

## CONTENTS

1. The Industrial Pollution Problem	1-3
2. History of Federal Pollution Control Legislation	2-1
3. History of State and Local Pollution Laws	3-1
4. Air and Water Pollution Quality Standards	4-1
5. Air Pollution Control Programs and Systems	5-1
6. Water Pollution Control Programs and Systems	6-1
7. Pollution Waste Control	7-1
8. The Coordinated Industrial-Municipal-Regional Approach to Air and Water Pollution Control	8-1
9. Research Programs for Air and Water Pollution Control	9-1
10. Pollution Control in the Steel Industry	10-1
11. Pollution Control in Foundry Operations	11-1
12. Pollution Control in Plating Operations	12-1
13. Pollution Control in Metal Fabricating Plants	13-1
14. Pollution Control in the Chemical Industry	14-1
15. Pollution Control in Textile Mills	15-1
16. Pollution Control in Food Industries	16-1
17. Pollution Control in the Pharmaceutical Industry	17-1
18. Pollution Control in the Pulp and Paper Industry	18-1
19. Pollution Control in the Aerospace and Electronics Industries	19-1
20. European Industrial Pollution Control Practices	20-1
21. Organizing and planning a Pollution Control Department	21-1
22. Plant Operation and Training Personnel for Pollution Control	22-1
23. Air Pollution Control Equipment	23-1
24. Water Pollution Control Equipment	24-1
25. Equipment Guarantees, Performance Testing, and Startup Procedures	25-1
26. Operating Costs and Procedures of Industrial air pollution Control Equipment	26-1
Glossary follows Chapter	26
