTIVITIES FOR SOLVENT WASTES.	.9
3.1 Industrial Sources of Waste Solvents	.9
3.1.1 Wastes Considered in Study	.9
3.1.2 Sources of Solvent Wastes	.9
Waste Solvents from Degreasing Operations	14
Waste Solvents from Dry, Cleaning	18
3.1.3 Halogenated Organic Solvent Usage in Industry	19
Perchloroethylene (PERC)	19
1,1,1-Trichloroethane (1,1,1-TCE)	19
Methylene Chloride (MC)	20
Fluorocarbons	21
Trichloroethylene (TCE)	21
Chlorobenzene	22
o-Dichlorobenzene	22
Chloroform	22
Carbon Tetrachloride	23
3.1.4 Nonhalogenated Organic Solvent Usage in Industry	23
Xylene	23
Toluene	24
Methyl Ethyl Ketone (MEK)	24

Methanol	25
Acetone.	26
n-Butanol.	26
Methyl Isobutyl Ketone (MIBK).	27
Ethyl Acetate.	27
Isobutanol	28
Cresols	28
Cyclohexanone	28
Nitrobenzene	29
Benzene.	29
3.2 Solvent Waste Generation	30
Impact of Regulatory and Other Changes on Waste Generation Estimates.	37
3.3 Waste Management Practices	38
3.3.1 Recycling (Includes Use as a Fuel)	38
3.3.2 Incineration	47
3.3.3 Treatment Methods	51
Land Disposal.	51
References	57
4. COMMERCIAL OFFSITE RECYCLING, TREATMENT, AND DISPOSAL CAPACITY	60
4.1 Commercial Solvent Recycling Industry.	60
Commercial Recycling Costs	65
4.2 Available Recycling Treatment and Disposal Capacity	68
References	74
5. WASTE MINIMIZATION PROCESSES AND PRACTICES	76
5.1 Source Reduction	76
5.1.1 Raw Material Substitution.	77
5.1.2 Product Reformulation.	77
5.1.3 Process Redesign/Equipment Modification	78
5.1.4 Waste Segregation	79
5.1.5 Case Summaries—Source Reduction	80
Raw Material Substitution.	80
Process Redesign/Equipment Modification	83
Waste Segregation	84
5.1.6 Source Reduction Summary	85
5.2 Recycling/Reuse	86
5.2.1 Recycling Technologies	87
Distillation.	87
Solvent Extraction.	99
Adsorption.	99
Purification	100
5.2.2 Selection of Recycling Technology	100
5.2.3 Reuse	102
5.3 Additional Examples of Waste Minimization Practices	106
References	113

6. PRETREATMENT	115
6.1 Liquids Containing Suspended or Floating Materials.	117
6.2 Solid/Sludge Wastes Containing Liquids.	119
6.3 Inorganic Solid Wastes Containing Low Levels of Organics	119
6.4 Bulky, Nonuniform Solid Wastes	121
6.5 Low Heat Content or High Viscosity Liquids	122
References	123
7. PHYSICAL TREATMENT PROCESSES	124
7.1 Distillation	126
7.1.1 Process Description	126
7.1.1.1 Restrictive Waste Characteristics.	130
Batch Distillation	130
Continuous Distillation.	131
Batch Fractionation.	133
Continuous Fractionation	133
Azeotrope Formation.	134
7.1.1.2 Operating Parameters and Design Criteria.	134
7.1.1.3 Treatment Combinations	140
7.1.2 Demonstrated Performance	142
3M Company: Packaged Batch Distillation Units	142
GCA: Package Batch Distillation Unit.	145
GCA: Batch Fractionation Process.	146
CH2M Hill: Batch Packaged Stills	148
7.1.3 Cost of Treatment	149
7.1.3.1 Cost Estimates for Small Packaged Batch Distillation Units.	149
7.1.3.2 Cost Estimates for a Packaged Batch Distillation Unit	151
7.1.3.3 Cost Estimates for the Batch Fractionation Process	151
7.1.3.4 Study of the Norfolk Navy Shipyard Operation.	154
7.1.3.5 Cost Estimates for Moderate to Large-Scale Recovery Units	155
7.1.3.6 Cost Estimates for Small Packaged Stills	158
Cold Cleaning Solvents	159
Vapor Degreasing Solvents	160
Paint Thinners	160
7.1.4 Overall Status	165
7.1.4.1 Availability/Application	165
7.1.4.2 Environmental Impact	165
7.1.4.3 Advantages and Limitations.	165
References	169
7.2 Evaporation Processes	171
7.2.1 Process Description	171
7.2.1.1 Pretreatment and Post-Treatment Requirements	174
7.2.1.2 Operating Parameters and Design Criteria.	178
7.2.2 Demonstrated Performance	182
7.2.2.1 Thin Film Evaporator and Milsolvator	184

Contents and Subject Index

7.2.2.2 Thin Film Evaporator—Plant A.	187
7.2.2.3 Thin Film Evaporator—Plant B.	189
7.2.2.4 Thin Film Evaporator—Plant C.	191
7.2.3 Cost of Treatment.	195
7.2.3.1 Milsolv Corporation Case Study	195
7.2.3.2 RTI Case Studies.	197
7.2.3.3 Cost Estimates Prepared by Pace	197
7.2.3.4 Cost Comparisons Between Pace and Site Visit Reports	202
7.2.4 Overall Status of Process.	207
7.2.4.1 Availability	207
7.2.4.2 Application	207
7.2.4.3 Environmental Impacts.	208
7.2.4.4 Advantages and Limitations.	208
References	210
7.3 Steam Stripping	211
7.3.1 Process Description	211
Theoretical Considerations	213
7.3.1.1 Pretreatment and Post-Treatment Requirements	215
7.3.1.2 Design Characteristics and Operating Parameters	217
7.3.2 Demonstrated Performance.	220
Steam Injection Still	220
Full-Scale Steam Distillation (Stripping)	225
Industrial Steam Stripper Survey (OSW)	230
Industrial Steam Stripper Survey	232
Bench-Scale Steam Strippers	235
Bench-Scale Ground Water Stripping Feasibility Study	240
7.3.3 Cost of Steam Stripping	243
Steam Stripping Costs for Wastewater Streams	245
Steam Stripping Costs for Nonaqueous Wastes	249
7.3.4 Overall Status of Process.	253
7.3.4.1 Availability	253
7.3.4.2 Application	253
7.3.4.3 Environmental Impact	254
7.3.4.4 Advantages and Limitations.	254
References	255
7.4 Air Stripping	257
7.4.1 Process Description	257
Diffused Aeration	257
Mechanical Aeration	258
Sprays and Spray Towers	258
Tray and Packed Towers.	258
7.4.1.1 Pretreatment Requirements.	259
7.4.1.2 Operating Parameters	261
7.4.1.3 Post-Treatment Requirements	266
7.4.1.4 Treatment Combinations	266
7.4.2 Demonstrated Performance	268

7.4.2.1 Pilot Study at IBM's Facility	268
7.4.2.2 Bench Scale Mixed Organics Air Stripping Study (Mumford, 1982).	268
7.4.2.3 Pilot Scale Air Stripping Treatability Study	270
7.4.3 Cost of Treatment	270
7.4.4 Overall Status of Process	273
7.4.4.1 Availability	273
7.4.4.2 Application	274
7.4.4.3 Environmental Impact	274
7.4.4.4 Advantages and Limitations.	274
References	275
7.5 Liquid-Liquid Extraction	276
7.5.1 Process Description	276
7.5.1.1 Pretreatment Requirements for Different Waste Forms and Characteristics	278
7.5.1.2 Operating Parameters	279
7.5.1.3 Post-Treatment Requirements	288
7.5.2 Demonstrated Performance	288
7.5.2.1 Results of Study #1.	289
Results from Spray Column Extractor.	289
Results from RDC Extractor	289
7.5.2.2 Results of Study #2.	292
7.5.2.3 Results of Other Studies	295
7.5.3 Cost of Treatment	295
7.5.4 Overall Status of Process	302
7.5.4.1 Availability	302
7.5.4.2 Application	302
7.5.4.3 Environmental Impact	304
7.5.4.4 Advantages and Limitations.	304
References	305
7.6 Carbon Adsorption	307
7.6.1 Process Description	314
7.6.1.1 Pretreatment Requirements.	314
Equalization of Flow and Concentrations of Primary Waste Constituents	316
Filtration.	316
Adjustment of pH	317
Adjustment of Temperature	317
7.6.1.2 Operating Parameters	318
Adsorption System	318
Regeneration	323
7.6.1.3 Post-Treatment Requirements	325
7.6.1.4 Treatment Combinations	325
Treatment Train 1	325
Treatment Train 2	327
Treatment Train 3	329
Treatment Train 4	329
7.6.2 Demonstrated Performance	332

7.6.3	Cost of Carbon Absorption	337
7.6.4	Overall Status of Process	340
7.6.4.1	Availability	340
7.6.4.2	Application	340
7.6.4.3	Environmental Impacts.	342
