PART A EVALUATION OF EMISSION CONTROL TECHNOLOGIES

I. SUMMARY AND CONCLUSIONS	2
Reference	6
II. INTRODUCTION	7
A. Objective	7
B. Framework for the Analysis	7
C. Hazardous Waste Treatment, Storage and Disposal Facility— Definitions and Descriptions	11
1. Landfills	11
2. Land Treatment	12
3. Surface Impoundments.	12
4. Storage and Treatment Tanks	13
D. Controls/Definitions and Description	13
1. Pretreatment Controls	13
2. Design and Operating Practices.	14
3. In-Situ Controls	14
4. Post-Treatment Techniques	14
References	16
III. CONTROLS FOR SURFACE IMPOUNDMENTS	17
A. Surface Impoundment Description	17
1. Definition	17
2. Types, Construction and Uses	17
3. Operation	18
3.1 Active.	18
3.2 Closure	20

3.3 Post-Closure	23
B. Emission Sources and Models.	23
1. General Description of Factors Affecting Emissions	23
Active	23
Closure	24
Post-Closure	24
2. Emission Models	25
Gas Film, Nonaerated.	27
Liquid Film, Nonaerated.	28
Gas-Film, Aerated	29
Liquid Film, Aerated	30
Floating Immiscible Organic Layer	32
3. Parameters that Control Emissions	32
C. Potential Controls	33
1. Introduction.	33
2. Pretreatment	34
3. Design and Operating Practices.	34
3.1 Design.	35
3.1.1 Surface Area Minimization	35
3.1.2 Freeboard Depth.	35
3.1.3 Inflow/Outflow Drainage Pipe Locations	36
3.2 Operating Practices—Active.	36
3.2.1 Temperature of Influent	36
3.2.2 Dredging, Draining, and Cleaning Frequency.	37
3.2.3 Handling of Sediments and Sludge	37
3.3 Operating Practices—Closure	37
3.3.1 Dewatering.	37
3.3.2 Proper Consolidation	38
3.3.3 Fugitive Dust Abatement	38
4. In-Situ Controls	39
4.1 Rafts.	39
4.2 Barriers	41
4.3 Shades.	41
4.4 Synthetic Covers	43
4.5 Floating Spheres	44
4.6 Surfactant Layers	46
5. Post-Treatment.	48
5.1 Gaseous Carbon Adsorption	49
5.2 Afterburners.	50
D. Effectiveness of Surface Impoundment Controls	52
1. Methodology	52
1.1 Selection of Parameter Values	52
1.2 Calculation of Mass Transfer Coefficients and Emissions	52
1.3 Emission Reduction and Efficiencies of Controls.	55
1.4 Cost-Effectiveness of Controls	55
2. Parameters.	56
3. Mass Transfer Coefficients and Emissions.	58
4. Emissions Reduction and Efficiencies	58

Rafts	66
Barriers	71
Shades	71
Floating Spheres	71
Post-Treatment	72
5. Costs	72
Pretreatment	72
In-Situ Controls	72
Rafts	72
Barriers	77
Shades	77
Spheres	77
Post-Treatment	78
6. Cost-Effectiveness of Controls	80
E. Summary	85
F. References	86
IV. CONTROLS FOR TANKS	89
A. Tank Description	89
1. Definition	89
2. Types, Construction and Uses	89
3. Operation	90
B. Emission Sources and Models	90
1. General Description of Factors Affecting Emissions	90
2. Emission Models	91
3. Parameters that Control Emissions	91
C. Potential Controls	91
1. Summary of Applicable Controls	91
2. Pretreatment	91
3. Design and Operating Practices	94
4. In-Situ Controls	94
4.1 Fixed Roofs	94
4.2 Floating Roofs	95
4.3 Rafts	96
4.4 Floating Spheres	96
5. Post-Treatment	96
D. Effectiveness of Tank Controls	97
1. Methodology	97
1.1 Selection of Parameter Values	97
1.2 Calculation of Mass Transfer Coefficients and Emissions	97
1.3 Emission Reduction and Efficiencies of Controls	98
1.4 Cost-Effectiveness of Controls	98
2. Parameters	99
3. Emissions	99
4. Emissions Reduction and Efficiencies	99
In-Situ	99
Post-Treatment	103
5. Costs	103

Pretreatment	103
In-Situ Controls	103
Post-Treatment	103
6. Cost-Effectiveness of Controls	105
E. Summary	110
References	112
V. LANDFILLS	114
A. Landfill Description	114
B. Emission Sources and Models	115
1. General	115
2. Emission Models	116
Covers	116
Bulk Liquids	119
Bulk Solids	119
3. Controlling Parameters	120
Covers	120
Working Faces	120
C. Controls	120
1. Introduction	120
2. Pretreatment	121
3. Design and Operating Practices	121
3.1 Handling Bulk Liquids or Solids	121
3.2 Temporary Cover Practices	121
3.3 Final or Permanent Covers	127
4. In-Situ Controls	129
5. Post-Treatment	129
D. Effectiveness	130
1. Introduction	130
2. Effectiveness	130
2.1 Covers	130
2.2 Post-Treatment	136
3. Costs	138
3.1 Pretreatment	138
3.2 Design and Operating Practice	138
3.3 In-Situ Controls	138
3.4 Post-Treatment	138
4. Cost-Effectiveness	141
E. Summary	142
F. References	143
VI. LAND TREATMENT FACILITIES	144
A. Description	144
B. Emission Sources and Models	145
1. General	145
2. Emission Models	145
2.1 Surface Emissions	145
2.2 Emissions from Incorporated Wastes	146

3. Controlling Parameters	148
3.1 Liquid Pools	148
3.2 Incorporated Wastes	148
C. Controls	149
1. Introduction	149
2. Pretreatment	149
3. Operating Practices	149
4. In-Situ Controls	150
5. Post-Treatment	150
D. Effectiveness	151
1. Introduction	151
2. Emissions Reduction and Effectiveness	151
3. Costs	155
3.1 Pretreatment	155
3.2 Operating Practices	155
3.3 Post-Treatment	155
4. Cost Effectiveness	155
E. References	156

**PART B
EVALUATION OF MODELS FOR ESTIMATING AIR EMISSIONS**

ACKNOWLEDGMENT	158
1. INTRODUCTION	159
Background and Purpose	159
Project Scope and Technical Approach	159
Technical Introduction	161
Background	161
General Discussion of Available Models	164
2. SUMMARY AND CONCLUSIONS	168
Introduction	168
Availability and Selection of Mass Transfer Coefficients (K-Values)	169
Soil-Phase Mass Transfer Coefficient (k_{soil} , k_s)	169
Liquid-Phase Mass Transfer Coefficient (k_{liquid} , k_L)	174
Molecular Diffusion— k_L for No Wind Conditions	174
Turbulent Diffusion from Wind and Flow Effects	174
Turbulent Diffusion from Mechanical Mixing	180
Gas-Phase Mass Transfer Coefficients (k_{gas} , k_G)	181
Overall Mass Transfer Coefficient (K-Value)	184
Special Case for Overall K-Value	185
Selection of Most Appropriate AERR Models	186
Surface Impoundment (SI) Model Selection	186
Landfill Model Selection	188
Open Dump Models	190
Landfarming Model Selection	190
Storage Tank Model Selection	192

Waste Treatment Processes	192
Open Tank with Mixing	194
Biological Treatment Systems	194
Waste Piles (Particulate Emissions)	197
3. AERR MODEL VALIDATION EFFORTS REPORTED IN THE LITERATURE	198
Introduction.	198
AERR Model Comparison with Field Data.	198
Thibodeaux, Parker and Heck (1981d)	198
Cox, Steinmetz and Lewis (1982)—Draft Report	200
Thibodeaux, et al (1982)	200
Ames, et al (1982)	201
Additional Data Available.	201
4. REVIEW OF SURFACE IMPOUNDMENT AERR MODELS	203
Introduction.	203
Nonaerated Surface Impoundments	204
Mackay and Wolkoff (1973)	204
Mackay and Leinonen (1975)	210
Thibodeaux, Parker and Heck (1981d) Including Hwang (1982) and Shen (1982) Modifications.	212
Smith, Bomberger and Haynes (1980–1981).	218
McCord (1981)	222
Aerated Impoundments	222
Thibodeaux, Parker, Heck (1981d)	222
McCord (1981)	226
5. REVIEW OF LANDFILL AERR MODELS	230
Introduction.	230
Farmer, et al (1978) for Covered Landfills	236
Shen's (1980) Modification of Farmer's Equation	239
Thibodeaux's (1981a, 1981b) Landfill Equations	241
Without Internal Gas Generation	241
With Internal Gas Generation.	241
Barometric Pumping Effects	241
Shen's (1980) Open Dump Equation.	242
6. REVIEW OF LAND TREATMENT AERR MODELS	243
Introduction.	243
Thibodeaux-Hwang: Modeling Air Emissions from Landfarming of Petroleum Wastes (1982).	243
Hartley Model (1969).	247
7. STORAGE TANK AIR EMISSION ESTIMATION TECHNIQUES	249
Introduction.	249
Fixed Roof Tanks	250
External and Internal Floating Roof Tanks	253

External Floating Roof Tanks	253
Internal Floating Roof Tanks.	259
Recommended Emission Estimation Techniques for Floating Roof Tanks	259
Other Storage Tank Models	263
Storage Tank Model Developed in the USSR.	263
Outdated/Nonrecommended Models for Floating Roof Tanks	267
Special Considerations	267
Storage of Mixtures	267
Open Storage Tanks.	270
8. AIR EMISSION ESTIMATION TECHNIQUES FOR WASTEWATER TREATMENT PROCESSES	271
Introduction.	271
Open Tank System—No Mixing	272
Open Tank-Mixing: Biological Treatment Systems	272
Hwang (1980) Activated Sludge Surface Aeration	273
Biodegradation Kinetics	278
Determination of Biokinetics Rate Constants	281
Air Stripping Kinetics.	282
Adsorption on Sludge.	282
Determination of Adsorption Rate Constants	283
Freeman (1979) Activated Sludge Surface Aeration Model	284
Mass Transfer	284
Biokinetics.	285
Model Solution	286
Biokinetic Rate Constant Determination	288
Freeman (1980) Diffused Air (Subsurface) Activated Sludge Model	288
Mass Transfer	288
Other Activated Sludge Models	290
Publicly Owned Treatment Works (POTWs)	290
Selection of Biological AERR Model.	292
Model Flexibility.	292
Model Simplicity.	293
Model Accuracy	295
Model Assumptions	295
Complete Mix Reactor	295
Mass Transfer	296
Biokinetics Model	296
Sludge Adsorption.	296
Model Selection	296
9. AIR EMISSIONS FROM DRUM STORAGE AND HANDLING FACILITIES	298
Introduction.	298
Description of Drum Storage and Handling Facilities	298
Source of Volatile Air Emissions	299

Literature Survey	299
Other Considerations	302
10. PARTICULATE EMISSIONS ESTIMATION TECHNIQUES FOR WASTE PILES	303
Introduction.	303
AP-42 Emission Factor Equation for Storage Piles	303
MRI Emission Factor Equations for Storage Piles	304
APPENDIX A: REFERENCES	307
APPENDIX B: DERIVATION OF CURRIE WET SOIL CORRELATION FOR EFFECTIVE DIFFUSIVITY	314

**PART C
PROPERTIES AND CATEGORIZATION OF WASTES**

1. INTRODUCTION	318
1.1 Background	318
1.2 Purpose and Scope.	319
2. METHODOLOGY	322
2.1 Physical-Chemical Properties	322
Vapor Pressure	322
Solubility.	322
Henry's Law Constant	323
Molecular Weight.	323
Relative Soil Volatility	323
Diffusion Coefficient	324
2.2 Data Gathering/Estimation Methods	325
Vapor Pressure	325
Solubility.	326
Henry's Law Constant	326
3. DATA GATHERING AND CATEGORIZATION RESULTS	332
3.1 Physical-Chemical Properties and Relative Soil Volatility	332
3.2 Categorization of RCRA Wastes According to Vapor Pressure	332
3.3 Categorization of RCRA Wastes According to Aqueous Volatility	333
3.4 Categorization of RCRA Wastes According to Relative Soil Volatility	333
3.5 Diffusion Coefficients of Highly Volatile RCRA Wastes	334
4. SUMMARY AND RECOMMENDATIONS	337
5. REFERENCES	339

APPENDIX A: PHYSICAL-CHEMICAL PROPERTIES AND RELATIVE SOIL VOLATILITY OF RCRA WASTES 342

APPENDIX B: RCRA WASTE CATEGORIZATION BASED ON VAPOR PRESSURE (VOLATILITY OF PURE SUBSTANCES) 384

APPENDIX C: RCRA WASTE CATEGORIZATION BASED ON AQUEOUS VOLATILITY (HENRY'S CONSTANT) 393

APPENDIX D: RCRA WASTE CATEGORIZATION BASED ON RELATIVE SOIL VOLATILITY 402

APPENDIX E: DIFFUSION COEFFICIENTS IN AIR AND WATER FOR RCRA WASTES IDENTIFIED AS HIGHLY VOLATILE FROM WATER. 410

APPENDIX F: DIFFUSION COEFFICIENTS IN AIR AND WATER FOR RCRA WASTES IDENTIFIED AS HIGHLY VOLATILE FROM SOIL. 412
