

## CONTENTS

1. Systems for Continuous Stack Emission Monitoring	1
2. Continuous Particulate Mass Measurements in Stack Emissions	45
3. Isokinetic Stack Testing	65
4. Investigations and Evidence of Air Pollution	123
5. Federal Air Data Base Systems-Aerometric and Emissions Reporting Systems	141
6. Modeling Atmospheric Dispersion of Pollutants	167
7. Design of Chimneys and Stacks for Pollution Control	179
8. Particle Dynamics	215
9. Gravity Settling Chambers	263
10. Cyclones	281
11. Fabric Filter Dust Collectors	317
12. European Bathhouse Design	371
13. Electrostatic Precipitators	385
14. Electrostatics-Overview	399
15. Carbon Adsorption Applications	421
16. Dust Retardant	431
17. Thermal Incineration	449
18. Thermal Incineration Economics	469
19. Heat Recovery	483
20. Heat Recovery Cost Justification and Systems	353
21. Catalytic Incineration	543
22. Waste Treatment by Fluidized Bed Thermal Oxidation	565
23. No <sub>x</sub> Control in Central Station Steam Boilers	585
