

# CONTENTS AND SUBJECT INDEX

## SECTION I ALTERNATIVE TECHNOLOGIES

### **SURFACE CLEANING BY LASER ABLATION**

*H.C. Peebles, N.A. Creager, and D.E. Peebles*

<b>Introduction</b> .....	2
<b>Techniques and Procedures</b> .....	2
<b>Results and Discussion</b> .....	3
<b>Summary and Conclusions</b> .....	5

### **CO<sub>2</sub> PELLET BLASTING FOR PAINT STRIPPING/COATINGS REMOVAL** . 11

*Wayne N. Schmitz*

<b>MCAIR's Motivation</b> .....	11
<b>The Search</b> .....	11
<b>The MCAIR Choice/Rationale</b> .....	12
<b>CO<sub>2</sub> Pellet Blasting Concerns</b> .....	12
<b>Future Plans</b> .....	13

### **THE EVALUATION OF ALTERNATIVES TO OZONE-DEPLETING CHLOROFLUOROCARBONS** .....

14

*Robin L. Sellers*

<b>Introduction</b> .....	14
<b>Ad Hoc Solvents Working Group and the Cleaning and Cleanliness Test Programs</b> .....	14
<b>Test Monitoring and Validation Committee</b> .....	17
<b>Progress/Phase I</b> .....	17
<b>Progress/Phase II</b> .....	17
<b>Progress/Phase III</b> .....	18
<b>Conclusions</b> .....	18
<b>References</b> .....	19

**SPRAY FORMING AS A NEW PROCESSING TECHNIQUE** . . . 24  
*Scott A. Ploger and Lloyd D. Watson*

- Introduction** . . . . . 24
- Background** . . . . . 24
- Activities of Custom Spray Technologies, Inc.** . . . . . 25
- Development Methodology** . . . . . 26
- Solvent Substitution Applications** . . . . . 26
- Conclusions** . . . . . 28
- References** . . . . . 28

**REDUCTION OF SOLVENT USE THROUGH FLUXLESS SOLDERING** 30  
*F. Michael Hosking*

- Introduction** . . . . . 30
- Fluxless Soldering Technology Overview** . . . . . 31
- Controlled Atmosphere Soldering Technologies** . . . . . 32
- Summary** . . . . . 34
- References** . . . . . 34

**PLASMA STRIPPING OF MAGNETIC COMPONENTS** 41  
*T.J. Gillespie and T. Mehrhoff*

- Introduction** . . . . . 41
- Plasma Process Development** . . . . . 41
- Product Process Development** . . . . . 42
  - Ferrite Core Inductor . . . . . 42
  - Winding Development . . . . . 42
- Plasma Stripping of Magnetic Assemblies** . . . . . 42
- Alternate Method of Stripping Assemblies** . . . . . 43
- Conclusions** . . . . . 43

**SODIUM BICARBONATE BLASTING FOR PAINT STRIPPING** . . . . . 47  
*N.E. Wasson Jr. and Michael N. Haas*

- Background** . . . . . 47
- Corrosion Testing** . . . . . 47
- Waste Characterization** . . . . . 48
- Process Optimization** . . . . . 48
- Material Characterization** . . . . . 48
- Summary** . . . . . 49

**LOW TOXICITY PAINT STRIPPING OF ALUMINUM AND COMPOSITE SUBSTRATES** . . . . . 50  
*Nona Larson*

- Introduction—Part 1** . . . . . 50
- Objective** . . . . . 50
- Approach** . . . . . 50
  - Task 1: Evaluate Chemical Strippers . . . . . 50
  - Task 2: Evaluate Non-Chemical Stripping Methods . . . . . 50
  - Task 3: Specification Coverage . . . . . 50
- Chemical Stripper Alternatives** . . . . . 50
- Technical Accomplishments** . . . . . 51

Wheat Starch Media .....	51
Composite Testing .....	51
Aluminum Testing .....	51
<b>Summary</b> .....	51
Discussion of Envirostrip Wheat Starch Blasting .....	51
Envirostrip Properties: Explosive Limits .....	52
Discussion/Results of Other Methods .....	52
Xenon Flashlamp Depainting .....	52
Laser Depainting .....	52
Sodium Bicarbonate Blasting .....	53
Carbon Dioxide Pellet Blasting .....	53
Plastic Media Blasting .....	53
Ice Crystal Blasting .....	53
General Concerns .....	54
<b>Conclusions</b> .....	54
<b>Fluidized Bed Absorbent Cleaning—Part 2</b> .....	54
<b>References</b> .....	56

**PRECISION PARTS CLEANING WITH SUPERCRITICAL CARBON DIOXIDE** 76

*Paula M. Gallagher and Val J. Krukonis*

<b>Introduction</b> .....	76
<b>Background</b> .....	76
<b>Previous Results</b> .....	77
<b>Preliminary Cleaning Data</b> .....	80
Process Operation .....	80
<b>Results</b> .....	80
<b>Summary</b> .....	81

**CARBON DIOXIDE PELLET BLASTING PAINT REMOVAL FOR POTENTIAL APPLICATION ON WARNER ROBINS MANAGED AIR FORCE AIRCRAFT** .. 88

*Randall B. Ivey*

<b>Introduction</b> .....	88
<b>Chemical Paint Stripping Defined</b> .....	88
<b>Plastic Media Blasting Defined</b> .....	88
<b>Carbon Dioxide Pellet Blasting—A Possible Solution</b> .....	89
<b>Carbon Dioxide Test Programs and Preliminary Results</b> .....	89
<b>Conclusions</b> .....	90

**ALTERNATIVE TECHNOLOGIES FOR ENVIRONMENTAL COMPLIANCE** .. 92

*J. Michael Locklin*

<b>Douglas Aircraft Company Programs</b> .....	92
High Solids Topcoats .....	93
Chrome Elimination .....	93
1. Detonation Gun Coatings .....	94
2. Plasma Spray .....	94
3. Electroless Nickel .....	94
Vapor Degreasing .....	94
Handwipe Solvents .....	95
CFC Elimination .....	95

Resource Recovery/Waste Minimization	95
Summary . . . . .	96

**HIGH PRESSURE SUPERCRITICAL CARBON DIOXIDE EFFICIENCY IN REMOVING HYDROCARBON MACHINE COOLANTS FROM METAL COUPONS AND COMPONENTS PARTS . . . . . 98**

*Robert F. Salerno*

<b>Introduction</b> . . . . .	98
<b>Scope of Experimentation</b> . . . . .	99
<b>Process Equipment</b> . . . . .	99
Screening Unit . . . . .	99
Feasibility Unit . . . . .	99
<b>Test Coupons and Components</b> . . . . .	100
<b>Materials</b> . . . . .	101
Carbon Dioxide . . . . .	101
Machine Coolants . . . . .	101
<b>Experimental Procedures</b> . . . . .	101
Cleaning . . . . .	101
<b>Analytical</b> . . . . .	101
Hexane Rinse . . . . .	101
Capillary GC Analysis . . . . .	101
<b>Results</b> . . . . .	101
<b>Conclusions</b> . . . . .	102
<b>Discussion</b> . . . . .	102

**CLOSED LOOP ALTERNATIVE TO THE USE OF HAZARDOUS CHEMICALS IN INDUSTRY . . . . . 108**

*Dan Suci*

<b>Introduction</b> . . . . .	108
<b>Cleaning Chemicals</b> . . . . .	108
<b>Cleaning Equipment</b> . . . . .	109
<b>Parts Handling</b> . . . . .	109
<b>Cleaning Process</b> . . . . .	109
<b>Bath Contamination</b> . . . . .	110
<b>Construction Materials</b> . . . . .	110
<b>Waste Treatment</b> . . . . .	111
<b>Conclusions</b> . . . . .	111

**SECTION II  
ALTERNATIVE SOLVENTS**

**BIODEGRADABLE SOLVENT SUBSTITUTION . . . . . 114**

*Anne E. Copeland*

<b>Introduction</b> . . . . .	114
<b>Approach</b> . . . . .	114
Phase I . . . . .	114
Phase II . . . . .	115
Phase III . . . . .	115
<b>Results and Conclusions</b> . . . . .	115
