

## CONTENTS

### Preface

1. Introduction to Modeling the Transport and Transformation of Contaminants in the Environment	1
2. Nature of Environmental Pollutants	28
3. Intermedia Contaminant Transfer: Equilibrium Analysis	72
4. Kinetics of Intermedia Pollutant Transfer	115
5. Transport Fundamentals	165
6. Overview of Numerical Methods in Environmental Modeling	206
7. Overview of Probabilistic Methods and Tools for Modeling	239
8. Models of Transport in Air	280
9. Models of Transport in Soil and Groundwater	315
10. Models of Transport in Surface Water	378
11. Atmospheric Transformations and Loss Processes	433
12. Modeling Chemical Transformations in Water	475
13. Exposure and Risk Assessment	532
14. Tools for Evaluation, Analysis, and Optimization of Environmental Models	585

Bibliography	627
Index	673
