

## **CONTENTS**

Introduction	
Chapter	
1. Evolution of Industrial Water Treatment	1
2. Water Sources and Impurities	10
External Treatment	
3. Aeration	15
4. Chlorination	19
5. Clarification	24
6. Filtration	32
7. Precipitation Softening Processes	38
8. Ion Exchange	48
Boiler Water Systems	
9. Boiler Feedwater Deaeration	73
10. Preboiler and Boiler Corrosion Control	78
11. Boiler Deposits: Occurrence and Control	85
12. Boiler Blowdown Control	97
13. Boiler Tube Failures	105
14. Chemical Cleaning of steam Generator Systems	114
15. Embattlement of Boiler Metal	122
16. Carryover	126
17. Measurement of Steam Purity	133
18. Steam Turbine Corrosion and Deposition	137
19. Condensate System Corrosion	144
20. Fireside Preboiler Systems	150
21. Boiler Fireside Deposit and Corrosion Control-Liquid Fuels	155
22. Cold-End Deposition and Corrosion Control	161
Cooling Water Systems	
23. Cooling Water Systems-Heat Transfer	167
24. Corrosion Control-cooling Systems	169
25. Deposit and Scale Control-Cooling Systems	177
26. Microbiological Control-Cooling Systems	182
27. Cooling Tower Wood Maintenance	191
28. Once-Through Cooling Systems	196
29. Open Recirculating Cooling systems	202
30. Closed Recirculating Cooling Systems	210
31. Pretreatment of Cooling Water Systems	213
32. Treatment of Cooling Tower Blowdown	216

33. Air Conditioning and Refrigeration Systems	221
34. Total Energy Systems	229
Chemical Treatment Feeding and Control	
35. Chemical Feed Systems	233
36. Monitoring and Control of Water Treatment	247
Wastewater treatment and Reuse	
37. Wastewater Treatment	253
38. Industrial Wastewater Reuse	263
Special Industrial Processes	
39. Refinery/Petrochemical process Corrosion and Fouling	272
40. Pulping Process	282
41. Papermaking Process	293
42. Coke Oven Gas Systems	311
43. Selected Critical Cooling Systems in the steel Industry	320
44. Food and Beverage Processing	327
45. Gas Cleaning Systems	333
Control Water analyses and Their Interpretation	
46. Control Methods and Equipment	349
47. Expression of Analytical Results	354
48. Acidity (Free Mineral)	357
49. Alkalinity	358
50. Aluminum	361
51. Ammonia	363
52. Calcium	364
53. Carbon Dioxide	366
54. Chloride	369
55. Free Chlorine	372
56. Chromate	373
57. Chromium	376
58. Conductance	377
59. Copper	382
60. Chelant (EDTA)	384
61. Chelant (NTA)	387
62. Hardness	389
63. Hydrazine	391
64. Iron	393
65. Nitrate	395
66. Nitrite	397
67. Oxygen, Dissolved	399
68. pH	402

69. Phosphate	404
70. Silica	407
71. Sulfate	409
72. Sulfite	411
73. Turbidity	413
74. Zinc	414
75. Composition of Prepared Reagents	416
Conversion Factors/Tables of Measurement	421
Periodic Table of the Elements	424
Index	425
