<i>Preface</i>	ix
<i>Contents of Other Volumes</i>	xvii

Part IV. ANALYSIS OF POLLUTANTS

16. Air Sampling and Quantity Measurement

E. R. Hendrickson

I. General Sampling Considerations	
II. Sampling Aerosol Contaminants	24
III. Sampling Gaseous Contaminants	34
IV. Simplified Techniques	44
V. Recording Instrumentation	49
References	

17. Analysis of Inorganic Gaseous Pollutants

Morris Katz

I. Introduction	54
II. Sulfur Dioxide	55
III. Sulfuric Acid Mist	76
IV. Hydrogen Sulfide—Methylene Blue Method	78
V. Nitrogen Dioxide and Nitric Oxide	80
VI. Ozone and Oxidants	86
VII. Volatile Fluorides and Hydrogen Fluoride	96
III. Chlorine and Hydrogen Chloride	99
IX. Hydrogen Cyanide and Cyanides	102
X. Ammonia and Ammonium Compounds	104
XI. Carbon Monoxide	105
III. Carbon Dioxide	108
III. Continuous Analysis	109
IV. Conclusion	111
References	111

18. Analysis of Organic Gaseous Pollutants*Aubrey Paul Altshuller*

I. Total Analysis for Organic Substances	116
II. Analysis of Hydrocarbons	120
III. Analysis of Aliphatic Oxygenated Compounds	130
IV. Analysis of Sulfur-Containing Compounds	136
V. Analysis of Halogenated Compounds	138
VI. Analysis of Aliphatic Nitrogen Compounds	
References	

19. Chemical Analysis of Inorganic Particulate Pollutants*Philip W. West*

I. Introduction	147
II. Dustfall and Sootfall	148
III. Airborne Particulates	151
IV. Conclusion	182
References	183

20. Chemical Analysis and Carcinogenic Bioassays of Organic Particulate Pollutants*Dietrich Hoffmann and Ernest L. Wynder*

I. Introduction	187
II. Fractionation	---
III. Neutral Fraction	191
IV. Acidic Fraction	221
V. Basic Fraction	223
VI. Bioassay	225
VII. Postscript	242
References	249

21. Analysis of Number and Size of Particulate Pollutants*Paul M. Giever*

I. Introduction	249
II. Principal Methods of Sample Collection for Determination of Number and Size of Particulate Pollutants	250

III. Techniques of Counting	253
IV. Particle Size Analysis	261
References	279

22. Morphological Analysis of Particulate Pollutants

Walter C. McCrone

I. Introduction	281
II. Collecting Particles	284
III. Mounting Particles for Microscopical Examination	285
IV. Morphological Analysis	286
V. Identification of Particles	291
VI. Discussion of Color Plates	297
References	301

Part V. AIR QUALITY AND METEOROLOGICAL MONITORING

23. Odor and Its Measurement

J. Floyd Byrd and Austin H. Phelps, Jr.

I. Introduction	305
II. Classification of Odor Measurement Problems	306
III. Methods of Describing Odor	308
IV. Units of Measurement—The Odor Unit	310
V. Techniques of Odor Measurement by Dilution	311
VI. Ambient Odors	320
VII. Examples of Application of Odor Measurement Results	321
VIII. Odor Threshold Data	324
References	326

24. Meteorological Measurements

E. Wendell Hewson

I. Introduction	329
II. Primary Meteorological Measurements	330
III. Secondary Meteorological Measurements	352
IV. Instrument Siting, Mounting, and Protection	363
V. Processing of Meteorological Measurements	372
VI. Quality Control of Meteorological Measurements	379
VII. Instrument Requirements	383
References	387

25. Monitoring Airborne Radioactivity

Harry F. Schulte

Distinctive Features of Sampling	393
II. Purposes of Air Monitoring	395
III. Radioactive Particulate Sampling and Quantitation	396
IV. Radioactive Gas Sampling and Quantitation	409
V. Survey Techniques	418
VI. Particle Size Analysis	419
VII. Standards	422
VIII. Measurement of Radioactivity as an Aid in Air Pollution Studies	422
References	423

26. Air Quality Monitoring

Robert J. Bryan

I. Introduction	425
II. Basic Considerations	426
III. System Design	440
IV. System Operation	445
V. Data Processing	447
VI. Data Interpretation and Evaluation	458
References	462

27. Production of Controlled Test Atmospheres

James P. Lodge

I. Introduction	465
II. System Types	468
III. Introduction of Gases and Vapors	474
IV. Introduction of Aerosols	479
V. Complex Systems	481
References	482

Part VI. SOURCE MEASUREMENT AND COMMUNITY SURVEY

28. Source Testing

Bernard D. Bloomfield

I. Introduction	487
II. Source Testing Procedures	489

III. Tracer Techniques	
References	532
	535

29. Source Monitoring

Paul Walton Purdom

I. Source Monitoring	537
II. Field Monitoring	540
III. Stack Effluent Monitoring	553
IV. Monitoring Fuels and Process	556
V. Records and Reports	557
VI. Summary	558
References	558

30. Source Inspection, Registration, and Approval

Charles W. Gruber

I. Purpose of Source Inspection, Registration, and Approval	561
II. Source Inspection	562
III. Field Procedures for Source Inspection	572
IV. Source Inspection by Owner's Employees or Consultant	584
V. Source Registration	587
VI. Source Approval	590
References	594

31. The Community Air Pollution Survey

August T. Rossano, Jr.

I. Scope and Objectives of Air Pollution Surveys	597
II. Survey Types	598
III. The Community Air Pollution Survey	608
IV. Air Resources Management Plan	630
V. Summary	631
References	632
