

**CONTENTS**

1. Air Pollution from the use of fuels	1
2. Effects of air pollution	19
3. Legislative control	67
4. Methods of measurement and survey	99
5. Meteorological factors and dispersion	123
6. Height and design of chimneys	142
7. Principles of reducing pollutants in gaseous discharges	168
8. Removal of grits and dust	210
9. Removal of sulphur oxides from flue gases of power station and industrial boilers	275
10. Reduction of emissions of grit, dust and acid smuts from power stations and industrial - Boilers	303
11. Nuclear power industry and miscellaneous uses of radioactive material	329
12. Coke and gas industries	341
13. Petroleum refineries	363
14. Iron and steel works	389
15. Production of non-ferrous metals	419
16. Inorganic chemical industries	494
17. Manufacturer of Portland cement	524
18. The ceramic industries	547
19. Lime Works	571
20. Incineration of refuses	578
21. Odours	598
22. road vehicles	607
