

CONTENTS

	Page
Preface	iii
Contributors	vii
I. Surfactants	
1. Loading Surface Water with Surfactants	3
2. Physicochemical Interactions of Surfactants and Contaminants in Soil	39
3. Analytical Methods for Surfactants and Complexing Agents at Concentrations Relevant to Environmental Occurrence	65
II Zeolites	
4. Zeolites in the Environment	127
III Polycarboxylates	
5. Significance of Polycarboxylates in Detergents	197
6. Trace Analysis of Polycarboxylates in Water	211
7. Interactions of polycarboxylates with Major Inorganic Soil Components	225
8. Biological and Physicochemical Aspects of Polycarboxylate Behavior in the Environment	247
IV Complexing Acids	
9. Nitrilotriacetic Acid : Physicochemical and Ecological Properties	265
10. Physicochemical Properties of Ethylene Dinitrilotetraacetic Acid and Consequences for Its Distribution in the Aquatic Environment	289
Index	313
