PART I	BASIC KNOWLEDGE AND PRACTICES	
Chapter 1	Effect of Wastes on Streams and Waste-Water Treatment Plants	
1.1	Effect on Streams	3
1.2	Effects on sewage plants	7
Chapter 2	Stream Protection Measures	
2.1	Standards of stream quality	11
2.2	Stream quality control	15
Chapter 3	Computation of Organic Waste Loads on Streams	
3.1	Streeter – Phelps formulations	26
3.2	Thomas method for determining pollution-load capacity of streams	29
3.3	Churchill method of multiple linear correlation	37
Chapter 4	Stream Sampling	43
Chapter 5	Economics of Waste Treatment	
5.1	Benefits of pollution abatement	49
5.2	Measurement of benefits	50
5.3	A proposed method for resource allocation	51
PART 2	THEORIES	
Chapter 6	Volume Reduction	
6.1	Classification of wastes	61
6.2	Conservation of waste water	61
6.3	Changing production to decrease wastes	62
6.4	Reusing both industrial and municipal effluents for raw water supplies	62
6.5	Elimination of batch or slug discharges of process wastes	65
Chapter 7	Strength Reduction	
7.1	Process changes	68
7.2	Equipment modifications	69
7.3	Segregation of wastes	69
7.4	Equalizaion of wastes	70
7.5	By-product recovery	70
7.6	Proportioning wastes	72
7.7	Monitoring waste streams	72
Chapter 8	Neutralization	
8.1	Mixing wastes	73
8.2	Limestone treatment for acid wastes	74
8.3	Lime-slurry treatment for acid wastes	74
8.4	Caustic-soda treatment for acid wastes	74
8.5	Using waste boiler-flue gas	76
8.6	Carbon-Dioxide treatment for alkaline wastes	76
8.7	Producing carbon dioxide in alkaline wastes	76
8.8	Sulfuric-acid treatment for alkaline wastes	77
8.9	Acid-waste utilization in industrial process	77
Chapter 9	Equalization and Proportioning	
9.1	Equalization	79
9.2	Proportioning	80

Chapter 10	Removal of suspended solids	
10.1	Sedimentation	83
10.2	Flotation	87
10.3	Screening	91
Chapter 11	Removal of Colloidal Solids	
11.1	Characteristics of Colloids	97
11.2	Chemical coagulation	98
11.3	Coagulation by neutralization of the electrical charges	98
11.4	Removal of colloids by adsorption	101
Chapter 12	Removal of Inorganic Dissolved Solids	
12.1	Evaporation	103
12.2	Dialysis	104
12.3	Ion exchange	105
12.4	Algae	106
12.5	Reverse osmosis	108
12.6	Miscellaneous methods	108
Chapter 13	Removal of Organic Dissolved Solids	
13.1	Lagooning	110
13.2	Activated-sludge treatment	113
13.3	Modified aeration	114
13.4	Dispersed-growth aeration	114
13.5	Contact stabilization	116
13.6	High-rate aerobic treatment	117
13.7	Trickling filtration	119
13.8	Spray irrigation	122
13.9	Wet combustion	122
13.10	Anaerobic digestion	122
13.11	Mechanical aeration system	123
13.12	Well injection	124
13.13	Foam phase separation	128
13.14	Brush aeration	129
13.15	Subsurface disposal	129
13.16	The bio-disc system	130
Chapter 14	Treatment and Disposal of Sludge Solids	
14.1	Anaerobic and aerobic digestion	135
14.2	Vacuum filtration	137
14.3	Elutriation	138
14.4	Drying beds	138
14.5	Sludge lagooning	141
14.6	The wet combustion process	141
14.7	Atomized suspension	143
14.8	Drying and incineration	143
14.9	Centrifuging	144
14.10	Sludge barging	147
14.11	Sanitary landfill	147
14.12	Sludge pumping	147
14.13	Miscellaneous methods	148
PART 3	APPLICATIONS	
Chapter 15	Joint Treatment of Raw Industrial Wastes with Domestic Sewage	
15.1	Industrial use of municipal sewage plants	154
15.2	Municipal ordinances	156
15.3	Sewer-rental charges	157
15.4	Existing situation	161
15.5	Stream survey	162
15.6	Composite waste sampling	169

15.7	Composite waste analyses	169
15.8	Laboratory pilot-plant studies	171
15.9	Literature survey	176
15.10	Conclusions from study	176
15.11	Overall planning study conclusions	178
15.12	Solids handling	183
15.13	Final design of the Gloversville-Johnstown joint sewage treatment plant	183
15.14	Estimated costs and financing	185
15.15	Application of the plan in practice	187
Chapter 16	Joint Treatment of Partially Treated Industrial Wastes and Domestic Sewage	
16.1	Ascertaining present plant capacity	189
16.2	Reducing the incoming load	189
16.3	Reevaluation of present plant and suggestions for additions	190
Chapter 17	Discharge of Completely Treated Wastes to Municipal Sewer Systems	
17.1	The sampling program	194
17.2	Analyses of wastes	194
17.3	Plant-production study	195
17.4	Suggested in-plant changes to reduce waste	195
17.5	City waste-water treatment plant	199
17.6	Toxic limits for metals	200
17.7	Treatment of industrial wastes	201
Chapter 18	Discharge of Raw Wastes to Streams	
18.1	The pickle-making process and its wastes	206
18.2	General stream and waste survey	207
18.3	Evaluation of survey results with regard to fish killings	208
18.4	Preliminary conclusions and suggestions	212
18.5	Findings of the pickle-factory survey and detailed recommendations	213
18.6	Effects of changes on factory and stream	214
Chapter 19	Discharge of Partially Treated Industrial Waste Directly to Streams	
19.1	Procedure	217
19.2	River Studies	218
19.3	Pilot-Plant results	221
19.4	Substitution of soluble sizing	224
Chapter 20	Discharge of Completely Treated Wastes to Streams	
20.1	The problem	229
20.2	Stream studies	231
20.3	State decision	231
20.4	Poultry waste characteristics	232
20.5	The solution	234
20.6	Results	236
Chapter 21	Site Selection	
21.1	Evaluation of cost-of-product basis	241
21.2	Tangible and intangible factors	241
21.3	The importance of long-term planning	243
21.4	Waste disposal as a critical factor	244
21.5	Water supply as a critical factor	245
21.6	Site selection for atomic-energy plants	247

PART 4	MAJOR INDUSTRIAL WASTES	
Chapter 22	The apparel Industries	
	TEXTILE WASTES	
22.1	Origin and characteristics of textile wastes	255
22.2	Treatment of textile wastes	258
22.3	Final waste treatment	265
	TANNERY WASTES	
22.4	Origin and characteristics of tannery wastes	277
22.5	Treatment of tannery wastes	279
	LAUNDRY WASTES	
22.6	Origin and characteristics of laundry wastes	291
22.7	Treatment of laundry wastes	292
Chapter 23	Food-Processing Industries	
23.1	Introduction	297
	CANNERY WASTES	
23.2	Origin of cannery wastes	299
23.3	Characteristics of cannery wastes	299
23.4	Treatment of cannery wastes	300
	DIARY WASTES	
23.5	Origin and characteristics of dairy wastes	316
23.6	Treatment of dairy wastes	317
	BREWERY, DISTILLERY, AND PHARMACEUTICAL WASTES	
23.7	Origin of brewery, distillery, and pharmaceutical wastes	329
23.8	Characteristics of brewery, distillery, and pharmaceutical wastes	330
23.9	Treatment of brewery, distillery, and pharmaceutical wastes	331
	MEAT-PACKING, RENDERING, AND POULTRY-PLANT WASTES	
23.10	Origin and characteristics of meat-packing wastes	340
23.11	Treatment of meat-packing wastes	342
23.12	Feedlot wastes	348
	BEET-SUGAR WASTES	
23.13	Origin and characteristics of beet-sugar wastes	350
23.14	Treatment of beet-sugar wastes	351
	MISCELLANEOUS FOOD-PROCESSING WASTES	
23.15	Coffee wastes	355
23.16	Rice wastes	358
23.17	Fish wastes	359
23.18	Pickle wastes	361
23.19	Soft-drink bottling wastes	361
23.20	Bakery wastes	363
23.21	Water-treatment-plant wastes	363
Chapter 24	The Materials Industries	
	WOOD FIBER INDUSTRIES	
24.1	Pulp- and paper-mill wastes	365
24.2	Photographic wastes	397
	METAL INDUSTRIES	
24.3	Steel-mill wastes	398
24.4	Other metal-plant wastes	412
24.5	Metal-plating wastes	415
24.6	Motor industry wastes	431
24.7	Iron-foundry wastes	434
	LIQUID MATERIALS INDUSTRIES	
24.8	Oil-field and refinery wastes	435
24.9	Fuel-oil wastes	453
24.10	Rubber wastes	453
24.11	Glass-industry wastes	459
24.12	Naval-stores wastes	459

	SPECIAL-MATERIALS INDUSTRIES	
24.13	Animal-glue manufacturing wastes	463
24.14	Wood-preservation wastes	463
24.15	Candle-manufacturing wastes	465
24.16	Plywood-plant glue wastes	466
Chapter 25	Chemical Industries	
25.1	Acid wastes	468
25.2	Cornstarch-industry wastes	473
25.3	Phosphate-industry wastes	476
25.4	Soap-and detergent –industry wastes	479
25.5	Explosives-industry wastes	484
25.6	Formaldehyde wastes	489
25.7	Pesticide wastes	491
25.8	Plastic and resin wastes	493
Chapter 26	Energy Industries	
26.1	Steam power plants	501
26.2	The coal industry	209
Chapter 27	Radioactive Wastes	
27.1	Origin of wastes	533
27.2	Power-plant wastes	533
27.3	Fuel-processing wastes	536
27.4	Treatment of radioactive wastes	540
27.5	Cost of radioactive-waste treatment	548
Index		577
