	Page
Preface	ix
1. What is Pollution?	1
1.1 The Natural Changeability of the Environment	1
1.2 Comparison of Anthropogenic and Natural Environmental Changes	3
1.3 Assessment of Environmental Pollution factors	4
2. Changes in the Atmosphere	5
2.1 Dusts and Aerosols	5
2.2 Gases	22
3. Impairment of Ground Water and Surface Water	67
3.1 Assessment Criteria for Water Pollution	68
3.2 Organic Residues	71
3.3 Inorganic Residues	80
3.4 Purification Procedures	90
4. Ground and Soil Pollution	101
4.1 Structure and Composition of Soil	101
4.2 Hardening of Soil	102
4.3 Changes to the Soil through Specific Types of Land Use	103
4.4 Anthropogenic Pollutant Damage	104
4.5 Soils as a Part of Landscapes and Living Habitats	110
5. Generally Widespread Materials (Ubiquists)	113
6. Foodstuffs and Confections	129
6.1 Pollution in Food Production	129
6.2 Preparation of Food and Confections	132
6.3 Food Preservatives and Packaging	134
6.4 Mycotoxins, Phytoplankton Toxins and Bacterial Toxins	136
6.5 Naturally Occurring Toxins in Vegetable Foodstuffs	143
7. Basic Consumer Goods	149
7.1 Pesticides	149
7.2 Cleaning Agents and Detergents	156
7.3 Dry Cleaning, Solvents, Paints and Varnishes	157
7.4 Cosmetics and Toilet Articles	158
8. Radioactivity	161
8.1 What is Radioactivity?	161
8.2 Physical and Biological Half-lives of Radionuclides	163
8.3 Radiation-induced Reactions in Tissue	164
8.4 The Problem of Assessing Threshold Values	168
8.5 Sources of Artificial Radioactivity in the Environment	169
8.6 Nuclear Weapons and the Nuclear Winter	172
9. Outlook	175
Glossary	177
Literature	181
Index	183
