Foreword	xi
Environmental chemistry - an interdisciplinary subject. Natural and pollutant organic compounds in contemporary aquatic environments <i>S.C. Brassell and G. Eglinton</i>	1
Recognition of the sources of isoprenoid alkanes in recent environments <i>M.M. Quirk, R.L. Patience, J.R. Maxwell and R.E. Wheatley</i>	23
Patterns of hydrocarbon contamination in California coastal waters <i>R.W. Risebrough, B.W. de Lappe, W. Walker II, A.M. Springer, M. Firestone-Gillis, J. Lane, W. Sistek, E.F. Letterman, J.C. Shropshire, R. Vick and A.S. Newton</i>	33
Determination of trace level hydrocarbons in marine biota <i>S.A. Wise, S.N. Chesler, H.S. Hertz, W.E. May, F.R. Guenther and L.R. Hilpert</i>	41
Shipboard intercalibration of filters used in the measurement of particulate organic carbon <i>P.J. Wangersky and A.V. Hincks</i>	53
Determination and identification of hydrocarbon pollutants by thin-layer chromatography <i>H.E. Guard, L.H. DiSalvo and J. Ng</i>	63
Fingerprinting petroleum pollutants in the Mediterranean Sea <i>J. Albaigés</i>	69
Recent progress in polycyclic aromatic chemistry and its significance for environmental chemistry <i>M. Zander</i>	83

Determination of particulate organic matter in environmental samples by gas chromatography-mass spectrometry and high pressure liquid chromatography <i>R.C. Lao and R.S. Thomas</i>	97
Profiles of polycyclic aromatic hydrocarbons in suspended particles <i>R. Tomingas</i>	111
Method development and monitoring of polynuclear aromatic hydrocarbons in selected U.S. waters <i>J. Saxena, D.K. Basu and D.J. Schwartz</i>	119
A novel luminescence instrument for rapid identification and monitoring of aromatics in environmental chemistry <i>Arthur W. Hornig</i>	127
Analysis of C ₆ -C ₂₀ hydrocarbons in semi rural zones by high resolution gas chromatography coupled to mass spectrometry <i>M. Termonia, X. Monseur, G. Alaerts and P. Dourte</i>	135
Quantitative analysis of methylchloride in the atmosphere by gas chromatography with electron capture detection <i>Claire Vidal-Madjar, Fatima Benchah, Marie-France Gonnord, Jean Pierre Olivo and Georges Guiochon</i>	141
A recent case of environmental pollution: some analytical applications <i>Alberto Frigerio</i>	151
Evaluation of organochlorine compounds in the emissions of urban incinerators <i>A. Liberti, D. Brocco, V. Di Palo and M. Possanzini</i>	157
Polychlorinated biphenyls and related halogenated compounds <i>O. Hutzinger and A.A.M. Roof</i>	167
Characterization of chlorinated hydrocarbons in the marine environment: sampling and analytical aspects <i>S.P. Pavlou, R.C. Dexter, W. Hom</i>	185
Determination of phenylurea herbicides and their metabolites by high performance liquid chromatography <i>A. Kettrup, W. Maasfeld</i>	197
Microanalysis of aminotriazole by high performance liquid chromatography <i>J. Soulier, M. Farines, G. Vicens</i>	203
Chemical carcinogenesis: a natural and man-made global environmental problem <i>G. Holzer and J. Oró</i>	211

N ⁶ -(Methylnitroso)adenosine: a carcinogen of environmental significance <i>A. Giner-Sorolla, L.M. Anderson, J.H. Greenbaum and R.S. Anderson</i>	
Gas chromatographic-mass spectrometric studies on styrene toxicity <i>C. Pantarotto, M. Salmona, K. Szczawinska and F. Bidoli</i>	245
Computerized GC/MS for solving problems in water pollution <i>Ronald A. Hites</i>	
Industrial wastes as a source of chemicals entering the environment <i>Viorica Lopez-Avila and Ronald A. Hites</i>	
Environmental analysis from an industrial point of view <i>B. H. Bibo</i>	301
Design of the organics analysis in an environmental monitoring system <i>William L. Budde and James W. Eichelberger</i>	
Automatic analysis of organic pollutants in water via a calculator-controlled GC/MS <i>David P. Beggs</i>	317
Trace analysis of organics in water by gas chromatography <i>R. Mindrup</i>	325
Analysis of volatile components in waste water from a urea-formaldehyde glue plant <i>D. Barceló and L. Eek</i>	335
Application of an element specific microwave plasma detector to the identification and quantification of micropollutants in water <i>L. Stieglitz and W. Roth</i>	345
Multicomponent UV spectral analysis of aquatic organics <i>W.J. Maier, L.E. Conroy, S.J. Eisenreich, M.J. Hoffmann, C.A. Macko and P.D. Nath</i>	353
Microflora and microfauna waste waters <i>D. Rodriguez, I. Gil and P. Alonso</i>	367
The surveillance of coastal marine waters with bivalves. The mussel watch <i>Edward D. Goldberg</i>	373
Environmental dynamics of trace organics contaminants in estuarine and coastal zone ecosystems <i>S.P. Pavlou</i>	387

A method of data analysis on the distribution of chemical elements in the biosphere <i>T. Yamamoto, Y. Otsuka, M. Okazaki and K. Okamoto</i>	401
Chemical changes in the sediments of loch Eil arising from the input of cellulose fibre <i>S.O. Stanley, J. Leftley, D. Miller and T.H. Pearson</i>	409
Organic carbon in a scottish sea loch <i>J.R. Cronin and I.D. Tyler</i>	419
Analytical techniques used in the monitoring of radioactive discharges from the CEGB nuclear power stations <i>A. R. Ware</i>	
Activation analysis of As, Hg and Se in some marine organisms <i>E. Orvini, V. Caramella-Crespi, N. Genova</i>	441
Application of Ion-exchange techniques to the analysis of natural waters for toxic metals <i>J. Korkisch</i>	449
Optimized selenite determination in environmental waters by X-ray fluorescence <i>H. Robberecht, R. Van Grieken and H.A. van der Sloot</i>	
Comparison of methods of trace element enrichment for XRF determination <i>Donald E. Leyden, Wolfhard Wegscheider, W.B. Bodnar, Elizabeth D. Sexton and W.K. Nonidez</i>	469
Use of electron microscope X-ray in the determination of detoxication mechanisms for heavy metals in shellfish <i>S.G. George, B.J. Pirie and T.L. Coombs</i>	477
Studies of trace elements movements in the environment by X-ray emission spectroscopy <i>V. Valkovič</i>	485
Proton induced X-ray emission routine analysis of atmospheric aerosols <i>R. Vié le Sage, B. Grubis, A. Roy, M. Darzi and J.W. Winchester</i>	493
Recent advances in surface analysis of environmental particles <i>D.F.S. Natusch</i>	501
Identification of inclusions and particles by aman microprobe <i>M. Delhaye, J. Barbillat and P. Dhamelincourt</i>	515

Contents

Contributions to the development of natural urban particulate matter standard materials <i>K.E. Lorber, E. Lankmayer, W. Wegscheider and F. Zisser</i>	
Direct analysis of airborne particles by glass matrix X-ray diffraction <i>Peter O. Warner, Nathan C. Riddle and Larry E. Saad</i>	533
Ion-selective electrodes in environmental and toxicological analysis <i>J.D.R. Thomas</i>	
Continuous trace level analysis using Ion-selective electrodes <i>A. Braat</i>	
Fluoride determination by continuous flow analysis <i>-Cl. Landry, C. Michal and F. Cupelin</i>	
The use of copper Ion-selective electrode for determination of copper chemical forms in natural waters <i>R. Stella, M.T. Ganzerli-Valentini</i>	
Recent advances in electrochemical techniques for environmental pollution monitoring and control <i>Bernard Fleet</i>	
Applications of chemiluminescence to the metal ion determination in water <i>A. Larena and E. Bernabeu</i>	
Improvement of the cold-vapor atomic absorption method for the determination of mercury in sea water <i>P. Courau, F. Laumond, M. Hardstedt-Romeo</i>	
Extraction of heavy metals from marine sediments for analysis by atomic absorption spectrometry. Some factors affecting extraction efficiency <i>M.A. Ozkan, G. Tunçel, S. Tuğrul, G. Ramelow and T.I. Balkaş</i>	
Variations in extraction efficiency of aqueous cadmium (II) using the APDC-MIBK procedure <i>Leo W. Newland and Richard G. Clements</i>	621
Total deposition of various elements from the biscay atmospheric environment <i>I. Gracia and C. Elejalde</i>	629
Index	637
