

CONTENTS

PREFACE	v
CHAPTER 1. BACKGROUND FOR ANALYSIS	1
I. Introduction	1
II. Definition of Air	1
III. Functions of Air	4
IV. Definition of Air Pollution	4
V. Classification of Pollutants	5
VI. Units for Quantification of Air Pollution	7
VII. Extent of Air Pollution	8
VIII. Summary	28
Problems	29
Bibliography	29
CHAPTER 2. SOURCES OF AIR POLLUTION	31
I. Introduction	31
II. Some Relevant Combustion Facts	32
III. Transportation	34
IV. Industry	40
V. Summary	81
Problems	82
Bibliography	83
CHAPTER 3. ATMOSPHERIC TRANSPORT OF POLLUTANTS	85
I. Introduction	85
II. Winds	85
III. Convective Currents	100
IV. Turbulence	103
V. Dispersion Models	105

VI.	Particle Deposition	124
VII.	Gaseous Removal	127
VIII.	Applications	129
IX.	Transport Other than Wind-Carry	131
X.	Summary	132
	Problems	134
	Bibliography	134
CHAPTER 4. STATISTICS FOR AIR SAMPLING AND ANALYSIS		137
I.	Introduction	137
II.	Frequency Histograms and Frequency Curves	137
III.	Frequency Characteristic Parameters	138
IV.	Binomial Distribution	144
V.	Poisson Distribution	144
VI.	Normal Distribution	145
VII.	Confidence Limits or Error Limits	146
VIII.	Skewed Distributions	147
IX.	Use of Special Probability Graphs	149
X.	Regression and Curve Fitting	151
XI.	Statistics of Radiation Counting	154
XII.	Error Propagation	154
XIII.	Significance Tests	155
XIV.	Statistics of Recorder Traces	158
XV.	Summary	159
	Problems	160
	Bibliography	160
CHAPTER 5. PROPERTIES OF GASEOUS AND PARTICULATE MATTER		161
I.	Gaseous Matter	161
II.	Aerosols	173
III.	Summary	191
	Problems	192
	Bibliography	192

CHAPTER 6. SAMPLING--THEORY, EQUIPMENT, AND TECHNIQUES	195
I. Introduction	195
II. Planning for Air Sampling	195
III. Air Sampling Equipment	203
IV. Techniques	234
V. Summary	242
Problems	244
Bibliography	245
CHAPTER 7. ANALYTICAL--THEORY, EQUIPMENT, PRINCIPLES, AND TECHNIQUES	247
I. Introduction	247
II. Theory	247
III. Equipment and Principles	254
IV. Techniques of Analysis	275
V. Summary	291
Problems	292
Bibliography	292
CHAPTER 8. PHYSICAL ANALYSIS OF PARTICLES	295
I. Introduction	295
II. Particle Size Determination	295
III. Other Petrographic Properties	329
IV. Summary	334
Problems	335
Bibliography	336
CHAPTER 9. SPECIFIC TESTS	339
I. Introduction	339
II. Physical Tests	339
III. Chemical Tests	345
IV. Biological Tests	359
V. Summary	362
Problems	363
Bibliography	363

CHAPTER 10. EFFECTS OF AIR POLLUTION	365
I. Introduction	365
II. Effects in General	365
III. Effects of Specific Agents	380
IV. Summary	403
Problems	405
Bibliography	406
AUTHOR INDEX	411
SUBJECT INDEX	417
