1. Solidification as an Ultimate Disposal Option for Hazardous Wastes	1
2. Survey of Available Stabilization Technology	9
3. An Overview of the Available Methods of Solidification for Radioactive Wastes	23
4. Use of an Extruder / Evaporator to Stabilize and Solidify Hazardous Wastes	65
5. Effective Disposal of Fine Coal Refuse and Flue Gas Desulfurization Slurries Using Calcilox [®] Additive Stabilization Technique	93
6. Microencapsulation : Simplified Hazardous Waste Disposal	103
7. FGD Solids Processing and Stabilization Options	119
8. The Terra-Tite [®] Process	143
9. The Petrifix [®] Process	149
10. The SFT Terra-Crete Process	155
11. Polymeric Solidification of Low-Level Radioactive Wastes from Nuclear Power Plants	167
12. Encapsulation Technique for Control of Hazardous Wastes	189
13. Nuclide Stabilization in Ceramics	233
14. Immobilization of Hazardous Residuals by Polyester Encapsulation	247
15. Sealosafe SM	297
16. Disposal of Liquid Wastes by Chemical Fixation / Solidification – The Chemfix [®] Process	321
17. Solidification of Wastes	349
18. Options for Disposal of Sodium Sulfur Oxide Wastes	363
