

Contents

Preface	xix
Introductory Comments Regarding Pollution Prevention	xxiii
Part 1 Process and Plant Fundamentals	
Chapter 1 Introduction	3
Overview	4
Units	4
Summary	8
Chapter 2 Definitions	
Fundamental Definitions	9
Temperature	9
Pressure	10
Moles and Molecular Weights	11
Physical and Chemical Properties	12
Density	12
pH	12
Viscosity	13
Heat Capacity	13
Thermal Conductivity	14
Diffusivity	14
Vapor Pressure	14
Partial Pressure	15
	vii

Boiling Point	15
Freezing Point	15
Summary	15
Chapter 3 Conservation Laws and Basic Principles	17
Conservation of Mass	17
Conservation of Energy	21
Thermochemistry	23
Chemical Reaction Equilibrium	23
Chemical Kinetics	24
Ideal Gas Law	26
Phase Equilibrium	27
Summary	29
Chapter 4 Unit Operations	31
Unit Operation Classification	32
Contact of Immiscible Phases	33
Miscible Phases Separated by a Membrane	37
Direct Contact of Miscible Phases	37
Summary	39
Chapter 5 Plant Equipment	41
Chemical Reactors	41
Reactor Definition	41
Reactor Types	42
Heat Exchangers	44
Mass Transfer Equipment	45
Distillation	45
Adsorption	47
Absorption	47
Evaporation	48
Extraction	48
Drying	49
Summary	49
Chapter 6 Ancillary Equipment	51
Transportation Equipment	51
Pipes	51
Ducts	52
Fittings	52
Valves	53
Fans	54
Pumps	54
Compressors	55
Stacks	55

Air Pollution Control Equipment	56
Electrostatic Precipitators	56
Baghouses	56
Wet Scrubbers	56
Adsorbers	57
Water Pollution Control Equipment	57
Oxidation	58
Reduction	58
Precipitation	58
Activated Sludge	58
Anaerobic Digestion	59
Waste Stabilization Ponds	59
Centrifugation	59
Filtration	60
Flocculation and Sedimentation	60
Solid Waste Control Equipment	61
Rotary Kiln	61
Liquid Injection	61
Fluidized Bed	62
Multiple Hearth	62
Utilities	63
Electricity	63
Steam	63
Cooling Water	63
Water for General Use	64
Demineralized Water	64
Refrigeration	64
Compressed Air	64
Inert Gas Supplies	64
Transportation and Storage Equipment	65
Gases	65
Liquids	65
Solids	65
Summary	66
Chapter 7 Process Diagrams	68
Flow Sheets	68
Block Diagrams	69
Graphic Flow Diagrams	71
Process Flow Diagrams	71
Process Piping and Instrumentation Flow Diagrams	71
Summary	78

Chapter 8 Economic Considerations	80
Capital Equipment Costs	81
Operating Costs	84
Project Evaluation	85
Perturbation Studies in Optimization	88
Plant Siting and Layout	89
Raw Materials	90
Transportation	90
Process Water	90
Waste Disposal	91
Fuel and Power	91
Labor	92
Weather	92
Factors in Planning Layouts	92
Methods of Layout Planning	93
Modeling System Layouts	93
Principles of Plant Layout	93
Plant Design	96
Process Design	96
Summary	97
Part 1 References	98
Part 1 Summary	99
Part 2 Pollution Prevention Options	103
Chapter 9 From Pollution Control to Pollution Prevention	105
Overview	105
Regulations	109
The Pollution Prevention Act of 1990	110
EPA's Pollution Prevention Strategy	112
Hazardous and Toxic Chemicals	115
Differences	115
Federal Data Collection Requirements	116
Multimedia Approach and Energy Conservation	117
Multimedia Analysis Options	119
Energy Conservation	121
Small Quantity Generators	123
WRAP (Waste Reduction Always Pays)	126
Chemical Manufacturers Association Activities	129
Summary	133

Chapter 10 Pollution Prevention Assessment	135
Planning and Organization	137
Assessment Phase	139
Feasibility Analysis Phase	141
Implementation	143
Pollution Prevention Incentives	143
Economic Benefits	144
Regulatory Compliance	144
Reduction in Liability	145
Enhanced Public Image	145
Deterrents to Pollution Prevention	146
Summary	148
Chapter 11 Source Reduction	150
Source Reduction Options	150
Procedural Changes	150
Technology Changes	153
Input Material Changes	155
Product Changes	155
Impediments to Achieving Source Reduction	155
Summary	156
Chapter 12 Recycling	158
Recycling Options	159
Reuse	159
Additional On-Site Recovery	159
Recovery Off-Site	160
Sale for Reuse Off-Site	160
Energy Recovery	160
Recycling Technologies	161
Vapor-Liquid Separation	161
Solid-Liquid Separation	163
Liquid-Liquid Separation	164
Solute Recovery	165
Waste Exchange	168
Summary	168
Chapter 13 Incineration	170
Regulatory Compliance	171
Principles of Incineration	172
Ancillary Equipment	175
Rotary Kilns	176
Liquid Injection Incinerators	179

Other Incineration Methods	182
Fluidized Beds	182
Multiple Hearth Incinerators	183
Novel Incineration Technologies	183
Incinerator Emissions	184
Acid Gases	184
Oxides of Carbon	185
Total Hydrocarbons	186
Dioxins and Furans	186
Particulates and Metals	186
Incinerator Operation, Maintenance, Troubleshooting, and Safety	188
Advantages of Incineration Over Land Disposal	189
Summary	189
Chapter 14 Other Treatment Methods	191
Overall Considerations	192
Chemical Treatment	193
Calcination	193
Catalysis	194
Chlorinolysis	194
Electrolysis	195
Hydrolysis	196
Neutralization	196
Oxidation	197
Photolysis	198
Reduction	198
Biological Treatment	199
Activated Sludge	199
Aerated Lagoons	200
Anaerobic Digestion	201
Composting	201
Enzyme Treatment	202
Trickling Filters	202
Waste Stabilization Ponds	202
Physical Treatment	203
Resin Adsorption	204
Electrodialysis	204
Flotation	205
Freeze Crystallization	205
Air Stripping	206
Steam Stripping	206
Solidification	207
Summary	209

Chapter 15 Ultimate Disposal	210
Landfarming	211
Deep-Well Injection	213
Landfilling	214
Ocean Dumping	216
Summary	218
Part 2 References	219
Part 2 Summary	219
Part 3 Pollution Prevention Applications	223
Chapter 16 Introduction	225
Summary	227
Chapter 17 Commercial Printing	228
Process Description	229
Image Processing	233
Plate Processing	234
Printing	236
Waste Description	237
Pollution Prevention Options	239
Process Modifications	239
Recycling and Resource Recovery	243
Good Housekeeping and Operating Practices	244
Summary	245
Chapter 18 Metal Finishing Industries	248
Process Description	248
Waste Description	249
Pollution Prevention Options	249
Process Modifications	249
Recycling and Resource Recovery	255
Good Housekeeping and Operating Practices	257
Summary	259
Chapter 19 Electronics Industry	262
Process Description	262
Ingot Growth	263
Ingot Sandblasting and Cleaning	263
Ingot Cropping	264
Wafer Slicing	264
Wafer Washing	265
Wafer Lapping	265
Wafer Etching	265

Polishing	265
Epitaxial Growth	266
Waste Description	266
Pollution Prevention Options	267
Process Modifications	267
Resource Recovery and Recycling	268
Good Housekeeping and Operating Practices	268
Summary	268
Chapter 20 Drug Manufacturing and Processing Industry	271
Process Description	271
Fermentation	271
Chemical Synthesis	272
Natural Extraction	274
Formulation	274
Waste Description	275
Fermentation	275
Chemical Synthesis	275
Natural Extraction	275
Formulation	276
Pollution Prevention Options	276
Process Modifications	276
Resource Recovery and Recycling	279
Good Housekeeping and Operating Practices	280
Summary	281
Chapter 21 Paint Manufacturing Industry	284
Process Description	284
Waste Description	285
Pollution Prevention Options	287
Process Modifications	287
Resource Recovery and Recycling	288
Good Housekeeping and Operating Practices	289
Summary	289
Chapter 22 Pesticide Formulating Industry	291
Process Description	292
Waste Description	293
Pollution Prevention Options	296
Process Modifications	296
Resource Recovery and Recycling	297
Good Housekeeping and Operating Practices	297
Summary	297

Chapter 23 Paper and Pulp Industry	299
Process Description	299
Waste Description	301
Pollution Prevention Options	302
Process Modifications	302
Resource Recovery and Recycling	305
Good Housekeeping and Operating Practices	307
Summary	308
Chapter 24 Other Industries—General Medical/Surgical Hospitals, and Research/Educational Institutions	310
General Medical and Surgical Hospitals (GMSH)	310
Waste Description (GMSH)	311
Pollution Prevention Options (GMSH)	312
Process Modifications	312
Resource Recovery and Recycling	315
Good Housekeeping and Operating Practices	315
Research and Educational Institutions (REI)	316
Waste Description (REI)	317
Pollution Prevention Options (REI)	318
Summary	319
GMSH	319
REI	320
Part 3 References	321
Part 3 Summary	323
Part 4 Case Studies	329
Chapter 25 Case Study A: A Commercial Printing Plant	331
Process and Waste Description	331
Pollution Prevention Via Process Modifications	332
Pollution Prevention Via Resource Recovery and Recycling	334
Pollution Prevention Via Better Housekeeping and Operating Practices	335
Summary	336
Chapter 26 Case Study B: A Paint Manufacturing Plant	338
Process and Waste Description	338
Solvent-Based Paints	338
Water-Based Paints	340
Pollution Prevention Via Process Modifications	342
Pollution Prevention Via Resource Recovery and Recycling	343

Pollution Prevention Via Better Housekeeping and Operating Practices	344
Summary	346
Chapter 27 Other Case Studies	348
Case 1—Fabric Coating	348
Problem Description	348
Pollution Prevention Technique(s) Used	348
Benefit(s)	348
Case 2—Molybdenum Mining	349
Problem Description	349
Pollution Prevention Technique(s) Used	349
Benefit(s)	349
Case 3—Industrial Tape Manufacturing	349
Problem Description	349
Pollution Prevention Technique(s) Used	349
Benefit(s)	349
Case 4—Silver Reader Paper Manufacturing	350
Problem Description	350
Pollution Prevention Technique(s) Used	350
Benefit(s)	350
Case 5—Electronic Circuit Manufacturing	350
Problem Description	350
Pollution Prevention Technique(s) Used	351
Benefit(s)	351
Case 6—Coating of Medicine Tablets	351
Problem Description	351
Pollution Prevention Technique(s) Used	351
Benefit(s)	351
Case 7—Manufacture of Adhesives/Resins/Polymers	352
Problem Description	352
Pollution Prevention Technique(s) Used	352
Benefit(s)	352
Case 8—Manufacture of Defluorinated Phosphate	352
Problem Description	352
Pollution Prevention Technique(s) Used	353
Benefit(s)	353
Case 9—Fabrication of Pipe Fittings	353
Problem Description	353
Pollution Prevention Technique(s) Used	353
Benefit(s)	353

Case 10—Metal Finishing of Power Tools	353
Problem Description	353
Pollution Prevention Technique(s) Used	354
Benefit(s)	354
Case 11—Small Appliance Manufacture	354
Problem Description	354
Pollution Prevention Technique(s) Used	354
Benefit(s)	355
Case 12—Manufacture of Printed Circuit Boards	355
Problem Description	355
Pollution Prevention Technique(s) Used	355
Benefit(s)	355
Case 13—Lube Oil Packaging and Warehouse	356
Problem Description	356
Pollution Prevention Technique(s) Used	356
Benefit(s)	356
Case 14—Automotive Remanufacturing	356
Problem Description	356
Pollution Prevention Technique(s) Used	356
Benefit(s)	356
Case 15—Manufacture of Solvents and Chemical Additives	357
Problem Description	357
Pollution Prevention Technique(s) Used	357
Benefit(s)	357
Summary	357
Part 4 References	358
Part 4 Summary	358
Index	361
