Introduction	9
Chapter I      Harmful Waste Gases and Dust Evolved in Sintering and Pelletizing	13
1-1      Air Pollution at Sintering Plants	13
1-2      Amount of Gases Exhausted in Sintering	14
1-3      Content of Dust in Sintering Gases	16
1-4      Physicochemical Properties of Dust Contained in Sintering Gases	17
1-5      Content of Sulphur Dioxide and Carbon Monoxide in Sintering Gases	18
1-6      Waste Gases and Dust Produced in Handling and Treatment of Materials at Sintering Plants	21
1-7      Air Pollution at Pelletizing Plants	25
1-8      Physicochemical Properties of Dust Evolved in Pelletizing	27
1-9      Waste Gases and Dust Produced in Handling and Treatment of Materials at Pelletizing Plants	28
1-10     Recommendations for Estimating and Reducing Air Pollution	31
Chapter II     Harmful Waste Gases and Dust Evolved in Manufacture of Cast Iron in Blast Furnaces	33
2-1      Air Pollution at Blast Furnace Plants	33
2-2      Amount of Blast-Furnace Gases Evolved	34
2-3      Content of Dust in Blast-Furnace Gas	35
2-4      Content of Carbon Monoxide and Sulphur Dioxide in Blast-Furnace Gas	37
2-5      Dust Produced in Handling and Treatment of Raw Materials	40
2-6      Waste Gases and Dust Produced in Handling and Treatment of Molten Metal and Slag	42
2-7      Recommendations for Estimating and Reducing Air Pollution	48
Chapter III    Air Pollution in Manufacture of Steel by the Open-Hearth Process	50
3-1      Amount of Escaping Combustion Products	50
3-2      Amount of Combustion products Along flue System	56
3-3      Amount of Dust Exhausted with Combustion Products	57
3-4      Amount of Oxides of Sulphur Exhausted with Combustion Products	62
3-5      Amount of Oxides of Nitrogen Exhausted with Combustion Products	65
3-6      Physicochemical Properties of Dust Evolved	70
3-7      Amount of Non-Process Waste Gases and Dust Evolved	75
3-8      Recommendations for Estimating and Redueing Air Pollution	78
Chapter IV    Air Pollution in Manufacture of Steel by the Bessemer Converter Process	82
4-1      Amount of Converter Gases Evolved	82
4-2      Amount of Dust Generated	94
4-3      Chemical and Mineralogical Composition of Converter Dust	98
4-4      Particle-Size Distribution in Converter Dust	100
4-5      Amount of Sulphur Carried Away with Converter Gases	108
4-6      Amount of Oxides of Nitrogen and Carbon Monoxide in Converter	110
4-7      Amount of Non-Process Waste Gases and Dust Evolved	110
4-8      Recommendations for Estimating and Reducing Air Pollution	111
Chapter V     Air Pollution in Manufacture of Steel by the Electric-Arc Process	114
5-1      Amount of Process Gases Evolved	114
5-2      Amount of Dust Generated	117
5-3      Amount of Harmful Substances Produced	121
5-4      Amount of Non-Process Waste Gases Evolved	121

5-5	Recommendations for Estimating and Reducing Air Pollution	122
Chapter VI	Air Pollution in Production of Ferroalloys	123
6-1	Classification of Process and Equipment	123
6-2	Waste Gases and Dust Exhausted from Smelting Furnaces	125
6-3	Waste Gases and Dust Exhausted from Refining Furnaces	130
6-4	Waste gases and Dust Evolved in Aluminothermic Process	133
6-5	Recommendations for Estimating and Reducing Air Pollution	133
Chapter VII	Air Pollution in Rolling Mills	135
7-1	Process Gases Evolved in Hot-Rolling Mills	135
7-2	Non-Process Gases and Dust Evolved in Hot-Rolling Mills	137
7-3	Process Waste Gases and Dust Evolved in Shops where Metal is Fire-Trimmed	140
7-4	Harmful Substances Evolved in Picking Baths of Pipe-Welding and Sheet-Rolling Plants	142
7-5	Recommendations for Estimating and Reducing Air Pollution	144
Chapter VIII	Air and Water Pollution in Plants for Continuous Casting of Steel and in Slab Storerooms	146
8-1	Harmful Waste Gases and Dust Evolved in Continuous Steel-Casting Plants (CSCP)	146
8-2	Air Pollution in Slab Storerooms	148
8-3	Recommendations for Reducing Air and Water Pollution	149
Chapter IX	Air Pollution in Manufacture of Refractories	151
9-1	Classification of Air-Polluting Plant Units in Manufacture of Refractory Materials	151
9-2	Amount of Gases and Dust Generated in Furnaces for Calcining Clay to Obtain Fireclay	151
9-3	Amount of Gases and Dust Generated in Furnaces for Calcining Clay to Obtain Fireclay	155
9-4	Amount of Gases and Dust Exhausted from Furnaces for Calcining Magnesite and Sea-Water magnesium Hydroxide	157
9-5	Amount of Dust and Harmful Gases Exhausted from Electric-arc Furnaces for Producing Magnesite (MgO) from Magnesite	159
9-6	Amount of Gases and Dust Evolved in Furnaces for Calcining Limestone	161
9-7	Harmful Gases and Dust Evolved in Furnace Units for Firing Refractories	163
9-8	Amount of Dust Generated in Drying Starting Materials for Producing Refractories	163
9-9	Amount of Non-Process Gases and Dust Evolved	164
9-10	Recommendations for Reducing Air Pollution	164
Chapter X	Air Pollution in Foundries	165
10-1	General Characteristics of harmful Waste Gases and Dust Evolved	165
10-2	Amount of Dust Evolved in Department for Preparation of Moulding Sands in Steel Foundries	165
10-3	Generation of Dust in Department for Removal of Castings from Moulds in Steel Foundries	166
10-4	Amount of Dust Generated When Finishing Steel Castings	169
10-5	Amount of Harmful Gases Evolved in Steel Foundries	171
10-6	Amount of Process Gases and Harmful Substances Exhausted from Cupola Furnaces in Iron Foundries	171
10-7	Amount of Gases Evolved when Pouring Cast Iron Foundries	174
10-8	Amount of Harmful Substances Evolved when Drying Moulds and Cores in Iron Foundries	174
10-9	Amount of Dust Exhausted with Air in Iron Foundries	175
10-10	Conclusions and Recommendations for Reducing Air Pollution	175
Chapter XI	Air Pollution in the By-Product coke Industry	178
11-1	Gases and Dust Evolved in Department for Preparation of Coal	178
11-2	Gases and Dust Evolved in Coking Plant	181
11-3	Gases and Dust Evolved in Plant for Collection of Coking By-Products	185

11-4	Amount of Harmful Substances Evolved in Plant for Rectification of Benzene	199
11-5	Harmful Substances Evolved in Desulphurization Plant	200
11-6	Harmful Substances Evolved in Plant for Processing of coal Tar	204
11-7	Recommendation for Reducing Air Pollution	207
Chapter XII	Air Pollution in Power Plants	210
